Project History

1. Project Prime Day (2020/2021)

Description: The Amazon Prime Day sale is a two-day annual sale event that takes place exclusively on the Amazon website and app. The event sees prices slashed across all categories like TVs, laptops, mobiles, accessories, audio products and more.

Role: Worked in End-to-End Testing for Prime Day for worldwide marketplaces

2. Project BlackFriday&CyberMonday (2019/2020/2021)

Description: Amazon Black Friday week, users enjoy the best deals every day. These are promotions on Amazon Devices, Computers and Computing, Books, eBooks, Electronics, Video Games, Kitchen Products, Toys, Fashion, Tools and Construction, Routine Products, Food, Beverage, Baby Products, Pet Shop, Musical Instruments and more items at the best prices

Description: Amazon Cyber Monday is an event for users to take advantage of the last day of Black Friday deals. At Cyber Monday, users can find promotions on Amazon Devices, Computers and Computers, Books, eBooks, Electronics, Video Games, Kitchen Products, Toys, Fashion, Tools and Construction, Routine Products, Food, Beverages, Baby Products, Pet Shop, Musical Instruments and more items at the best prices.

Role: Worked in End-to-End Testing on BlackFriday&CyberMonday for worldwide marketplaces.

3. Project Seller Central scheduling app

Description: This application allows the seller to schedule the product price (update/edit/delete) and for every modification seller will be notified via email. This app has been launched for worldwide marketplaces.

Role: Worked in End-to-End Testing for five major marketplaces using Backend Tool.

4. Project Penny

Description: This application is related to amazon pharmacy being introduced in US Locale. Customers can order Medications from amazon pharmacies and it also allows customers to check if this medication is available in other tie up pharmacies. It sorts out the pharmacies based on Pincode provided and distance . So that customer can avail services where he can check if medication is available in other stores and can compare prices with Amazon pharmacy and other stores

Role: I am the sole owner from QSA for this project and involved in amazon pharmacy page verification and involved in Test case Optimisation for regression Testing. I have also worked on Backend Third party Tool to compare if prices are reflected Correctly.

5. Prime launch in Poland

Description: Launching the Amazon prime membership program on Poland marketplace. Poland Prime members have access to a unique combination of the best of shopping and entertainment from Amazon, including fast and free delivery, as fast as next day, with no minimum order value, access to popular and award-winning movies and TV shows, including Amazon Originals, free video games and in-game content with Prime Gaming, and access to Prime member exclusive deals throughout the year.

Role: Worked in End-to-End Testing for PL marketplace which involves Acquisition, Retention and payment related usecases and covers entire Requirements of BRD.

6. Project MADA

Description: In SA Locale customers are using MADA cards for placing orders before. Now we have introduced Prime sign ups using MADA Card where we need to provide authentication for every transaction to make it secure.

Role: I owned this project and have been involved in End -to End project & Launch Testing

7. Project cafe

Description: In US Locale , Whenever customer wants to cancel membership we offer 3page cancellation page and with cafe we introduced 2-page cancellation flow. In first page we show marketing and offer switching related content and 2nd page has cancellation and Refund related content

Role: I owned this project solely and have been involved in End -to End project & Launch Testing.

Roles and Responsibilities

- To read and understand the software BRD document and interact with Stakeholders.
- Involved in automation feasibility study of test cases in each Sprint.
- Test case creation, Test Scripts, review and execution. Used
