

Himanshu Bhardwaj

jabalpur, MP, 482004, IN
himanshubhardwajc84jh_bfi@indeedemail.com
6268657327

Dynamic and results-oriented Operations Manager with nine years of experience in effectively managing data acquisition, processing, and business operations. Proven track record of optimizing workflows, enhancing efficiency, and driving business growth. Seeking to leverage expertise in operations management to contribute to the success and growth of a forward-thinking organization.

Personal Details

Date of Birth: 1984-06-04

Eligible to work in: India

Highest Career Level: 5+ years experience

Industry: IT Operations & Helpdesk, KPO, Research, Analytics, Management, Mining & Oil, Project Management, Scientific Research & Development, Strategy, Management Consulting Firms, Technology

Total years of experience: 9

Work Experience

Senior Geophysicist & Project Manager

African Mechanical & Superlift Ltd - Chingola, Copperbelt Province
November 2022 to November 2023

- Led the successful execution of geophysical data acquisition and processing projects in Zambia, surpassing budgetary expectations and ensuring timely delivery; optimized project timelines by 30% through effective coordination and resource management.
- Orchestrated a high-performing team, driving end-to-end planning, delivery, and implementation of innovative analytical solutions that resolved complex mining industry challenges, resulting in a 25% reduction in operational costs and a 15% increase in overall efficiency.
- Achieved significant drilling cost savings of over \$3 million by implementing a predictive model for mineral resources, revolutionizing drilling cost assessments and enhancing investment decision-making.
- Spearheaded groundbreaking location-based data analytics initiatives, resulting in an impressive 20% improvement in project efficiency.
- Innovatively developed and implemented a deep Neuro-fuzzy model for mineralized zone target selection, showcasing a remarkable 60% reduction in manual processing time.

Senior Geophysicist

Datacode Intl. - Nagpur, Maharashtra
September 2022 to October 2022

- Orchestrated collaborative partnerships with clients, identifying unique business needs, and providing tailored software solutions that propelled customer satisfaction by a remarkable 25%, optimizing business outcomes and fostering long-term client relationships.

- Dazzled prospects with compelling product demonstrations, effectively showcasing software capabilities; yielded a remarkable 50% increase in client engagement and an impressive 20% boost in sales conversion rates.

Deputy Manager

Coal India limited - Kolkata, West Bengal

May 2015 to June 2018

- Led operations for geophysical information systems, overseeing the development, implementation, and maintenance of data management systems and ensuring efficient utilization of geospatial technologies.
- Oversaw 5 number of projects from conception to completion within budget and on schedule.
- Established operational strategies, policies, and procedures to streamline workflows, improve data quality, and optimize resource allocation.
- Managed a team of 30 employees, overseeing data acquisition, processing, and business operations.
- Ensured compliance 100% with industry standards, regulations, and data governance policies governing the collection, storage, and use of geophysical data.
- Implemented ISO 27001 ISMS data governance policies resulting in 30 % reduction in data security breaches.
- Served as the Radiation Safety Officer, ensuring compliance with radiation safety regulations and protocols.
- Implemented and enforced safety procedures, resulting in a zero-recordable incident rate during tenure.
- Led initiatives to enhance radiation safety training programs, increasing employee awareness and adherence to safety protocols.
- Negotiated vendor contracts, achieving a 20% reduction in expenses while maintaining service quality.
- Analyzed data and generated reports to drive decision-making processes, contributing to a 30% improvement in key performance indicators.
- Implemented quality control measures, reducing error rates by 35% and ensuring data accuracy and integrity.
- Collaborated with cross-functional teams to identify areas for improvement and implement solutions, leading to a 20% increase in overall business growth.

Assistant Manager & ISO 9001 Nodal Officer

Coal India limited - Kolkata, West Bengal

July 2011 to May 2015

- Managed a team of 15 employees, overseeing day-to-day operations and ensuring efficient workflow.
- Served as the ISO 9001 QMS Nodal Officer, responsible for the implementation and maintenance of the Quality Management System.
- Led the organization's ISO 9001 certification process, ensuring compliance with quality standards and regulatory requirements.
- Conducted quarterly internal ISO audits to assess QMS effectiveness and identify areas for improvement.
- Facilitated semi-annual external audits, ensuring successful compliance with ISO standards and regulatory requirements.
- Implemented process improvements that reduced processing time by 30%, resulting in significant cost savings.
- Facilitated in negotiating vendor contracts, achieving a 15% reduction in expenses while maintaining service quality.
- Analyzed data and generated reports to track performance metrics and identify areas for improvement.

- Provided guidance and support to team members, contributing to a 25% improvement in productivity.

Management Trainee

Coal India limited - Kolkata, West Bengal

July 2010 to July 2011

- Participated in training programs to develop skills in operations management, data acquisition, and processing.
- Assisted in various projects and initiatives, gaining hands-on experience in different aspects of business operations.
- Coordinated with senior management in day-to-day activities and special projects.

Education

Master's degree in Business Administration

Indian Institute of Management Shillong - Shillong, Meghalaya

January 2020 to April 2021

Master's degree in Geophysics

Indian Institute Of Technology (Indian School Of Mines),Dhanbad - Dhanbad, Jharkhand

May 2007 to May 2010

Skills / IT Skills

- Customer service
- Organisational skills
- Communication skills
- Stocking
- Cash handling
- Leadership
- Administrative experience
- Maintenance
- Python
- Data analytics
- R
- Data visualization
- Optimization
- Business analysis
- Business Analytics
- Data science
- Operations management
- Project management
- Lean Six Sigma
- ISO 9001

- Process improvement
- Operational risk management
- Quality management
- Stakeholder Management
- Agile project management (9 years)
- Machine learning (9 years)
- Azure (4 years)
- Power BI (5 years)
- Tableau (5 years)
- PyTorch (3 years)
- Scikit-learn (5 years)
- TensorFlow (5 years)
- Docker
- Kubernetes

Awards / Achievements

Key Achievements

- **Strategic Operations Leadership:** Directed operations for geophysical information systems, overseeing the development, implementation, and maintenance of data management systems. Implemented operational strategies, policies, and procedures, resulting in a 40 % increase in workflow efficiency and a 60 % reduction in data processing time.
- **Project Management Expertise:** Managed 23 geophysical projects from inception to completion, ensuring adherence to project timelines, budgets, and quality standards. Successfully delivered projects, resulting in 25 % increase in client satisfaction ratings and 40 % improvement in overall efficiency.
- **Team Development and Mentorship:** Led and mentored cross-functional teams of geospatial professionals, and geospatial technicians resulting in a 25 % improvement in team productivity and a 10 % reduction in errors. Implemented 4 training programs resulting in a 30 % increase in employee skill proficiency.
- **Budgeting and Cost Benefit Analysis:** Managed project budgets ranging from \$1,00, 000 to \$5,00,000, ensuring optimal allocation of resources and adherence to financial constraints. Conducted cost benefit analyses for proposed initiatives, identifying potential savings and return on investment opportunities.
- **Process Improvement and Automation:** Implemented 8 process improvements and automation initiatives, resulting in a 30 % reduction in operational expenses and a 25 % increase in workflow efficiency. Identified and implemented 5 cost-saving measures, resulting in significant reductions in manual data processing time.
- **Stakeholder Engagement and Collaboration:** Collaborated with 10 stakeholders to define project requirements, scope, and deliverables, resulting in a 30 % increase in client satisfaction ratings and a 40 % improvement in project success rates. Developed strong relationships with internal and external partners, vendors, and regulatory agencies.
- **Compliance and Risk Management:** Ensured 100% compliance with industry standards, regulations, and data governance policies in all projects. Implemented ISO/IEC 27001 ISMS data governance policies, resulting in a 30 % reduction in data security breaches and a 20 % increase in data integrity.

- Health, Safety, and Environment (HSE): Maintained a 100% safety record by implementing rigorous safety protocols and procedures, with a focus on radiation safety, to ensure compliance with regulatory requirements and protect the health and well-being of personnel. Conducted regular safety audits and training sessions, resulting in improved awareness of radiation hazards and a safe working environment.

Certifications and Licenses

Project Management Professional (PMP)

July 2021 to July 2024

The Project Management Professional (PMP) certification is a globally recognized credential awarded by the Project Management Institute (PMI). It demonstrates proficiency in project management principles, practices, and methodologies, validating the holder's ability to lead and manage projects effectively.

Radiation Safety Aspects of Nucleonic Gauges

April 2015 to Present

The certification is a professional credential that demonstrates expertise in radiation safety principles, regulations, and practices, awarded by Bhabha Atomic Research Center (BARC), Mumbai. This certification qualifies individuals to oversee radiation safety programs, ensure compliance with regulatory requirements, and mitigate radiation-related risks in various settings.

Requirements of ISO 9001:2008 Quality Management System (QMS) and ISO 27001:2005 Information Security Management System (ISMS) AND Managing and conducting internal audits against these management systems

April 2012 to Present

- Successfully achieved ISO 9001:2008 QMS and ISO 27001:2005 ISMS certification for Staff Training College, CMPDI, Ranchi, demonstrating compliance with international standards and commitment to excellence in quality and information security management.
- Led the organization through multiple successful surveillance audits and re-certifications, maintaining compliance with ISO 9001:2008 QMS and ISO 27001:2005 ISMS standards.

Big data Engineering with Hadoop & Spark

The Big Data Engineering with Hadoop & Spark certification is a comprehensive program designed to equip professionals with the skills and expertise necessary to architect, build, and manage large-scale data processing systems using Hadoop and Spark technologies. This certification validates proficiency in harnessing the power of distributed computing frameworks to tackle complex data challenges and drive actionable insights for organizations across various industries.

Applied Machine Learning with Python

The Applied Machine Learning using Python certification is a comprehensive program designed to equip professionals with the skills and knowledge required to build and deploy machine learning models using Python. This certification offers practical, hands-on training in applying machine learning algorithms to real-world datasets, enabling participants to extract actionable insights and drive data-driven decision-making.

Optimizing operations: A Practical guide to operations research techniques with python

<https://amzn.eu/d/e9YuqCd>

January 2024

Authored an insightful guide covering fundamental and advanced topics in operations research and optimization methods. Demonstrated the versatility of Python as an accessible programming language, specifically tailored for operations and supply chain analytics. Empowered readers to independently develop Python codes, eliminating the need for external packages such as Gurobi or CPLEX. The book facilitates optimization of business activities, including production planning, supply chain, and network optimization.

Geophysical Information system: A Decision support system or Strategic Information system

<https://www.linkedin.com/pulse/geophysical-information-system-decision-support-himanshu-bhardwaj-boc3f/?trackingId=CHu2ntBUoQmSelvbJyOQBA%3D%3D>

January 2024

The article delves into Geophysical Information Systems (GIS), focusing on components like seismic, magnetic, gravity, and electromagnetic data, alongside processing software and instruments. It highlights popular vendors and emphasizes GIS's role in decision-making processes, suggesting it's more akin to a Decision Support System (DSS) than a Strategic Information System (SIS), though its categorization depends on organizational integration and context. The GIS aids in understanding subsurface conditions crucial for industries like oil, gas, and mineral exploration, underscoring its significance in various sectors for informed decision-making.

Application of Generative AI Technology in Geophysics & Mineral Exploration

<https://www.linkedin.com/pulse/application-generative-ai-technology-geophysics-mineral-bhardwaj-txhzf%3FtrackingId=0c4FzzfF4qczKvSiXG7DUA%253D%253D/?trackingId=0c4FzzfF4qczKvSiXG7DUA%3D%3D>

January 2024

The article explores the application of Generative AI, particularly Variational Autoencoders (VAEs), in geophysics and mineral exploration. It discusses how VAEs are used for tasks like seismic data reconstruction, mineral zone identification from aero-magnetic data, and denoising seismic signals. By leveraging VAEs, researchers can improve data quality, learn meaningful representations, and enhance exploration strategies. The article highlights the versatility of VAEs across various geophysical tasks and emphasizes their potential to revolutionize the understanding of Earth's subsurface properties.

Optimizing Perishable Food Supply Chains: A Python-Powered Journey

<https://hemi1984.medium.com/optimizing-perishable-food-supply-chains-a-python-powered-journey-3ec9dd5d6c79>

January 2024

Explore the intricate world of perishable food supply chain optimization, where every decision influences the freshness and efficiency of deliveries. Delve into a numerical example and discover a Python implementation tackling this complex challenge. From minimizing costs to meeting demand constraints, this article offers insight into leveraging advanced decision-making techniques for effective operations management.

Financial Planning For a Coal Gasification Plant for Blue Hydrogen Production

<https://hemi1984.medium.com/financial-planning-for-a-coal-gasification-plant-for-blue-hydrogen-production-e1f495c22120>

February 2024

In this blog, we delve into the intricacies of financing a coal gasification plant optimized for blue hydrogen production. Exploring cost projections, investment strategies, and ROI analysis, we provide valuable insights for stakeholders in the energy sector. Discover key financial considerations and sustainable investment avenues in the burgeoning blue hydrogen market.
