Objective

Self-motivated and hardworking fresher seeking for an opportunity to work in a challenging environment to prove my coding skills and utilize in growth of organization.

Experience

- KYS INFO SYSTEMS PVT LTD** Nov 2021 - Nov 2022
Application Testing engineering
Create and update test cases for the product / project assigned.
Create Automated Testing Frameworks from Scratch
Create POC for new Testing tools and frameworks
Analyze change requests, customer issues and relevant facts to determine testing estimates and risks.
Perform all tasks per program plans and schedules for implementation.
- Vox TBV india pvt ltd** Nov 2022 - Present
IT executive and web developer
Maintain IT network, servers and security system.
 - To maintain information system and networks, upgrade and install new hardware and software.
 - Conduct network troubleshooting to segregate and identify general network problems.
 - Back up data and manage network security.Writing a test code and implementing the products to website and maintaining the website.
Worked on photoshop,Dreamweaver and illustrator.
Designed the logos, emailer

Education

- Sri venkateshwara vidyanikethan School** 2015
SSLC
81.6
- Concorde Mahesh Pu College** 2017
PUC
70
- Rajarajeswari college of engineering** 2021
Computer science and engineering
8.1

Skills

- Python , Frameworks Django, CSS Bootstrap, PYCHARM, Database
- Java ,core Java 8,SQL,
- OOPS, C++, PHP, My SQL, SQL, CSS, HTML
- Test project: regression, functional performance And manul testing
- Photoshop, Dreamweaver, designing the logo

Projects

- An efficient quality driven of face occlusion detection and recognition

The Application is design using phython , Harscade algorithm .

- **Doctor Appointment System**

Doctor Patient Communication System (DPCS) is an web application which sets up online communication between a doctor and a patient by MySql.

- **Online shopping system**

It is a software which is helpful for the business operate online shop stores ,where owner keeps the records of users and orders. It will have the ability to track orders and available items details, tells user when it's time to order and how much to purchase

Internship

- Avohi infotech

It was a Four months internship program where I was trained in MEAN Stack development and developed a website with angular, Node.js and MongoDB. On fourth week given a project of my own choice to be completed within deadline in MEAN Stack

PROFESSIONAL TRAINING

- 400 hours of Proffessional Traing on Java Full Stack Development From Capgemini CSR through TechnoServe C2TC program
- ICT academy training softskills, MqSq

Publications

- **An efficient quality driven of face occlusion detection and recognition**

Using harscade algorithm it helps to detecting the faces with covering mask, without Mask sunclass. It calculate efficiency of face.
It's published on IEEE in 2021

Interests

- Ethics in Engineering and personal life . Flexible Working. Quick learner. Team work & motivation
