OBJECTIVE

Highly Skilled and Innovative Software Development Professional With 2 Years Hands-on Experience in Web Application Development. Focused and Efficient Learner With Practical Expertise in Web Applications.

EDUCATION

B.Tech.Information Technology

Pallavan College Of Engineering (2016 - 2020)

CGPA-6.7

HSC

Pachaiyappa's Hr. Sec School (2014 - 2016)

Aggregate: 74%

SSLC

Pachaiyappa's Hr. Sec School (2012 - 2014)

Aggregate: 92%

EXPERIENCE

01 **Bharat FIH Limited.** Apr - 2021 to Oct- 2022

Associate Engineer

- Adapt at Planning & Executing deployment of System Features, orchestrating the integration, and Maintaining the System Throughout its lifecycle.
- Extensive Development regression ,Finding the Bugs and Fixing Troubleshooting the Existing Projects.
- Understanding user Requirement and Implement it in existing Project.
- Bugs and defect fixed in real time projects.

02 **Transasia Soft Tech.** Nov - 2022 to Present

Software Engineer - Web Developer

- Developing and Maintaining web applications Using ReactJS and responsible for building scalable, high performance web applications that integrate front-end ReactJS Components with back-end Spring Boot API's, and ensure smooth communication between front-end and back-end.
- Building Reusable React Components and Spring Boot Services that can be used across different projects.
- Writing Clean and maintainable code that is easy to read, well documented, and adheres to industry best practices.

PERSONAL DETAILS

Father Name - V Elangoven
Date of Birth - 05 Nov 1997
Gender - Male
Nationality - Indian

PROJECTS

CTRACK WEB APP

Ctrack is used to capture the claiming process of insurance policies and also verifies whether the claim is genuine or not. Technology used in this project are ReactJS as Front-End and Spring boot with Mongo DB as Back-End for this Project.

PROJECT - CTRACK - MOTOR AND FIRE INSURANCE

TOOL - Spring Tool Suite (STS) ,VS Code, Post Man

LANGUAGE - Java 8

FRAMEWORK - Spring Boot

DATABASE - Mongo DB

ROLES AND RESPONSIBILITY

- Developing and Maintaining web applications Using ReactJS and responsible for building scalable, high performance web applications that integrate front-end ReactJS Components with back-end Spring Boot API's, and ensure smooth communication between front-end and back-end.
- Building Reusable React Components and Spring Boot Services that can be used across different projects.
- Writing Clean and maintainable code that is easy to read, well documented, and adheres to industry best practices.
- Collaborating with cross functional teams closely with designers, product managers, and other developers to ensure that the product is delivered on time and meets the requirements.
- Integrating API's into the web applications to ensure seamless data flow between the front-end and back-end.
- Responsible for identifying and fixing issues with the application, including performance issues, bugs and other problems.
- Responsible for deploying and maintaining the application to production ensuring that is running smoothly.
- Responsible for monitoring the performance of the application and optimizing it for better user experience.
- Represented the web team at meetings with executives and discussed project goals and milestones.
- Developed RESTful API's using Spring boot and Mongo DB.

DECLARATION

- I Hearby Declare that all the information Furnished above is true to the best of my Knowledge.
