EDUCATION

BACHELOR OF ENGINEERING

Sant Gadge Baba Amravati University

G.H. Rasoni Institute of Engineering and
Technology, Amravati.

Graduated with honor 2019

EXPERTISE & CERTIFICATIONS

Languages & Libraries: Python, SQL, Pandas,
NumPy, Regex

Algorithms: Linear & Logistic Regression, Naive
Bayes, K-NN, K-Means, SVM, Decision Trees,
Random Forest, Boosting Algos, NLP

API's & Production: Flask Web framework,
Postman. Amazon web services (AWS) clients by
producing financial ratios..

Deployment tools: (Git, Jenkins, etc.)

Systems: Windows, Linux, Conda, VS Code

Soft Skills: Excellent Verbal and written
communication skills, Presentation and
Negotiation skills.

COMPETENCIES

- Experience using ML analytical libraries, such as Pandas, numpy, scikit learn, Seaborn, Matplotlib, RegEx etc.
- Experience diving into **data to discover hidden patterns**, use data visualization tools (tableau) and problem solving.
- Take ownership of the data science model **end to-end from data collection to model deployment** to monitoring status of model in production.
- Expertise in **querying relational and non relational, databases**.
- Be able to clearly communicate results and recommendations to various stakeholders,
- Ability to understand business or product concerns and formulate them as technical problems that can be solved using data and math / stats / ML

GOAL

- Enhance knowledge about AI-ML-DL-DS
- Core data science skills, however, fall into three buckets: math/statistics, programming/coding, and business/domain skills

PROFILE SUMMARY

- 3.5 Years of Industry Experience with 3 years of Experience as a **Data scientist & Analyst** using NLP and Machine Learning Algorithms.
- Working Experience and Extensive Knowledge in **Python with libraries** Such Sklearn, TensorFlow, Numpy Pandas, Matplotlib, Seaborn.
- Worked on tools like Colab notebook, Visual Studio, Jupyter Notebook.
- Recognized and got appreciation by clients to deliver the effective Solution.
- Have Excellent Communication and agile team work experience.

WORKING EXPERIENCE

Programmer Analyst

Cognizant Technology Solutions

February 2021 - Present

Project 1

Description:

Effectiveness Prediction of Email Campaign:-

The project is to create machine learning models that characterize and predict whether the mail is ignored, read or acknowledged by the reader

Roles:-

- Actively involved in daily Standup calls and task assigned on Jira.
- Analysis and filtered 300K rows of data send by client. Optimized, **Clean & Pre-process data** before building a **classification model**.
- Performed **Feature Engineering** on data having 12 columns using **Python libraries** like Numpy, Pandas, Seaborn.
- **Built and Trained** the Model using Logistic Regression, Decision Tree, Random forest, KNN and XGBoost Reports, AUC Score.
- Drove **6-7% cost reduction**, streamlined processes to minimize human efforts, and slashed decision time from 10 to 1-2 minutes.

Project 2

Description:

Detecting bad customer reviews with NLP

The Project is on Detecting bad customer reviews of Ecommerce website by using Natural Language Process.

Roles:-

- Analyze the Stake Holders requirements.
- Text pre-processing using **NLTK library**.
- Write quality code while following best practices.
- Interact with Asset class specific subject matter experts to understand their **use cases and implement models** to identify data quality issues

ASSOCIATE SOFTWARE ENGINEER

Bajaj Finserv | Payroll of Linktag Global Pvt.Ltd.

November 2019 - June 2020
