Summary

• Data Scientist with experience crafting data-driven insights for segmentation and classification. Skilled in Python, statistical methods, Analytical and visualization tools. Build, improve, and analyze models to solve business problems, collaborate effectively to deliver actionable insights. Seeking to leverage expertise and passion for data-driven solutions at your innovative company.

Technical Skills

- **Python** : NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Tensorflow, Keras, NTLK, Flask
- **Statistics & Modeling** : Model development, evaluation, testing
- **Data Engineering & Preprocessing** : Large data handling, data integrity, Exploratory Data Analytics, Data Visualization
- **Machine Learning** : Regression, Classification, Clustering, Ensemble Learning, Time Series Analysis, PCA
- **Unsupervised Learning** : K-means, clustering, CHAID, decision trees
- **Data Science Tools** : Tableau, Microsoft Excel, Git, GitHub, SQL, Azure, AWS

Soft Skills

- **Problem-Solving** : Analyze data, identify patterns, and build solutions
- **Communication Skills** : Clearly communicate technical concepts to various audiences and Team members
- **Collaboration** : Work effectively with diverse teams and stakeholders
- **Learning Agility** : Continuously learn new technologies and adapt to changing environments
- **Business Acumen** : Understand business needs and translate into technical requirements

Experience

Data Scientist **Capgemini** *Hyderabad, India* **01/2022 - Present**

- Accomplished client data understanding and streamlined processes, improving data readiness by 20%.
- Executed hands-on regression and classification techniques, improving model accuracy by 18%.
- Built baseline models with optimized data preparation, reducing model development time by 25%.
- Achieved optimal model hyperparameters through efficient parameter tuning, enhancing model performance by 22%.
- Implemented ensemble learning methods for tuned models, boosting overall model robustness.
- Successfully developed and deployed customer churn analysis models, reducing churn rate by 12%.
- Recommended products using market-basket analysis, leading to a significant 17% increase in sales.
- Developed a customer churn analysis system, resulting in a 20% growth in the retention of high-value potential customers.

Analyst / Software Engineer *Hyderabad, India* **02/2020 - 01/2022**

- Served as a System Administration to perform day-to-day support on the server like Administration, Complex Health Checking, maintenance, upgrade of OS, performing Security related controls and checks.

Education

Bachelor of Technology *Vizianagaram* **04/2015 - 05/2019**
MVGR College of Engineering

- Electrical and Electronics Engineering 8.74 CGPA

Achievements

- Successfully developed and deployed advanced solutions, enhancing data-driven decision-making.
- Collaborated with stakeholders to define project objectives, ensuring alignment with business goals.
- Developed and implemented predictive models, contributing to solving complex business challenges.

Projects

- **RFM Customer Segmentation** : Used clustering techniques to segment customers based on the frequency and purchases of customers
- **Medical Cost Prediction** : Used Regression algorithms and hyperparameter tuning to predict insurance cost
- **E-commerce Product Delivery Prediction** : Used classification algorithms and hyperparameter tuning to predict delivery of a product

Certifications

- **Machine Learning Specialization, Deep Learning Specialization**: Course by DeepLearning.AI
- **Azure Fundamentals Certified (AZ-900)**: Microsoft Certification
- **Python and SQL**: Course by Coursera
