SKILLS

- SQL
- Snowflake
- ETL / ETL Testing
- PowerBI
- Jira
- Streamset
- Java
- Automation
- Git
- Alteryx
- Data analysis

EDUCATION

2020

Bachelor of Engineering Computer Engineering

VP's Kamalnayan bajaj institute of Engineering, Baramati, MH

CERTIFICATIONS

- SQL For Data Science : An online certification course; SQL for data science from University of California, Davis Coursera
- Snowflake - The Complete Masterclass : An online certification course to master Snowflake & cloud data warehouse from the ground up

PROJECTS

Insurance project for below lines of business

- Property
- Professional Liability
- Finance Horizontal
- Orchestration/Automation

A dedicated and skilled software engineer specializing in ETL processes within the insurance domain with expertise in the area of ETL Testing, Data warehouse testing, ETL Development, Power BI Testing, Data analysis. Extensive knowledge in Data Warehouse concepts and Software Quality Assurance at various levels through Agile methodologies.

EXPERIENCE

October 2021 - Current

Software Engineer (P-2 level) Saama Technologies, Pune, India

- Delivered solutions through rigorous quality assurance and professional testing practices. My primary focus lies in ensuring data integrity, quality, and seamless migration within complex ETL processes.
- Worked on various line of businesses, excelling in Data Quality, Data Migration, and Test Automation, Orchestration by creating intricate SQL queries that enable in-depth data analysis and validation.
- Validated the data that is loaded for various source systems in multiple layers.
- Analyzed the mapping, dataflows and the data types for various processes.
- Reconciled data if the data is matching between source and target i.e abstract layer, data vault and data store.
- Performed the ETL validations in Snowflake (Referential Integrity, Regression & Duplicate).
- Prepared Test cases and test scripts to test the requirement provided.
- Raising and Tracking defects in Jira.
- Make sure the test data/Sample data is available for testing.
- Prepare Test Case document for DPM Sign off.
- Involved in defect identification and analysis.
- Provided Walkthrough to clients on end of each Iteration/Sprint for test results signoff.
- Validated the power BI reports against the data available on cloud Validating the functionality of the reports in power BI tool for filters and the user view.
- Involved in daily sprint and grooming calls.
- Designed and developed orchestration pipelines and jobs to automate end to end data flows and processes including loading through different layers and validating the same through streamset.
- Successfully fostered strong relationships with clients through effective communication and coordination.
- Adhering to Agile principles, I have actively participated in Agile development cycles, contributing to iterative development, continuous improvement, and rapid project delivery.

ACCOMPLISHMENTS

- Won Shining Star Award (2nd Quarter of 2022)
- Won Shining Star Award (1st Quarter of 2023)
- Won Shining Star Award (2nd Quarter of 2023)
