SUMMARY

I would like to obtain a challenging position in IT where my technical and interpersonal skills can be utilized to benefit both me and Organization. I can describe myself as AWS, DEVOPS Engineer who is technical sound in Linux administration and also have support & service skills.

EDUCATION

- B.E in Civil from BIET College of engineering, Davanagere, at 2019.
- 12th in PCMB from Govt. P. U. College Vijayapur in 2015.

TECHNICAL SKILLS

- LINUX
- AWS
- DEVOPS

KEY SKILL

- Familiar with Linux basic commands.
- Add/Remove applications from system or server by command line mode using command YUM and RPM.
- Group administration and User Administration in Linux.
- Partition of hard disk and LVM, Configuration of swap.
- Adding new users account as per the instructions given by the administrator with the required permission.
- Giving permission to the Linux files as per the requirement.
- Special permissions ACL.
- Having the knowledge of Configuring Different servers (FTP, NFS).
- Have good knowledge on AWS cloud technologies
- AMI – creating custom images and template for easy deployment purpose
- Creation and managing EBS storage based on the requirement and attaching with Linux instances
- Creating Load Balancer between the servers
- Applying Auto scaling to the servers
- Extensive Knowledge of AWS cloud resources like IAM,VPC,S3,EC2,ROUTE53,
- Ability to work with DEVOPS concepts by using tools(Git, Github, jenkins, maven, nexus, docker, kubernetes cluster and service
- Jenkins - (creating free style projects to deploy application and system related configurations), creating maven project and updating pre- and post-build actions.
- Integrating docker plugins to deploy war to docker containers using Jenkins.
- Good knowledge on Git, Github version controller and repository
- Integrating ansible service to do deployment task on multiple server
- Having Nexus tool knowledge to store build artifact
- Maven tool to build and creating jar/war artifact. Good knowledge on maven lifecycle (validation, compilation, packaging, install, deploy)
- Docker engine (creating containers, deploying custom images using docker file, creating and managing volumes in containers, managing bridge network and ports).

PROJECT WORK

Project -1:

- Configure NFS – Using network file system configuration shared master server drive partition to client server for accessing the data and writing data

Project -2:

- Setup - custom VPC, subnets route table and EC2, S3 Route 53 IAM.
- Hosted web application using server less compute option Lambda and Dynamo DB.
Gateway for application to lambda service connectivity.
- Hosted web application and database server using AWS Ec2 and Relational data service (RDS)

CERTIFICATION

- **AWS** and **LINUX** and **DevOps** Administration Training Has been successfully Completed In **BesantTechnologies**, Rajajinagar, Bangalore.

PERSONAL DETAILS

Name	: Gireesh A Teli
Date of Birth	: 21/07/1997
Father Name	: Ashok Teli
Mother Name	: Geeta Teli
Address	: At post Kakhandaki T&D Vijayapur 586113
Languages known	: Kannada, English, Hindi, & Telugu
Marital Status	: Single
