ABOUT

A passionate and skilled full stack developer with around two years of experience in developing web applications using Java, Spring Boot, JavaScript, and other technologies. Currently working at Mountblue Technologies as a contractor for Ubona, a voice bot and call center automation company. Seeking to leverage my expertise and knowledge to create innovative and user-friendly solutions for clients.

EDUCATION

- **Bachelor of Science in Information Technology**, Magadh University, 2022

WORK EXPERIENCE

Full Stack Developer

Mountblue Technologies, May 2022 - Present

Contractor for Ubona and Ezetap

- Integrated various banks and payment gateway APIs with Ezetap server using Java and Spring Boot.
- Developed mock server for dev and QA testing and API for bulk onboarding of Razorpay customers on Ezetap server.
- Re-developed IVR generating service for Ubona using Java and Spring Boot, allowing customers to customize and launch their own IVR systems.
- Collaborated with front-end developers and designers to create responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
- Used tools and databases such as MySQL, MongoDB, PostgreSQL, Jira, IntelliJ Idea, Git, and Linux.

*

Projects

Razorpay UPI Integration

- *Integrated Razorpay UPI in Ezetap server using Java and Spring Boot, enabling UPI service for Razorpay customers on Ezetap POS devices.*
- *Generated APIs for UPI transactions, refunds, and status checks, and ensured compliance with security and regulatory standards.*
- *Developed mock server for dev and QA testing using Spring Boot and Mockito.*

New IVR System

- *Developed the backend for a new IVR system for Ubona using Java and Spring Boot, allowing customers to create and customize their own IVR flows using a web interface.*
- *Implemented RESTful APIs for IVR creation, modification, deletion, and activation, and integrated them with Ubona's voice platform and database.*
- *Used MongoDB and PostgreSQL for data storage and retrieval, and JUnit and Mockito for unit testing.*

SKILLS

- **Programming Languages:** Java, JavaScript, C/C++
- **Frameworks and Libraries:** Spring Boot, React, Node.js, Spring
- **Tools and Databases:** MySQL, MongoDB, PostgreSQL, Jira, IntelliJ Idea, Git, Linux
