PROFESSIONAL EXPERIENCE

Infosys | Technology Analyst

Feb 2021 - Present

Serverless Application Development using AWS SAM and AWS Services (Managed 14 Repositories)

Mar 2023 - Present

- Developed a serverless application using AWS SAM.
- Designed and Implemented RESTful APIs using AWS API Gateway and AWS Lambda functions.
- Created AWS resources such as Amazon S3 Buckets, DynamoDB, AWS Secrets Manager and Amazon SQS queues.
- Utilized AWS Secrets Manager for securely storing and accessing sensitivity credentials and secrets.
- Integrated AWS Lambda functions with AWS SQS for event-driven processing of messages.
- Leveraged AWS SNS for email notifications in the application.
- Implemented a CI/CD pipeline for automated testing, building, and deployment, ensuring faster delivery of code changes.
- Prioritized scalability, fault tolerance, and automation throughout the project.
- Managed AWS resources and deployments using the AWS Serverless Application Model (SAM) framework.
- Incorporated SonarQube for continuous code quality monitoring and improvement in both serverless application development and serverless message processing projects.

Serverless Message Processing and Publishing Pipeline (Managed 12 Repositories)

Dec 2022 - Aug 2023

- Implemented a serverless architecture using AWS services (SQS, Lambda and SNS) to optimize message processing and publication.
- Developed an event-driven Lambda function triggered by SQS events for real-time message processing.
- Optimized record retrieval from the SQS queue, minimizing processing overhead and improving system performance.
- Transformed retrieved records into a standardized message format for seamless publication.
- Published transformed messages to a designated SNS topic, ensuring secure and efficient delivery.
- Implemented intelligent record deletion to prevent duplication and optimize system performance.
- Utilized Git for version control, enabling effective code management and collaboration.
- Implemented a CI/CD pipeline for automated testing, building, and deployment, ensuring faster delivery of code changes.
- Prioritized scalability, fault tolerance, and automation throughout the project.
- Conducted testing to ensure functionality and reliability, and employed monitoring tools for system optimization.
- Implemented SonarQube for ingoing code quality assessment and enhancement in the serverless message processing and publishing pipeline project.

Migrating On-Prem Web Applications to AWS Cloud

Mar 2021 – Mar 2022

- Played a key role in the Cloud Migration Team, designing and implementing cloud architecture for diverse on-prem web applications.
- Spearheaded the optimization of cloud applications and infrastructure on Amazon Web Services (AWS) for enhanced reliability and performance.
- Proficient in Infrastructure as Code (IaC) principles, utilizing Atlassian tools (Bitbucket, Bamboo, Octopus) for streamlined development and deployment processes.
- Implemented proactive monitoring strategies, configuring CloudWatch alerts for instances, and integrating them into Auto Scaling launch configurations.
- Demonstrated expertise in monitoring server alerts through CloudWatch, swiftly troubleshooting issues for optimized system performance.

EDUCATION

Vellore Institute of Technology

Vellore, TN

Bachelor's in Computer Science and Engineering with Specialization in Information Security (CSE- IS) *Apr 2016 - Apr2020*

CGPA – 7.43/10.00.

SKILLS

- **Programming Languages:** Python, Java and C
- **Cloud Systems:** Cloud Formation, SAM, Lambda, S3, SES,SQS, SNS, RDS, IAM (User, Roles & Policies), CloudWatch, DynamoDB, EC2(Instance, EBS, Load Balancing & Auto Scaling Group), Event Bridge, Continuous Integration and Continuous Delivery (CI/CD), API Gateway, AWS Code Pipeline, VPC, SonarQube, Command Line Interface (CLI).
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap, XML, Angular, ASP .Net Core, Web API.
- **Database:** MySQL, Oracle.
- **Miscellaneous Technologies:** Azure Board, Postman, Bit-Bucket, Bamboo, Octopus, Android Studio, Anaconda, PyCharm, Jupyter, Firebase, Visual Studio, Wamp Server, Git, Jira, SonarQube.

CERTIFICATIONS

- AWS Certified Cloud Practitioner | Amazon Web Services (AWS).
- AWS Certified Solutions Architect - Associate | Amazon Web Services (AWS).
- AWS Certified Developer – Associate | Amazon Web Services (AWS).
- Microsoft Certified – Azure Fundamentals | Microsoft.
