

Harinder Singh Rawat

Senior Backend Developer

Phone: 7657863249

Address: Victoria enclave, Zirakpur, Punjab

Email: hnsingh215@gmail.com

Experience of working in complete software development Life cycle involving requirement analysis design, development, documentation testing, and maintenance. Fine Software Engineering skills in Structured Systems and Object-Oriented approaches. Comfortable in developing front-end and backend. Well-versed in handling client meetings and communications via emails/calls.

EXPERIENCE

Master Infotech Pvt Ltd.

November 2021 to Present

Senior backend Developer

- Creating milestones and tasks of the project and assigning them to the team.
- Creating architecture of software from DB schema to server everything.
- Managing deployment of software on the server.
- Automate tasks through appropriate tools and scripting.
- Writing optimized APIs for software and creating SPAs.
- Managing tasks with daily basis reports and interaction with team lead.
- Creating weekly reports of my task and share with management.

Think 360

September 2021 to November 2021

Senior Backend Developer

- Develop high-quality software design and architecture.
- Managing deployment of software on the server.
- Automate tasks through appropriate tools and scripting.
- Designing APIs for a system with proper DB schema design.
- Design webhooks to communicate with third party softwares.

CBItss Technologies

September 2020 to September 2021

Senior Backend Developer (Team Lead)

- Managing a team of 5-6 developers and delivering projects on time
- Mentored interns on Javascript, Laravel, and CodeIgniter, JQuery.
- Weekly deployment using git by doing merge for all branches of team members.
- System performance improvements by doing query optimizations and coding improvements for other developed systems.
- Modified existing software to correct errors, adapt to new changes, and improve performance.
- Collaborated with other developers to identify and alleviate the number of bugs in the software.
- Analyzed and designed relational databases using MySQL, and PostgreSQL.
- Built databases and table structures and developed applications following MVC Architecture. Built databases and tables.
- Meet with the manager on a weekly basis to provide a detailed project report and milestone updates.

Extreme Labs (Dubai)

December 2019 to July 2019

Senior Backend Developer(Team Lead)

- Creating milestones and tasks of the project and assigning them to the team.
- Creating architecture of software from DB schema to server everything
- Collaborated with other developers to identify and alleviate the number of bugs in the software.
- Analyzed and designed relational databases using MySQL.
- Built databases and table structures and developed applications following MVC Architecture.
- Worked closely with clients to establish problem specifications and system designs. Wrote clean, clear, and well-tested code for various projects.

Brandomax Technologies

June 2016 to November 2019

Senior Backend Developer

- Built databases and table structures and developed applications following MVC Architecture.

- Worked closely with clients to establish problem specifications and system designs. Wrote clean, clear, and well-tested code for various projects.
- Designing APIs for a system with proper DB schema design.
- Analyzed and designed relational databases using MySQL.
- Collaborate with internal teams and clients to fix and improve products.
- Develop high-quality software design and architecture.
- Managing deployment of software on the server.

MediaOnCloud Technologies

November 2014 to May 2016

- Web Developer
- Worked on Backend and frontend Frameworks.
 - Worked on cross platforms for App development.
 - Develop RESTful APIs and integrate them with frontend applications.
 - Designing DB schema and API's under senior authority.
 - Provide daily task report to the seniors.
 - Identify and resolve technical issues and bugs in existing code. Conduct testing and debugging to ensure the functionality of applications. Work closely with senior developers to learn effective debugging techniques.
 - Participate in team meetings, discussions, and code reviews. Collaborate with team members, including designers, frontend developers, and project managers, to understand project requirements and deliver high-quality solutions. Communicate effectively and seek guidance when needed.

Webspin technologies

October 2013 to April 2014

- Jr. Web Developer
- I have gained familiarity with essential web technologies.
 - Worked on Frameworks, CMS and Core PHP.
 - Write clean, efficient, and secure PHP code following best practices and coding standards.
 - Stay updated with the latest PHP frameworks, libraries, and tools.
 - Create and maintain technical documentation, including project specifications, code comments, and user guides

EDUCATION

Punjab Technical University

September 2009 to 2012

B.sc(IT)

CERTIFICATIONS

PHP

2013

- CS Infotech
- Proficient in PHP programming language with a solid foundation in object-oriented programming
 - Extensive knowledge of PHP frameworks such as Laravel and CodeIgniter
 - Experience in database integration using MySQL
 - Familiarity with web development technologies including HTML, CSS, and JavaScript

C Language

2014

- HCL Technologies
- Proficient in C programming language with a strong understanding of syntax, data types, and control structures
 - Experience in developing algorithms and solving complex problems using C
 - Knowledge of memory management and pointers in C
 - Familiarity with file I/O operations and data structures in C

SKILLS

- Good Knowledge of Laravel, CodeIgniter, Slim framework.
- Basic Knowledge of Python and Django framework.
- REST API Development with swagger documentation.
- Good knowledge of PostgreSQL, MySQL, Sqlite.
- Worked on Webhooks and third Party APIs Integration like Facebook, Google, Payment gateways, and others.
- Good understanding of Angular JS.
- Familiar with Version Control GIT and JIRA.

PROJECTS

uwphotochallenge

<https://www.uwphotochallenge.com/>

This Project is based on under water photography, where people can upload there best under water photographs. Later the organizer of this eent will choose winner.

Technology : Core PHP, JQuery

Database : Mysql

Treebilling

<https://treebilling.com>

This billing software is related to manage the accounts of wholesaler, retailer and delivery of pharmaceutical products. Wholesaler and retailer can manage there account, expiries and challans from this portal.

Technology : Laravel, ReactJS

Database : Mysql

DU

<https://www.du.ae/>

This website is related to selling of sims and provide some internet servicws to the users.

Technology : Laravel, VueJS

Database : Mysql

MachinesStore

This software is related to manage the Inventory of dry cleaning machines. Also it can track the location and maintenance of every dry cleaning machine.

Technology : Codeigniter4

Database : Mysql

Cyfersecurity

<https://cyfersecurity.com/>

This website is about to provide software subscription services through Cyfertechn. The frontend is built in React and backend is Laravel8.

Technology : Laravel

Database : Mysql

Billing Application For Recharge and Subscription

Billing application designed to handle time and billing tracking as well as invoicing customers for services and products. In this app, users can manage stock and generate an Invoice of sales. The sales module also developed to maintain all sales.

Technologies : Laravel, Javascript

Database : MySQL

Rentronics

<https://rentronics.co.nz/>

This website is providing households and electronic appliances on rental. This is totally a CMS.

Technologies : Wordpress

Database : MySQL

Alruwad

<https://alruwad.ae/new/your-needs>

This project is about sale properties in dubai. In this a dashboard has been made for the admin and admin can manage multiple roles and and view all listed properties.

Technologies : Core PHP

Database : MySQL

Property Manager

This application is designed to maintain the hotel properties. In this software I use Apaleo platform which is best to handle all these kind of things. This is a third party software which provide some Webhooks to maintain housekeeping, construction and cleaning.

Technologies : Codeigniter, Webhooks, Rest API

Database : MySQL

Ecommerce Platform

This app is designed to fetch all shopify products from shopify app through API's. After fetching all product from shopify app Using laravel user can save these all product to the database and push whole product to another web platform.

Technologies : Laravel, Rest API, Shopify

Database : MySQL

Ebcbrakes

<https://ebcbrakes.com/>

This platform is Woocommerce platform which is used to maintain the inventory and provide all tyres related products to the customers. They provide all maintenance and other services to there customers.

Technologies : Wordpress

Database : MySQL

Project Analysis

This application is specially created to get the all analytics data from google, facebook and tiktok API's. This application purpose is to get all the information related to the marketing, clicks, pageviews and count.

Technologies : Laravel

Third Party API's : Tiktok, Facebook, Google Analytics.

Database : MySQL

LANGUAGES

English (Professional working proficiency), Hindi (Native), Punjabi

INTEREST

Listening Songs, Travelling and reading books
