- Good Experience on Understanding and Analyzing Test Requirements.
 - Well versed with Software Development Life Cycle and Software Test Life Cycle Processes.
 - Having experience on Automated Tool like Selenium.
 - Having good experience in creating test cases using Selenium WebDriver with Java.
 - Experience in Framework using JUnit and TestNG testing frameworks.
 - Experience in Automation Framework design & implementation using Selenium.
 - Experience in documenting Test Cases based on Requirements.
 - Performed Sanity Testing, Functionality Testing & Regression Testing.
 - Good knowledge on Object Oriented Programming concepts, Collection and Java Programming.
 - Having good knowledge in SQL.
 - Ability to learn and adapt to new tools and technologies very quickly.
 - Excellent Communication and interpersonal skills with clear understanding of business processes and ability to work as part of team or individually.
-

Work Experience:

- Worked as a Test Engineer at Facile Consulting Pvt Ltd, Bengaluru, India- from August 2019 to till date.
-

Training Programs Attended and Certifications:

- Attended selenium in Java testing training in Q spider, Bangalore
 - Oracle cloud Infrastructure 2023 Certificated Foundations Associate
-

Software Skills:

- Operating Systems: UNIX Basics, Windows 7, 10, 11, and Windows Server 2016 & 2019
 - Programming Languages: Java
 - Functional Testing Tools: Selenium IDE, Selenium WebDriver, Selenium Grid
 - Defect Tracking Tools: Jira and Devops
 - Frameworks : TestNG, and Hybrid Framework
 - Methodologies: Agile.
 - IDEs: Eclipse IDE
 - Database: Microsoft SQL Server and Oracle
-

Education:

- Bachelor of Technology in Electronics and Communication Engineering from South East Asian Engineering College, VTU in 2019.
-

Project Summary:

- Project 1: Cover Your Asset (CYA)
 - Project 2: MuddyBoots
 - Project 3: Sogo
-

Project #1: Cover Your Asset (CYA)

Project: Web of Science Usage Reporting System.

Operating Environment: Windows 10

Application Environment: HTML, XML, CSS, JavaScript, Com+, C#.Net, and MS SQL Server.

Test Method: Automation Testing

Test Environment: Eclipse IDE, Selenium WebDriver, Java, Selenium Grid, TestNG, Maven, and Jira

Bug Tracking Tools: Atlassian Jira

Role: Test Engineer

Team Size: 6

The CYA Web app is best described as a solution that will simplify communication and tracking functions for growing companies in the coffee sector in the US and other markets. The Project has different modules such as Customer Management, Customer user managements, Asset Management and their Service record management. This is a highly customized software which caters to needs of the users at different levels like Admin, Super Admin or a regular user for that company. Through this app, we can control and track Assets movement their Service records quite efficiently.

Roles and Responsibilities:

- Testing the software developed to meet the requirements of the end user.
 - Involvement in the preparation of Test Procedures, Test Scenarios, Test Cases and data.
 - Involvement in the test execution result Analyzing and defect reporting.
 - Created Object Repositories using Selenium WebDriver Page Object Model (POM).
 - Created Test cases using HTML element locators and Selenium WebDriver API commands.
 - Enhanced Test cases using Java programming features and using TestNG testing framework.
 - Execution of Selenium Test Cases and Reporting defects by using Jira.
 - Conducted Regression, Cross browsing testing.
 - Effectively communicate project expectations, project goals and scope to the team
 - Involved in helping the team members as and when needed.
 - Automating all the Sprint testcases with in the sprint
 - Execution of Automation scripted and result analysis for all the +ve and -ve cases
 - Execution of automated regression suite and result analysis
-

Project #2: Muddyboots

Project: Collaborative Design and Delivery System

Test Method: Automation Testing

Software/Tools: Windows 10, UNIX, Selenium WebDriver,

Bug Tracking Tool: Devops

Role: Test Engineer

Team size: 5

The Muddyboots Web/mobile application is best described as a solution that will simplify communication and tracking functions for growing companies in the Agriculture sector in the US and other markets. The Project has different modules such as Customer Management, Customer user managements, Asset Management and their Service record management. This is a highly customized software which is helps to farmar and customer users at different levels like Admin, Super Admin or a regular user for that company. Through this app, we can control and track movement their Service records quite efficiently.

Roles and Responsibilities:

- Initial Analysis and study of Requirements provided
- Developed Manual Test Cases for different Test scenarios covering all aspects of project functionality.
- Executed the test cases, recorded the results and documented defects.
- Project automated with Page Object Model using selenium WebDriver.
- Generating reports using frameworks TestNG.
- Testing involved System, Regression, Compatibility and Adhoc.
- Posting bugs using Devops.
- Effectively communicate project expectations, project goals and scope to the team
- Client interaction via e-mail and conference calls on a weekly basis.
- Used to prepare Daily status and Weekly Status Reports
- Involved in helping the team members as and when needed
- Automating all the Sprint testcases with in the sprint

- Execution of Automation scripted and result analysis for all the +ve and -ve cases
 - Execution of automated regression suite and result analysis
-

Project #3: Sogo

Test Method: Automation Testing

Software/Tools: Windows 7, Selenium WebDriver, JDK 1.8, MS SQL Server.

Bug Tracking Tool: Atlassian Jira

Role: Test Engineer

Team size: 7

SOGO is building a community of customers that are enjoying ultra-flexible ways of leasing and driving vehicles. Individualists and businesses who can change vehicles in accordance with their lifestyle and needs over short periods - swapping their car or van for what they want, when they want.
