

K Saikumar

AWS-DevOps Engineer

saikumar07101996@gmail.com | +91 9030422466

Professional Summary

Having experience of 3+ years in IT industry experience in **System Administrator** & **AWS-DevOps** Engineering automating, building, deploying and releasing code from one environment to another environment.

- ✓ Experienced in working on **DevOps/Agile** operations process and tools area (Code review, Environment, Service, **Incident** and **Change Management**).
- ✓ Experience in working on source controller tools like **GIT**.
- ✓ Having good Experience in DevOps tools like **Ansible** for deployment.
- ✓ Exposed to all aspects of the software development lifecycle (SDLC) such as Analysis, Planning, and Developing, Testing, and Implementing Post-production analysis of the projects.
- ✓ Experience working on several **Docker** components like **Docker** Engine, Hub, Machine, creating **Docker** images, Compose, **Docker** Registry and handling multiple images primarily for middleware installations and domain configurations.
- ✓ Experience in Implementing Continuous Delivery pipeline with **Docker**, **Kubernetes**, **Jenkins**, and **AWS**.
- ✓ Proficient with cloud services like Amazon Web Services. Experience in running web-scale services on **Amazon Web Services**.
- ✓ Having good Experience in **Ansible** for Deployment on Multiple platforms.
- ✓ Strong knowledge of source controller concepts like Branches, Merges, and Tags. Proficient in tracing complex build problems, release issues, and environmental issues in a multi-component environment.
- ✓ Understanding the client environment, Administrating and creating solutions using AWS services, **CI/CD**, **GIT**, Experience with Amazon Web services Creating, configuring and Managing EC2, IAM, services across AWS Zone.
- ✓ Environment provisioning solutions using **Ansible**, **Docker**, **Vagrant**.
- ✓ Hands-on expertise to setup, configure continuous build processes using Jenkins, Maven, Git.
- ✓ Automated Deployment to all environments (Dev, QA Test, Demo, Performance Test, and Staging/UAT).
- ✓ Versioning and Artifactory Repository Management. Keeping track of all builds and versioning the builds for the backup strategy.
- ✓ Familiar with **Software Development Life Cycle** (SDLC) processes.
- ✓ Good experience on Infrastructure automation using **Ansible playbooks**.
- ✓ Worked on **Terraform** configurations for AWS resources provisioning and have done automations using the TF scripts.
- ✓ Worked with Jenkins under the **CI/CD** pipeline providing continuous improvement to agile software development teams.
- ✓ Played a key role in automating the deployments on AWS using GitHub, Jenkins, Ansible and **Terraform**.
- ✓ Extensively worked on **Jenkins** for continuous integration and for End to End automation for all build and deployments.
- ✓ Strong Experience in Amazon EC2 setting up instances, VPCs, and security groups.
- ✓ Excelled on creating **AMI** (AWS Machine Images) that utilizes **ELB** (Elastic Load Balancer) and Auto Scaling.
- ✓ Utilized **Cloud Watch** to monitor resources such as **EC2**, **CPU** memory, **AMAZON RDS DB** services and **EBS** volumes; to set alarms for notification or automated actions; and to monitor logs for better understanding and operation of the system.
- ✓ Automated Start/Stop of non-prod instances to reduce cost.
- ✓ Experience in using bug tracking tools like **ServiceNow**, **REMEDY** and **Jira**.
- ✓ Supporting QA during testing, and oversight during Implementation into production.

Work Experience Summary

Period	Employer Name	Position
DEC 2019– Dec 2022	Cognizant	Associate Consultant
JAN 2023- Apr 2023	Cognyte	Global system integration engineer

Technical Skills

Operating Systems	Red hat Linux 6.x/7.x, CentOS and Windows
Cloud Technologies	AWS
Code Version controls	GIT and GITHUB
CI Tools	Jenkins
Deployment Tools	ANSIBLE
Container & container Orchestration Tools	VMWare, Docker, EC2 Container Services, Docker Container Services, Kubernetes.
Repositories	Nexus
Backup/Recovery	Tar, Dump
Job Scheduling Tools	CRON, AT
App/Web Servers	Apache Tomcat 7.x and JBoss7.x
Monitoring Systems	Nagios, Cloud Watch
Languages	Basic Python
Tracking tools	Jira, ServiceNow
Databases	My SQL and MongoDB

Professional Experience

Client#1	CenturyLink, USA
Project	Appointment Scheduler
Environment	AWS (EC2, S3, ELB, Elastic File system, RDS, VPC, Route53, Security Groups, CloudWatch, CloudTrail, IAM, SNS), GitHub, Jenkins, Maven, Ansible, Apache Tomcat,
Period	JAN 2022 – Till date
Role	Associate Consultant

Job Responsibilities:

- ✓ Involved in build and maintain Highly Available secure multi-zone **AWS** cloud infrastructure utilizing **Ansible** with **AWS Cloud Formation** and **Jenkins** for continuous integration.
- ✓ Hands on experience in creating and configuring AWS resources like S3, EC2 and configurations in different AWS regions using **Terraform v0.11.11**.
- ✓ Used AWS, Creating, Importing and launching volumes, **EC2**, security groups, auto-scaling, load balancers (**ELBs**).
- ✓ Hands-on experience in setting up **Master-Slave configuration** in Jenkins

- ✓ Worked on **Jenkins** for continuous integration and **End to End** Automation for all build and deployments
- ✓ Worked on **Jenkins pipeline** creation using Jenkins file and automated build and deployment using **declarative pipeline script**.
- ✓ Worked with Terraform to create **AWS** components like **EC2, IAM, Kinesis Firehose, ELB, Security groups, S3** buckets.
- ✓ Designing and implementing CI (**Continuous Integration**) (CI) system: configuring Jenkins servers, Jenkins nodes, creating required scripts, and creating/configuring VMs (**Linux**).
- ✓ Experience in AWS provisioning by creating EC2 Instances and configuring all necessary services like Security, EBS, and S3.
- ✓ Troubleshooting Continuous integration and automated deployment and management using Jenkins, Maven, Docker, or comparable tools.
- ✓ Handling all phases of Build activities.
- ✓ Wrote custom monitoring and integrated monitoring methods into deployment processes to develop self-healing solutions.
- ✓ Writing groovy scripts for **Jenkins's pipeline jobs**.
- ✓ Install and configure Nginx and Apache webserver.
- ✓ Writing the Dockerfile based on the Application perspective.
- ✓ Configuring Docker private Registry and build the Images using Jenkins and push them to the registry.
- ✓ Design & implemented **VPC** service for the extension of customer's on-premises datacentre with **AWS** Cloud using **AWS VPC** and **VPN & Direct connect** services.
- ✓ Implemented and maintained **Ansible** Configuration management spanning several environments in **VMware** and the **AWS** cloud.
- ✓ Setup/Managing VPC, Subnets make the connection between different zones.
- ✓ Launching Amazon **EC2** Cloud Instances using Amazon Images (Linux/Ubuntu) and Configuring launched instances to specific applications.
- ✓ Experience in Creating secured cloud infra using (**VPC**) for the Staging and Development environment on **AWS**.
- ✓ Written **Ansible** playbooks, recipes to automate the installation of Middleware Infrastructure like **Apache Tomcat, JDK** and configuration tasks for new environments, etc.
- ✓ Experience working on several **Docker** components like **Docker** Engine, Hub, Machine, Compose and **Docker** Registry.
- ✓ Experience working on **Docker** hub, creating **Docker** images and handling multiple images primarily for middleware installations and domain configurations.
- ✓ Experienced with the AWS Cloud platform and its features, which include **EC2, S3, ELB, Route 53, VPC, EBS, AMI, SNS, RDS, and Cloud Watch**.
- ✓ Setting up databases in AWS using RDS, storage using S3 buckets and configuring instance backups to S3 bucket.

Client#2	CenturyLink, USA
Project	QIAMS (Qwest Infrastructure Application and Middleware Support)
Environment	RHEL 7 and Windows Server 2008 R2 and 2012 R2
Period	Dec 2019 - Sep 2021
Role	Associate Consultant

Job Responsibilities:

- ✓ Providing the support in L2 level depending on the priority of the issues to meet client
- ✓ Performing Application releases like pushing new code into production servers.
- ✓ Creating the tickets as per application issue which we are taking care as per priority level defined in SLA's

- ✓ Fetching data using SQL queries.
- ✓ Creates and maintains a partnership with development teams to build application monitoring and alarming.
- ✓ Responding to Client emails with accurate information.
- ✓ Setting Sentry and SiteScope Monitoring tools to maintain application availability.
- ✓ Coordinates OS and Application server software issues with the ESP/Unix/FOSS teams.
- ✓ Coordinates Oracle issues with the production DBA.

Education Qualification

- ✓ B. Tech (MECH) – from JNTUA in the year 2018

Personal Details

Date of Birth	10-07-1996
Languages Known	English & Telugu
Marital Status	Single
Nationality	Indian
Mobile	+91 9030422466
Address	C camp, Kurnool – 518002.
