Experience

Spring Boot Developer

08/2021 to Current

Accenture (Client - National Australian Bank)

Bengaluru, India

- Implemented REST-based Microservices using Spring Boot, achieving a 25% reduction in average response time compared to the monolithic system.
- Applied Spring Core for Inversion of Control (IoC) with Dependency Injection (DI) in the development of Restful web services. This implementation resulted in a 20% reduction in codebase complexity and a 15% improvement in unit test coverage.
- Engineered and delivered Java modules using Spring Boot to implement intricate business rules and workflows. This initiative led to a 30% reduction in processing time for critical business transactions, resulting in a 20% enhancement in overall system efficiency.
- Developed various new features, delivering a code with a code coverage of 80%. This resulted in a 25% reduction in the average resolution time for reported issues.
- Engaged in daily bug triages and actively participated in the resolution of critical software bugs in collaboration with team members. Achieved a 20% decrease in the average time taken to address reported issues.
- Led the creation of a comprehensive testing suite, achieving a test coverage of 80%. Conducted integration tests, successfully identifying and resolving 30% of integration-related issues, resulting in a smoother deployment process.
- Created optimized graphic websites and application Interfaces using HTML5, CSS3 and JavaScript.
- Proficient in using AWS (Amazon Web Services) like EC2, VPC, Cloud Watch and Code whisperer.
- Regularly generated and managed 50 sets of diverse test data using SOAP UI. This effort helped in a 15% reduction in the average time required to execute test scenarios, enhancing overall testing efficiency.

Software Developer Intern

02/2021 to 07/2021

Accenture

Bengaluru, India

- Invested hours in self-directed learning and understanding technologies crucial for the project. Successfully applied this knowledge to contribute to the completion of project milestones ahead of schedule.
- Analyzed and documented software requirements, creating 10 detailed flowcharts and layouts for system components. This visual representation improved team understanding, resulting in a 30% reduction in the time spent on requirement clarification.
- Tested code for bugs or technical issues, debugging to fix errors and boost performance. This effort contributed to a 22% reduction in post-release bug reports from users.
- Crafted a suite of responsive HTML templates, JavaScript files, and CSS styles for the UI module, resulting in a 20% increase in overall system performance.

Skills

- | | |
|------------------------------|---------|
| • Java/C/C++/Python | • SQL |
| • Spring/Spring Boot | • AWS |
| • HTML/CSS/JavaScript/NodeJS | • JUnit |

Education

Bachelor of Engineering in Computer Science

Bengaluru, Karnataka

Tools

- | | |
|----------------|-------------------|
| • IntelliJ IDE | • Jenkins/Harness |
| • Postman | • Docker |
| • Rally | • Soap UI |
| • Git | • Postgres |
