I am a passionate IT professional with 2.5+ years of experience as a java developer focused on spring framework, various databases, responsive front-end languages, and best code practices. My objective is to learn different skills and technologies and excel in them while contributing to the firm's progress to have promising growth for both the company and me.

Professional Experience

Siemens Digital Industries Software (External from Connecticut Technologies) July 2022 - December 2023
Java Developer

Product: Polarion

- Worked on rendering of comments and replies and replies of comments in tree view as well as flat view for work items.
- Worked on shortcuts of ordered and unordered lists for the description of work items.
- Developed Rest APIs using JAX-RS API with JERSEY implementation and used swagger UI API platform.
- Written platform unit test cases for Rest Endpoints.
- Fixed critical stability defects in frontend as well as in backend.
- Worked on writing end-to-end JUnit and Selenium tests for various scenarios.
- Given on-time delivery for blocker defects related to shutdown.bat files. Also got client appreciation for the same.

Tech Stack: Java8, Spring Boot, Rest API, Kafka, Gitlab, Git, Selenium web driver, Junit, MicroServices, Hibernate, ReactJS, Mockito

Tata Consultancy Services July 2021 - July 2022 Assistant System Engineer

Client: Bank Of Maharashtra

- Hands-on experience patching Linux and AIX servers.
- Improved code quality of existing services by doing code enhancement with Java8, Hibernate, Kafka, and map structs.
- Improvised the code coverage of existing services with Junit and Mockito by 90 percent.
- Enhancement of Java application developed with Spring Hibernate and Java8.
- Hands-on experience in working in the Banking domain.

Projects

Truym Restaurant October 2021

- Created an online restaurant where you can order food.
- Used Spring REST & Microservices to develop the backend
