Skills Profile:

Languages	: Core java
Operating System	: Windows Family
Testing Concepts	: STLC, Testing Levels, Testing Types, Test Management
Tools	: Selenium WebDriver and TestNG Defect
Tracking Tools	: Bugzilla and JIRA
RDBMS	: SQL
Exposure on Tools	: Log4j , Ant, Maven and Jenkins

Project Experience

Diagnostic: At Aiprus

Role : Test Engineer

Tools : Manual Test

ing

Description

The hospital test application is a digital platform designed to simplify and optimize the process of scheduling and managing medical tests for patients. It features a user-friendly interface for easy appointment booking, automated reminders to reduce missed appointments, and secure access to test results. Healthcare professionals can efficiently manage test schedules, leading to improved resource allocation and reduced waiting times. The application aims to enhance overall patient satisfaction, streamline healthcare services, and adhere to strict security and privacy standards to protect sensitive medical information. **CMS Application** used by Diagnostic (CMS system provides us with the functionality to Maintain a hole system of Diagnostic).

Mobile App used by Diagnostic (POS system provides us with the functionality to book test from customers and a lot of many more Functionality).

NeoMeta: At Aiprus

Role : Test Engineer

Tools : Manual Testing

Description:

The NeoMeta Application is a user-friendly mobile app revolutionizing clothing shopping. It offers a vast collection of stylish clothing from top brands, featuring personalized recommendations, virtual try-on, and a seamless shopping experience with secure payments and fast delivery. Users can easily browse, filter, and make informed decisions with reviews. The app also keeps users updated on the latest fashion trends through curated collections and exclusive sales notifications, making it a convenient one-stop destination for effortless and enjoyable clothing shopping.

Intranet- At Aiprus :

Role : Test Engineer

Tools : Manual Testing

Description

Intranet project involves the development of an Intranet-based Human Resource Management System (HRMS). This comprehensive system aims to streamline and enhance various HR functions within the organization, providing a centralized platform for managing employee information, payroll, attendance, leave, and other HR-related processes. The Intranet-based HRMS will foster efficient communication, data accuracy, and process automation, ultimately contributing to a more organized and productive work environment.

Veena organics - At Aiprus :

Role : Test Engineer

Tools : Manual Testing

Description

Veena organics delivery App project involves the development of a cutting-edge E-commerce Grocery Delivery Application. This mobile application is designed to provide users with a seamless and convenient way to purchase groceries online and have them delivered to their doorstep. With a user-friendly interface and a robust backend, the app aims to transform the grocery shopping experience by combining a vast product selection, secure payment options, and efficient delivery services.

HRMS – Naresh I technology

Role : Test Engineer

Tools : Automation Testing

Description:

HRMS comes as a comprehensive solution for the efficient management and development of your Human Resource. It will assist you in the complex and strategic process of managing this crucial resource of your enterprise. Based on modular architecture, it facilitates a vast range of HR activities, with features that reflect the main HR management activities.
