SUMMARY

A back-end developer with an experience of **2.5 years** building enterprise-grade software. Dedicated and detail-oriented professional with hands-on experience in website development and e-commerce solutions. Proficient in integrating third-party tools, managing data, and implementing customized workflows to meet client needs.

EXPERIENCE

Software Engineer

Indore, MP

HotWax Systems

September 2021 – November 2023

- Leveraged Java, Rest API, and Microservices architecture to optimize e-commerce operations, successfully resolving critical bugs, introducing feature enhancements, and implementing a robust promotion engine.
- Managed Displayed advanced expertise in version control using Git and GitLab to streamline code management and enhance team collaboration.
- Customized out-of-the-box (OOTB) workflows to meet client specifications, seamlessly integrating systems with diverse CRMs, and refining content, product, and catalog management functionalities.
- Possess in-depth knowledge of software internals, leveraging and understanding of design patterns to ensure scalable, maintainable, and efficient code architecture.
- Exhibited adept version control skills, employing industry-standard tools like Git, GitLab to facilitate collaboration and efficient code management within development teams.
- Played a key role in projects, contributing to an agile work environment that emphasizes collaboration, adaptability, and continuous improvement.
- Integrated with third-party tools and applications like authorize.net, Bambora, Paypal etc.

Software Developer Intern

Indore, MP

HotWax Systems

June 2021 - August 2021

- I gained hands-on experience with important industry skills including Git, GitHub, Core Java, Advanced Java, **Spring Boot** and MySQL .
- Developed expertise in optimizing ERP system architecture, employing technologies such as microservices, to enhance operations, resource management, and overall business performance.
- Collaborated effectively with cross-functional teams, contributing to a dynamic and innovative work environment. Engaged in JVM internals exploration to enhance application performance.
- I worked on Apache OFBiz, Party Data Model, and open-source frameworks.

TECHNICAL SKILLS

Languages	C Language, Java, JDBC, Hibernate, SQL, HTML, CSS, Bootstrap, FTL, XML.
Frameworks	Spring Boot, Ofbiz Framework, Apache SIX, Apache Solr.
Cloud Services	Amazon Web Services (AWS), Elastic Compute Cloud (E2C).
Databases	MySQL, SQLite, PostgreSQL.
Version Control	Git, GitHub, GitLab, Jira, Linux Ubuntu Windows, Operating System.
Other	Docker, JQuery Maven, Gradle, Jira, Postman.

CERTIFICATES

Web Development

Certified Web Developer proficient in HTML, CSS, JavaScript, and modern frameworks. Hands-on experience in creating responsive, dynamic websites and web applications. Skilled in debugging, problem-solving, and optimizing code for efficiency. Proficient in utilizing various development tools and staying updated with industry trends.

PROJECTS

1. Aftermarket Auto Parts Alliance :

- Engineered RESTful APIs and Microservices to enhance e-commerce functionalities, resulting in specific outcomes, e.g., improved performance, increased sales.
- Managed purchase orders, sales orders, and inventory tasks while researching innovative technologies for web development.
- Utilized Docker and Spring framework to improve deployment processes, enhancing development agility and system scalability.

Tech Stack: Java, Spring Boot, REST API, MySQL, Apache Solr, Docker, FTL, XML Jira.

2. AECP :

- Implemented strategies to enhance the flow of data from AECP to B2C, resulting in improved communication and responsiveness.
- Led the implementation of robust data management systems, ensuring the secure handling and processing of bulk information.
- Oversaw the development and optimization of the AECP website, streamlining B2B operations for enhanced efficiency.

Tech Stack: Java, Spring Boot, REST API, MySQL, Elastic Compute Cloud, HTML Git, GitLab.

3. ZUCA:

- Experienced professional at [Zuca](#), adept in client-focused solutions, relationship building, and tailored service delivery.
- Proven ability in identifying improvement opportunities, implementing strategies for customer satisfaction, and seamless cross-functional collaboration.
- Committed to driving positive experiences and upholding Zuca's reputation for exceptional service provision.

Tech Stack: Java, Ofbiz Framework, Apache SIX, REST API, MySQL, Docker, FTL, JQuery.

EXTRA-CURRICULAR ACTIVITIES

- I volunteered to manage the company event called 'HACKTOBERFEST'. Received commendation for effectively collaborating with the team to deliver high-quality solutions on time.
- I am presenting my FEST presentation at EDO FEST 2019, organized by [EDO Square](#).
- Actively contributing to the open source projects.

EDUCATION

IPS Academy School of Computers

Master of Computer Application; CGPA: 8.63

2019-2023

IPS Academy School of Computers

Bachelor of Computer Application; Percent: 60%

2016-2019
