

CAREER OBJECTIVE:

To give effective as well as efficient efforts towards attainment of organizational goals with exploring wide scope of knowledge and intelligence. To work in an environment that provides a challenging and rewarding career ensuring a high-level job satisfaction. In the process apart from benefiting my employer, I also expect to learn for my overall development.

PROFILE SUMMARY:

- 3 Years of industry experience in the area of Software Testing (Manual and Automation) with a solid understanding of Test Planning, Test Design, Test Execution and Defect Reporting & Tracking.
- Hands on experience in Manual Testing & Automation Testing.
- Well acquainted with Software Development Life Cycle (SDLC), emerging software disciplines like agile software development.
- Working experience in Domains such as Banking and Retail.
- Understanding Software Requirement Specification and identifying the required Test Scenarios for Projects.
- Experience in Web Application testing.
- Experience in preparation of automated test scripts using Selenium.
- Able to work collaboratively with testers, developers, and other team members in testing complex projects and in the overall enhancement of software product quality.
- Commitment, result oriented and interested to learn new technologies.

PROFESSIONAL SKILLS:

- Experience in Test Automation using Selenium Webdriver.
- Experience in POM Design Pattern, Junit, TestNG, Data Driven and BDD(Cucumber) Framework
- Proficient in using the build tools like **Maven** to manage Java/Selenium automation projects.
- Maintained the Selenium automation scripts in version control tools like **GIT**.
- Experience in working with **Test/ Defect management tools** like **JIRA**.
- Extensive working experience in all phases of **Agile-Scrum methodology**.
- Participated in all agile ceremonies like planning, daily scrum meeting, sprint review and sprint retrospective.
- Good knowledge in writing Test cases using Element locators, WebDriver methods, Java programming features, JUnit, TestNG Annotations and Cucumber Feature file Scenarios.
- Well versed with Handling Elements in Selenium WebDriver.
- Experience in Data driven Testing, Cross browser testing and Parallel Test execution using Selenium WebDriver, TestNG, Cucumber and selenium Grid.
- Implemented continuous Integration test executions after every schedule build and track the results using **JENKINS**.
- Knowledge in API testing and Mobile automation

EDUCATIONAL QUALIFICATION:

- ✓ **Bachelor of Commerce B.COM** in Patrician college of arts and science, Chennai.

TECHNICAL PROFICIENCY

System Software / Tools

- Software Testing : Manual and Automation Testing
- Tools : Eclipse, Jira, Selenium WebDriver.
- Databases : MYSQL
- Languages : Java
- Operating Systems : Windows XP/Vista/7/8/10
- Exposure on Tools : Maven, Jenkins, GIT & GITHUB.
- Tools & Utilities : MS-Suite (MS Word, MS Excel, MS Outlook)

WORK EXPERIENCE:

- Worked as a Software Test Engineer in **AMTP Software private Limited** from Apr 2020 to Apr 2022.
- Worked as a Programmer Analyst in **Cognizant Technologies** from May 2022 to Mar 2023

PROJECTS HANDLED:

Project 1 | Banking Domain.

Project Name: Hbz Bank Ltd

Testing Approach: Automation and Manual

Tools Used: Selenium Web driver with TestNG Framework.

Duration: April 2020 - Oct 2020.

Technology used: Java, Selenium Web Driver, Maven, Test Ng, CI (Jenkins), JIRA, POM

Project Description:

HBZ Bank Limited is a local commercial bank in South Africa. It provides a wide range of products and services including deposit and lending products, trade finance, foreign exchange and foreign travel services, investment banking, internet banking and more. It also offers purely Shariah compliant Islamic banking products through an exclusive Islamic banking branch.

Roles and Responsibility:

- Understanding and Analyzing the Application Under Test in terms of Object Identification.
- Creating Test scenarios and Collecting Test Data.
- Identifying end to end scenarios and code modularity.
- Implementing Cucumber with TestNG Test Automation framework and developing automation infrastructure.
- Creating reusable components.
- Creating and enhancing Test Cases (Test Scripts) using Element locators, WebDriver methods, Java programming concept
- Responsible for updating the test case in GIT repository
- Creating Data-driven Tests and Running through the framework.

- Cross Browser Testing (Executing test cases against various browsers like Chrome, Internet Explorer etc...).
- Parallel Test Execution.
- Defining and exporting Test Results. Analyzing Test Results and Reporting Defects.
- Tracking Defects and Select Test cases for Re & Regression Testing.

Project 2 | E-Commerce Domain

Project Name: Chicwish.com

Testing Approach: Manual and Automation.

Tools Used: Selenium Web driver with Cucumber Framework.

Duration: From Oct 2020 – Apr 2022.

Technology used: Java, Selenium Web Driver, Maven, Cucumber, CI (Jenkins), JIRA, POM

Project Description:

It is a leading e-commerce company in U.K where dynamic lifestyle and cosmopolitan outlook blending the best of East and West. It provides our indie designers with an abundant supply of new ideas on which to draw to express their talent and creativity.

Roles and Responsibility:

- Selection or identification of test cases for automation from existing test case documentation.
- Applying Designing and Test Automation Strategy Document
- Creating an automation test plan and getting approval.
- Configure Selenium Test Environment for setup (ex: Java, Selenium WebDriver , TestNG and Cucumber etc.).
- Participation in Selenium Environmental Setup with IDE.
- Automation framework design and implementation according to project structure.
- Creating, Enhancing, Debugging and Running Test Cases.
- Organizing, monitoring defect management process Handling changes and conducting regression tests.
- Find solutions for issues related to object identity issues and error handling

Project 3 | Medical insurance Domain

Project Name: Lincoln National Corp

Testing Approach: Manual and Automation.

Tools Used: Selenium Web driver with TestNG Framework.

Duration: From May 2022 – Mar 2023.

Technology used: Java, Selenium Web Driver, Maven, TestNG, Postman, RestAssured, JIRA, POM, Ms Access.

Project Description:

It is a leading Medical insurance company in USA where life insurance, annuities, retirement plan services and group protection focus on supporting, preserving and enhancing people's lifestyles and retirement outcomes.

Roles and Responsibility:

- Creating Test scenarios and Collecting Test Data.
- Identifying end to end scenarios and code modularity.
- Implementing Cucumber with TestNG Test Automation framework and developing automation infrastructure.
- Creating reusable components.
- Creating and enhancing Test Cases (Test Scripts) using Element locators, WebDriver methods, Java programming concept
- Configure Selenium Test Environment for setup (ex: Java, Selenium WebDriver , TestNG and Cucumber etc.).
- Responsible for updating the test case in GIT repository
- Creating, Enhancing, Debugging and Running Test Cases.
- Organizing, monitoring defect management process Handling changes and conducting regression tests.
- Find solutions for issues related to object identity issues and error handling

PERSONAL DETAILS

Name	Gowtham V
Nationality	India
Marital Status	Unmarried
Language Known	Tamil, English
