Profile Summary:

Experienced Software Developer with a strong commitment to personal and organizational growth. Quick learner, adept at staying current with emerging technologies, and a valuable addition to collaborative teams. Contributed significantly to **Virtusa's success, leveraging two years** of professional experience to drive innovation and deliver high-quality software solutions.

Tools and Technologies:

Backend	Java, Spring Core, Spring Boot 3.x.x, Security (Basic Authentication, OAuth, JWT) Spring Data JPA, APIs, Microservices (ZipKin, APIGATE Way, CircuitBreakers, Spring Cloud Config Service.), Spring Boot Profiles, Swagger/Open API, Spring boot actuators, Containers, Jenkins, Java 8, Collections, Multithreads, Agile methodology.
Frontend	Angular, HTML, CSS, JSP, JSTL, JavaScript, Bootstrap, TypeScript
Database	MySQL, JDBC, Hibernate, Spring Data JPA, SQL
Miscellaneous	AWS (S3, EC2, Lambda), Web Penetration Testing, Git, GitHub, postman, Mave, Junit, log4j

Responsibilities:

- To pursue a challenging position that enables and utilizes the skills and provides me with an opportunity for the best of my professional growth as well as organizational growth.
- Maintain Company Infrastructures, software updates.
- Developed and maintained robust microservices using Spring Boot, implementing RESTful APIs, and leveraging Spring Cloud for efficient configuration management, Java Design, Patterns and Solid Principles
- Designed, implemented, and optimized database interactions using Hibernate, improving data access efficiency and reducing query response times.
- Implemented authentication and authorization solutions using Spring Security, ensuring secure access control and user authentication in web applications

Organizational Experience:

Associate Software Engineer at Virtusa Corporation (May 2022 to Present)

Project: Covenants Microservices Conversion (CITI bank) **Role:** Backend Developer

Project Overview:

- Microservices Architecture Design and Development: Built modular microservices using Java and Spring Boot for enhanced scalability and maintainability.
- RESTful API Implementation: Enabled efficient data exchange and interactions between microservices.
- Frontend Integration: Collaborated with frontend teams to seamlessly integrate with the new architecture.
- Database Management: Implemented strategies to ensure data consistency and integrity across microservices.
- Performance Optimization: Profiled and optimized microservices for improved responsiveness.
- Team Communication and Documentation: Actively participated in team meetings and contributed to API and architecture documentation.

Achievements & Certifications:

- Oracle Certified Associate (OCAJ) ID: 142329790CAJSE8, (Oct-18-2022)
- AWS Certified Developer Associate | validation Id: P3XJ721CXFFE113N
- Certified Ethical Hacking -V10, Supraja Technologies, (08/2020 - 09/2020)
- Web Application Bug Hunting, Supraja Technologies (04/2021 - 06/2021)
- TCS-NQT Career Edge- knockdown, TCS, (05/2020 - 05/20)
- Worked a Petty Officer Cadet in NCC 6 (A) Naval Group, I served as a leader and obtained A+ Certifications in B1, B2, and C over the course of several years. (10/2018 – 04/2021)

Educational Qualifications:

Bachelor Of Technology (CSE)	Kakinada Institute of Engineering and Technology	(07/2018 - 04/2022) 72%
Higher Secondary Education	Narayana Junior College	(06/2017 - 04/2018), 94%
Secondary Education	A.P. Model School	(06/2015 - 04/2016), 8.8 CGPA

Personally Worked on Projects:

- 1. E-Banking:** Developed a Java Full Stack E-Banking System with an intuitive single-employee interface for streamlined customer profile management, account management, and transaction history viewing.

Roles: Java full-stack Developer

Technologies Used: Java 8, Spring Boot, Microservices, Angular, Hibernate, MySQL, HTML, CSS.

- 2. Pharmacy:** The Pharmacy Application is a comprehensive Java Full Stack solution designed to streamline pharmacy operations. It facilitates efficient management of prescriptions, inventory, and customer interactions, ensuring a seamless and secure experience for both pharmacists and customers.

Roles: Java full-stack Developer

Technologies Used: Java 8, Spring Boot, Microservices, Angular, Hibernate, MySQL, HTML, CSS.

- 3. Oxygen Supply:** Designed an online portal where users can connect with authorized oxygen unit dealers during the COVID-19 pandemic, facilitating critical and timely access to life-saving oxygen supplies for emergency needs. Complete Project Developer.

Roles: Java full-stack Developer

Technologies Used: Java 8, Spring Boot, Microservices, Angular, Hibernate, MySQL, HTML, CSS.

- 4. College Grievance Redressal System:** Developed a Student Grievance Redressal System that streamlines scheduling and communication between faculty and students, offering an efficient solution for identifying and addressing problem areas. It ensures prompt data retrieval, eliminates redundancy in data storage, and enhances student performance assessment accuracy. This versatile project can serve as the foundation for future mobile or web applications. Complete Project Developer.

Roles: Python full-stack Developer

Technologies Used: Python, Django, JavaScript, MySQL, HTML, CSS, API's.

Personal Details:

Nationality	Indian
Languages Known	English, Telugu
Marital Status	Unmarried
Date of Birth	23 / July / 2001
