CAREER OBJECTIVE: -

To prove myself as Database Administrator in a progressive managed organization that gives me scope to apply my knowledge, skills. I would like to be with team, which dynamically works towards success and growth of the organization and achieve the set goals.

PROFESSIONAL SUMMARY: -

- A dynamic professional with 3+ years of experience in PostgreSQL DB on Linux/Unix and Windows on premise and on cloud RDS Platform respectively.
- Experience in PostgreSQL Installation 10,11,12, and 13 Production support.
- Experience in PostgreSQL Installation and Configuration, Database Backup and Recovery.
- Performance Tuning, User maintenance, Table spaces management, Hot Standby and Replication, and Upgradation.
- Experience in logical backup at schema level, table level.
- Experience in AWS RDS PostgreSQL,
- Knowledge in AWS, EC2, S3, Cloud Watch, SNS.
- Experience in Installation and creating Hot Streaming Replication (Master and Slave).
- Proficient in PostgreSQL DBA activities including configuration settings, database index creation and maintained and Query optimization.
- Experienced in Backup & Recovery using PG_DUMP and PG_DUMPALL, setting up WAL archiving, Point in time recovery.
- Experience in VACUUM and REINDEX in Production Database for Maintenance Activities.
- Implementing and maintaining database security
- Monitoring the production PostgreSQL alert logs for database errors.
- Installing and monitoring of pg-Badger for Report and Log-Analyzer purpose.
- Ability to function as a team player and alternatively work independently to achieve the objectives.

Technical Competencies

Database	Postgresql 10.x/11x,12x/13x
Operating System	Red Hat LINUX 8.x/9.x,IBM AIX
Tools	PG-Admin, PG-Badger,Pg Watch2
Scripting	Shell Script
Server Tools	Putty, Winscp. Win-rar

PROJECT DETAILS: -

Client	IMS
Duration	july-2022 – Aug-2023
Operating System	LINUX, RHEL and WINDOWS
RDBMS	PostgreSQL 11,13,RDS,Aurora
Role & Responsibility:	

- Experience in VACUUM and REINDEX in Production Database for Maintenance Activities.
- Configure and manage pgpool and pgbouncer to Load-balancing and Automatic Failover in community Version's.
 - Configuration of pg-badger tool to analyze the log-file and generate the html report.
- Taking physical backup using the pg_basebackup tool.
- Extensively worked on Active-Active and Active-Passive Clustering.
- Install and Configure Backup and Recovery Tool (BART) and configure Prod and Testing Server.
- Exposure in Backup and Recovery Methods in Postgresql Server using Tools and Scripts.
- Configure and Manage Pg-pool to Load-balancing and Automatic Failover in community Version's
- Monitor the Disk space and Database growth more than 10 Servers.
- Creating index and monitoring index using Explain Plan to make better Performance of Queries
- Monitor and manage Replication lag in Slave Environment.
- Worked on upgrades in production and testing environment.
- Responsible for DB availability, security and reliability
- Generating PG badger report for identifying potential issues.
- 24 X 7 Production Database on Call Support

Client	Wall greens
Duration	Dec-2019 TO 23-oct-2021
Operating System	LINUX, RHEL
RDBMS	PostgreSQL 9.6, 10
Role & Responsibility :	
• Proficiency and expertise in Postgresql Replication, Backup/Recovery, and Security Management. • Minor version Up-gradation of database . • Install & configure development PostgreSQL databases on Red-Hat Linux servers/Fedora. • Worked on Replication and Log shipping for Postgresql Server High Availability • Troubleshoot performance problems, fine-tuning of databases and index Analysis. • install customized extensions like Pg_stat_statement • Knowledge in Application Performance Tuning and Database Design. • Handling Memory configurations for database servers. • Backup and Point in time recovery in PostgreSQL. • EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance improvements. • Monitoring the production PostgreSQL alert logs for database errors. • Check Log errors and make necessary actions to rectify them. • Prepare weekly and monthly reports on database health check and growth. • Creating Database Links using FDW from Testing to Production databases. • Monitoring the database for Index, partitioning Memory and I/O utilization.	

EDUCATIONAL SUMMARY

B.SC Electronics From Krishna University, Machilipatnam.
