

EXPERIENCES

System Analyst | Xencia Technologies Pvt. Ltd.

Sep 2023 - Present

- Collaborated with existing team and discussed on various skills and technologies.
- Worked on enhancing present skills and tech stacks to implement on the ongoing projects.
- Skilled in team collaboration , proficiently working with fellow developers to achieve shared project goals.

Software Engineer Internship | Unmaada Creatives LLP

Dec 2022 - July 2023

- Developed skills to collaborate in a team and work as a single unit.
- Played a great role in team development and expanding team with tech stack.
- Worked on the development of a food delivery project called "HOKITCH".
- Implemented logics to generate different reports by analyzing the existing data.

Full-Stack Development Training | Kodnest Technologies Pvt. Ltd.

Aug 2022 - Dec 2022

- Strong proficiency in java programming language and Database.
- Good understanding of OOP's concepts, Testing API and documentation.
- Familiarity with front -end technologies such as HTML, CSS, Bootstrap, Java Script and React.
- Developed and maintained Java base Application.

PROJECTS

Rental System Web Application.

Java, Spring boot, REST APIs, MySQL, HTML, CSS , and Java Script

- Implemented secure account creation and login functionality for tenants
- Developed easy and simple way for storing tenant details.
- Developed owner dashboard for efficient property management, including listing management, and tenant details view.
- Enabled property owners to easily update profiles, including contact and property details.

Employee Management System.

Java , ReactJs, Spring boot, REST APIs, MySQL, Postman API testing.

- Developed and integrated a feature enabling users to seamlessly create new records in the Employee Management System.
- Created efficient data retrieval features for accurate information display.
- Designed capabilities for users to modify and update records, enhancing data flexibility.
- Implemented secure deletion for users to remove records while ensuring data integrity.

Predicted Titanic passengers' survival likelihood using machine learning.

Jupyter notebook, flask, Python, Data visualization, flask, Machine Learning.

- Researched and collected data sets of data centers.
- Designed and implemented a ML solution to analyze and forecast survival probabilities for passengers based on relevant features.
- Conducted thorough data analysis, exploring and preparing the dataset for model training.
- Used ML, Python and its packages like NumPy, seaborn, pandas, Matplotlib for displaying the results.

SKILLS

- C
- Java
- Python
- Java Script
- Spring boot
- HTML
- CSS
- Bootstrap
- JQuery
- React
- SQL Server
- Data Structures & Algorithms
- REST APIs
- Git & GitHub
- Unix

EDUCATION

B.E Computer Science & Engineering Sambhram Institute of Technology Bangalore	7.6 CGPA	6/2018 - 6/2022
12th Bihar School Examination Board Qazi Ahmad Inter College	53%	2017
10th Bihar School Examination Board Vidyapati High School	70%	2015

CERTIFICATIONS

- Certified Full Stack Developer from KodNest.
- Certified Python programming by Kaggle.com.
