

Summary:

Having Around 3 years of IT experience in Analysis, Design, Development and Maintenance of various Business applications.

- Strong experience in Ab Initio graph development using GDE, Co>Operating System.
- Experience in designing, developing, executing and maintaining data extraction, transformation, and loading for multiple corporate Operational Data Store, Data warehousing, and Data mart systems.
- Good knowledge in Ab Initio Parallelism and strong knowledge in various Partition components.
- Expertise with various air and m-commands and well reserved with Ab Initio Multi file system.
- Experience in integration of various data sources such as flat files, DB tables etc.
- Good knowledge of ETL and Data warehousing concepts.
- Team player and self-starter, capable of working independently, self-driven and can motivate a team of professionals.
- have good knowledge on Control –Center, TWS (Tivoli work load schedulers) and conduct IT.

Work Experience:

- Worked as an **Associate Developer** in **TransUnion Global Technology**, Chennai from **Aug 2022**.
- Worked as an **Executive** in **GTI Pvt Ltd** Tirupati form **Feb 2020 to Feb 2022**.

Educational Qualifications:

Education Qualification	College Name	Board/University	Percentage	Year of passed out
10 th Class	ZPHS, Menakuru	Board of Secondary Education, A. P	85%	2010-2011
Intermediate	Viswam Junior College	Board of Intermediate Education, A. P	86.3%	2011-2013
B. Tech	Jagan's College of Engineering & Technology	JNTU, Anantapur	68%	2013-2017

Technical Skills:

Operating Systems	:	Windows XP/7/8/10 and Linux
ETL Tools	:	Ab Initio (GDE 4.0.3, Co>Operating System 4.0)
Databases	:	Oracle (SQL)
Other Tools	:	TWS, Control-Center, JIRA

Projects Overview:

Project #1: Brazil Extension (Brazil Credit)

Project	Brazil Credit
Role	ETL Developer
Client	TransUnion

Description: -

TransUnion is an American consumer credit reporting agency. TransUnion collects and aggregates information on over one billion individual consumers in over thirty countries including "200 million files profiling nearly every credit-active consumer in the United States". Its customers include over 65,000 businesses.

TransUnion also markets credit reports and other credit and fraud-protection products directly to consumers. Like all credit reporting agencies, the company is required by U.S. law to provide consumers with one free credit report every year. Additionally, a growing segment of TransUnion's business is its business offerings.

Roles & Responsibilities: -

- Understanding the Mapping documents and Requirements documents of the Business customers.
- Development of Ab Initio Extraction /Transformation /Load (ETL) Process.
- Developed Ab Initio Transformation graphs using transform components and also using different partition techniques available.
- Performed Unit testing and prepared Unit test documents.
- Developed Ab Initio loading graphs which loads data to Oracle.
- Created test cases to make sure the data originating from source is making into target correctly.
- Maintaining the Query tracking sheet to communicate issues/queries to the client on a daily basis.
- Performed Unit testing and prepared Unit test documents. Prepared Touch Point Documents.
- Involved in support of QA & UAT executions.
- Maintaining the Query tracking sheet for Queries/issues to communicate with Onsite coordinators on a daily basis.

Project #2: GTI_CIM

Project	Customer Information Management
Role	Ab Initio Development & L3 Support
Tools Used	Abinitio, Control Centre, JIRA, Unix, Oracle SQL

Roles & Responsibilities: -

- Involved in Design document preparation and requirement calls.
- Developed and modified graphs by using Ab Initio components (Transform, Partition, Data sets etc.) as per the design & mapping documents.
- Perform validations to check whether all the functionalities are met as per the requirement as part of unit testing.
- Created balancing graphs to performed balancing between control and data file before implementing the business rules.
- Created generic graphs and parameter sets for reusability.
- Automating daily comparison results using Ab Initio.
- I have also been part of Code migration activities.
- Attending daily calls with testing team to work on existing defects.
- Attended daily review calls with team on the issues and code reviews.
- All project issues and risks are reported timely to the Project Manager/Product Owner and Effective communication with in the team.
- Scheduling production transitions for new application with production support team after the warranty period.
