Technical Skills

Environment Worked	:	Windows 2000/XP/Win7
Programming Languages	:	C, HTML, Java, PHP, JavaScript
Database	:	SQL, MS-Access
Mobile Testing	:	Android, Iphone, Windows

PROFESSIONAL EXPERIENCE:

WORKED IN HARTRON, Sector 17, Chandigarh As Junior Programmer

- Assisted in the development and maintenance of data and process models.
- Assisted in the development of work plans and project organization.
- Designed, developed and optimized applications in a Microsoft based development environment under the direction of senior programmers.
- Maintained, tuning and repairing applications to keep them performing according to technical and functional specifications; providing user support.
- Met programming standards by following production, productivity, quality, and customer-service standards.
- Provided documentation of development, project progress, analysis, recommendations, individually and by actively participating in development process.

WORKED FOR KAPOOR ADVERTISERS as Web Developer

- Manually tested web based application.
- Prepared and executed test cases. Developed RTM for traceability
- Identify, analyze and document problems with program function, output, online screen or content
- Performed functional testing on the application to ensure components works as per the requirement
- Performed component Integration test to ensure that the dataflow between two or more components is happening properly
- Executed and updated test cases in Quality Center
- Provided usability recommendations to development team in order to make application more user friendly
- Logged defects, maintained test cases, test scripts and reports in Quality Center
- Communicated with clients to ensure functional requirements met.
- Tested developed websites prior to rollouts for usability and functionality.
- Approached website testing from a user perspective.

- Documented all issues with links and made recommendations for changes.
- Analyzed issues and provided feedback to development team.
- Maintained websites.

WORKED as Software Tester in Ace Creative Web tech Private Limited , New Delhi

Reviewed Business Requirements, Functional Specifications , and System Design Documents for a web-based application. Attended project design meetings to understand the impact of the changes being developed.

- Worked with Users and Business Analysts to define and design test scenarios and test data.
- Prepared and execute application test plans, test cases, and test scripts. Created, maintained, and executed manual test scripts in Quality Center. Maintained Requirement Traceability Matrix (RTM) after developing and updating the test cases.
- Analyzed and identified defects, and logged defects with detailed specification into Quality Center as they relate to Test Cases.
- Performed System, Regression, Transaction, Cross Browser, Sanity, Smoke, and Ad-hoc testing. Conducted Integration testing to test the functionality of different modules.
- Supported Senior Performance Engineer; created virtual users for critical business functions using LoadRunner. Helped identify test scenarios for Stress, Volume and Soak testing.
- Analyzed test results to ensure existing functionality and recommended corrective action.
- Wrote SQL queries to test data.

Tested word press and shopify etc web-based applications

- Studied business requirements and technical specifications to create test strategy
- Created and executed test cases by application components on Android and iOS devices, PC
- Created, executed and maintained test cases including smoke, sanity testing, regression testing, functional testing and integration testing

- Performed cross-browser compatibility testing using IE, Firefox, Chrome and Safari
- Participated in regular project team meetings to discuss testing procedures and resolve issues
- Communicated with QA team members and developers to resolve testing issues
- Documented workflow and reported to upper management on a bi-weekly basis during meetings.
- Stressed importance of introducing Agility to the work environments in small to medium-size projects that I was put directly in charge of.
- Meetings with developers for the better quality of the product.
- Took part in daily Scrum meetings
- Performed functional testing for exploratory testing in the admin module.
- Client Interaction for gathering new requirement and updated them with the status of the sprint.
- Use of Jira for test management and defect management

Working on Contractual Basis for Emerald Finance and Limited till date involved in testing of banking software

- Strong understanding of banking website functionality requirements
- Integrate various third party API's
- Provides excellent testing and feedback regarding issues
- Strong documentation skills and excellent written communication abilities
- Understands the need for appropriately efficient and informative web sites
- Has strong knowledge of user-friendly workability
- Very analytical and detail-oriented
- Managing team of developers located at other locations.
