

Jayalakshmi.

DevOps Engineer

A result-oriented professional, targeting assignments as **DevOps Engineer** with a reputed **MNC** in IT Industry

Contact No:8073916182 | E-mail:jayalakshmiprakash25@gmail.com

CORE COMPETENCIES

- Production Support
- Troubleshooting
- Application Deployment
- Cross-functional Coordination
- DevOps Implementation
- Project Execution

TECHNICAL SKILLS

- Operating System: Linux, Windows
- Versioning Tools: Git, GitHub,
- Cloud: Amazon Web Services (AWS)

DEVOPS TOOLS

- Git: Version Control System Tool
- Ansible: Configuration Management and Deployment tools
- Jenkins: Continuous Integration tool
- Nagios: Continuous Monitoring tool
- Docker: Containerization tool
- Kubernetes
- Terraform
- AWS

EDUCATION

Engg/Degree: - B.Tech in Information

PROFESSIONAL SUMMARY

- Performance-driven professional with nearly **6 years** 6 months of rich & extensive experience in Software Development, Requirement Gathering and Cross-functional Coordination
- Mastery in DevOps tools like **Git, Jenkins, Ansible, Nagios, Docker, Kubernetes & Terraform**
- Deep understanding and hands on experience with formal delivery methodologies like **Agile**, code versioning tool **GIT**
- Efficient **organizer, motivator, team player and a decisive leader** with the skills to motivate teams to excel and win
- Generate report and send an email to managers about status of daily builds and weekly builds.
- Writing shell scripts to automate manual and repetitive tasks. Responsible for modifying and tuning existing scripts.
- Experience on AWS services like EC2, VPC, S3, code pipeline, code commit and deploy, CloudWatch, cloudtrail, cloud formation.
- Installed and worked on Docker and Container based technologies Docker Swarm and Kubernetes
- Worked on Ansible. I have written playbooks to deploy builds to multiple servers.
- I manage configurations of servers using ansible playbooks

WORK EXPERIENCE

2016-12 to till date with Mouser Electronics, Bangalore

DevOps Engineer

Role:

- Responsible for setting up Jenkins pipeline and taking entire setup from build to prod deployment.
- Responsible for releases, doing builds and managing build system

Science from Srirevana Siddeshwara
Institute of Technology Bangalore - 2008
PUC/Diploma: - Govt Polytechnical
Chintamani - 2004
10th/ SSLC: - Sumuka Vidya Samsthe, H-
cross - 1999

SOFT SKILLS

- Analytical
- Problem Solving
- Teamwork
- Communication
- Adaptability
- Openshift

Projects

Project Description: provides software to various applications of banking This Network will let various users of the bank and their employees connect to the main Server. The objective only authorized user to access Network including all servers and network devices.

Environments: **LINUX, AWS, Ansible, Jenkins, Bash, Shell scripts, GIT, GitHub ,Maven, Docker, Kubernetes, Nagios, SonarQube, Apache Tomcat,Artifactory**

PERSONAL DETAILS

Date of Birth: 19th Sep 1984

Languages Known: English, Kannada, Hindi

Pan: CNXPJ2548C

Location: Bengaluru, Karnataka

- Responsible for creating branches, merging and resolving merging conflicts.
- Writing shell scripts to automate manual and repetitive tasks. Responsible for modifying and tuning existing scripts.
- Experience on AWS services like EC2, VPC, S3, code pipeline, code commit and deploy, cloudwatch, cloudtrial, lambda.
- Installed and worked on Docker and Container based technologies Docker Swarm and Kubernetes
- Worked on Ansible. I have written playbooks to deploy builds to multiple servers.
- I manage configurations of servers using ansible playbooks
- Implement and maintain continuous build and deployment mechanisms.
- Managing build infrastructures environment setups and monitoring daily operations in Jenkins and enhancing/troubleshoot issues/problems.
- Identifying and driving automation of tasks associated with continuous integration and release process
- Enough understanding to debug or specify major component areas where major bugs or build failures occur.
- Experience in configuration management and release engineering in multiple-branches environment.
- Giving knowledge to developers about version control and build/release concepts
- Worked closely with application developers to devise robust deployment, operating, monitoring, reporting for the applications
- Participated in the release cycle of the product which involves environments like Development QA, UAT.
- Used GIT for branching, tagging, and merging
- Taking Care of Patch and Load build Requests from Development Team
- Helping developer's issues that are related to version control.
- Generate report and send an email to managers about status of daily builds and weekly builds.
- Documenting SCM guide and responsible for maintaining it.
- Proven Track record in meeting the goals and delivering the deliverables within deadlines without slippages
