SKILLS

Python	Bash	Jenkins	GitHub	Terraform	Git	GCP	DevOps	Nginx/Apache	AWS	golang	Docker
Kubernetes	MongoDB	SQL	PostgreSQL	IAM	Networking	Puppet	Spinnaker	CI/CD	Logging/Monitoring		

EXPERIENCE

GCP DevOps Engineer

Techolution

10/2022 - Present Remote, IN

- Infrastructure and Deployment Automation using **Cloud Build** and **Jenkins** reduces build time and effort by **50%** and project cycle time by **50%**.
- Optimised the Network performance and security by **65%** by **Cloud VPN, Firewall, Cloud Armor, Load Balancer, Cloud DNS** and that will also help to mitigate **99.9%** risk of **DDOS attack** and handle **500%** more traffic.
- Deploy high performance and scalable solution on **Cloud Run, Cloud Function, Cloud SQL, Kuberflow Pipeline**: Increased stability by **80%**.
- Deployed data and ML pipelines on **Dataflow, Cloud Composer**, and **Vertex AI**. Also, setup **Generative AI** for chatbots and search engine building.

Platform Engineer

iSchoolConnect

02/2022 - 2022 Remote, IN

- I worked with storage services, including but not limited to **GCS**, Data Warehouse BigQuery, **Cloud Spanner**, etc.
- Cloud Tasks** were employed for asynchronous task execution, and **Cloud Functions** and **Pub/Sub** topics were used for communication and trigger services.
- I worked on the platform features, including the **IAM**, the **Cloud SQL Auth Proxy** Service for connecting to private SQL, and the **IAP** for managing resource access for SSH and Web applications, which increased **security** and availability.

Research Intern

PWRForensics

07/2021 - 01/2022 Remote, IN

- Analysis of memory forensics, **ransomware, RAT, Trojan horses**, Virus, and other cyber threats.
- Skillfully using the tools **Ghidra, Burp Suite**, Autopsy, Volatility, and **Wireshark**.
- Created a product and version-specific **bug** report. Making reports, training employees, **communicating** and **documenting**.

CERTIFICATION

Google Cloud Platform Professional Cloud Architect

Google Feb 23 - Feb 25

Google Cloud Platform Cloud Professional Security Engineer

Google Mar 23 - Mar 25

Google Cloud Platform Professional Cloud Network Engineer

Google June 23 - June 25

Amazon Web Service Cloud Practitioner

Amazon Nov 20 - Non 23

PROJECTS

Energy Analytics Solution (Upwork)

03/2023 - 08/2023 Remote

EAS puts businesses in control of energy usage with cost-effective, accurate, real-time data for each site at our fingertips, so we can reduce waste.

- Created **Architecture** and Infrastructure on GCP.
- Setup **BigQuery** to receive **1000 request per second** from IoT gateway.
- Containerised backend, frontend, and deployed on **Cloud Run** behind **load balancer**, which handles **500%** more requests.
- Cloud Armor** attached to the load balancer to prevent DDoS and OWASP Top 10 web attacks.

Automated Testing Solution (Upwork)

02/2023 - 07/2023 Remote

By leveraging the power of Open source TestSigma tool we have created a legacy tool which is an AI-driven SaaS test automation tool that facilitates continuous testing by providing a unified platform.

- I created the GCP architecture and deployed the service on **Kubernetes** by building **Docker** images and pushing them to the **Artefact Registry** with vulnerability scanning. It increases the Performance by 70%.
- Used **Compute Engine** for runners with **VM management, stack driver, observability, cloud logging**, and **monitoring**.

EDUCATION

Bachelor of Technology

Lovely Professional University

2018 - 2022 Punjab, IN

- During my studies, I mastered Programming, Designing languages, Computer Networking, and Cyber & Cloud Security.

GPA

7.5 / 10

AWARDS

Recognized for Hall of Fame listing for identifying critical security flaw in Imperial Cloud and awarded bounty by Bugcrowd for outstanding contributions to cybersecurity.

Recipient of Top Rated Freelancer Badge on Upwork, maintaining a flawless 100% job success rate.

Finalist for innovative creation of a Wireless Switch using advanced electric components in curricular project.
