Summary

DevOps Engineer with over 4 years of experience specializing in optimizing CI/CD pipelines for streamlined workflows, resulting in substantial reductions in deployment times. Skilled at achieving 99% system availability through careful configuration and fault-tolerant setups. Capably automated intricate build processes, yielding a significant% reduction in manual intervention. Skilled in Docker implementation, contributing to expedited deployments with a 40% enhancement in speed.

Professional Summary

- Having 4+ years of IT experience as **DevOps Engineer** configuration management and release management.
- Experienced in using Build Automation scripting like MAVEN as build tools for building of deployable artifacts (JAR, WAR) from source code.
- Having Good Experience on **CI, CD** and **Pipeline** as code in **JENKINS**.
- Worked on **Microservices** for Continuous Delivery environment using **Docker**.
- Experienced in containers using **Docker**.
- Experienced in creating cluster using **Kubernetes & EKS**.
- Launching Amazon EC2 Cloud Instances using Amazon Web Services (Linux/Ubuntu/RHEL) and Configuring launched instances with respect to specific applications.
- Managed access control and plug-ins installations, configured Distributed builds using **Master/slave** concept in **Jenkins** to achieve Continuous Integration and Delivery (**CI/CD**)
- Good knowledge on scrum and Agile methodology.
- Developed **Ansible Playbooks** to manage systems configuration.
- Experience in branching, tagging and maintaining the version across the environments working on Software Configuration Management (**SCM**) tool like **GIT**.
- Ability to build deployment, build scripts and automated solutions using scripting languages such as Shell scripting (Bash).
- Good knowledge in **CI** (Continuous Integration) and **CD** (Continuous Deployment) methodologies.
- Closely worked with Developers and Analysts to address project requirements. Able to effectively manage time and prioritize multiple projects.
- Good communication, team membership and relationship management skills.
- Strong ability to troubleshoot any issues generated while building, deploying in production support.

Technical Skills

- | | |
|-----------------------------------|---|
| • Continuous Integration | : Jenkins, Maven |
| • Containerization | : Docker, Kubernetes |
| • Configuration Management | : Ansible |
| • Infrastructure as Code | : Terraform |
| • Cloud Services | : Amazon Web Services (AWS), Microsoft Azure (Azure DevOps) |
| • Version Control | : Git/GitHub/AzureGit |
| • Operating Systems | : Windows, Linux |

Professional Work Experience

Aircom Solutions Pvt Ltd
DevOps Engineer

August 2019 – Present

Project: Streamlining Operations
Client: Agoda

October 2019 – February 2022

- Led the seamless integration of Git and Jenkins, driving efficient CI/CD pipelines and realizing a remarkable 25% reduction in deployment times.
- Orchestrated the implementation of Ansible Playbooks, carefully honing a complex system configurations and achieving a substantial 30% enhancement in deployment efficiency.

- Demonstrated precision in the management of AWS instances, ensuring a noteworthy 99.99% availability through thorough fault- tolerant setup and AMI configurations.
- Well accomplished the adroit implementation of Docker for continuous delivery, resulting in asignificant 40% increase in deployment speed.
- Fostered adept collaboration across cross-functional teams, culminating in the establishment of a Docker-based continuous delivery framework, ultimately amplifying workflow efficiency by 45%.
- Played a pivotal role in configuring and maintaining fault-tolerant setups, enabling seamless system operation even under challenging conditions.
- Collaborated with stakeholders to identify performance bottlenecks and pre-emptively implement solutions, contributing to the achievement of optimized deployment processes.

Project: Accelerating Healthcare Innovation
Client: Definitive Healthcare

June 2022 – Present

- Pioneered a notable 50% reduction in build durations by deftly implementing the Jenkins Master-Slave configuration, thereby immediately heightening operational efficiency.
- Demonstrated astute imagination by harnessing Git to ensure aseamless and uniform version control, culminating in amplified collaborative efforts up to 40%.
- Vigilantly ensured astriking 99.95% system uptime by providing unwavering, round-the-clock support, indeed encompassing operational and non-operational domains.
- Strategically harnessed the capabilities of Kubernetes to dynamically fine-tune application scalability, effectually adapting to fluctuating demands.
- Executed duteous automation of intricate build processes, adroitly wielding Maven, resulting in a noteworthy 40% minimization of manual involvement.
- Fostered seamless cross-functional collaboration, contributed to streamlined communication and the efficient realization of project objectives.
- Scrutinized performance metrics, expertly pinpointing bottlenecks and strategically recommended enhancements, thereby optimizing overall project efficiency and outcomes by 60%.

Education

- **Bachelor of Computer Applications (BCA)**
Krishna Chaitanya Degree & PG College, Vikrama Simhapuri University

June 2016 – April 2019
