1. 4+ years professional experience as a DevOps Engineer with a proven record of strong technical background. Analytical and problem-solving skills. Managing & Implementing End to End Deployment, Support & testing of application on Cloud & Cloud Native & on-premises infrastructure. I am passionate about working in New Cloud Technology world and having ability to learn new technology in demanding & complex environment. Believe in hardworking, team coordination, flexibility.

- 2+ years of experience in AWS to deploy applications on POC & PROD environments.
- 2+ years of experience in Micro Services Like Docker & Container Orchestration with Kubernetes.
- Experience in product deployment, testing, and operation support & Handover.
- Good Knowledge on CI/CD Pipeline using Jenkins integration with Git, Jenkins, Maven, Jenkins, Ansible, Terraform, Docker, Kubernetes, Grafana.

Work Experience

'DevOps Engineer

TCS with payroll company Foray Software Pvt Ltd
July 2022 to November 2023

Working as Site Reliability Engineer (SRE) for Development/Migration/ DevOps Support in Jenkins, GIT, IBM UCD in Dev, QA/UAT, Non-Prod, Prod and DevOps support team for developing, planning and setting up the environment and providing support in Building the Application, Deployment, CICD along with DevOps tools.

Roles and Responsibilities:

- Configured Continuous Integration (CI) and Continuous Deployment (CD) using Code Pipeline, Jenkins and Code Deploy for automation.
- Having experience in writing Ansible playbooks for Implementation, Config changes in YAML.
- Having knowledge in creating Docker images and file for running containers and build multi-stage containers.
- Have knowledge in version controlling system such as GIT and GitHub.
- Configure the Build Pipeline using groovy Scripts for Maven build and UCD Initialization in Jenkins
- Working on Migration and Upgrading the Application, Jenkins, and deploying the Application via IBM-Urban Code Deployment using components and snapshot process.
- Working in pom.xml source code files for Upgrading the Application, troubleshooting the error fixes in maven build, Plugins, dependencies, and variable components in Maven build.
- Installing the Application Monitoring tools Zabbix (Monitor performance and of application) for the Prod and Non-Prod – Environments.
- Monitoring the services in DMIT tool and troubleshooting the services

'DevOps Engineer

Quadient Technologies Private Limited - India

September 2019 to June 2022

Create AWS infrastructure and Cloud Formation templates in AWS for VPC, NACL, EKS, IGW, NAT Gateway, RDS, ALB, Cloud front, Route53, ACM, WAF.

Deploy the images from ECR to EKS services and build AWS CICD automation.

Integration of services to monitoring tools in AWS

System Administrator

Seven Active Technology Solutions Pvt.Ltd - Hyderabad, Telangana

November 2017 to August 2019

Server Administration, Windows, networking Service, backup, security Management, End-User Support,

AWS

Project Experience Summary: Rankguru

Solution Environment: Linux, networking, Docker, Kubernetes, backup, DevOps, AWS,

Cloud Native Applications:

- Design and build Production Level Kubernetes Cluster on AWS EC2 servers, Virtual Machines & Physical Servers.
- Building/Maintaining/Upgradation of Kubernetes clusters Using KUBEADM TOOL, AWS EKS
- Developing YAML Files for Pods, Replicasets, Deployments & Services to Orchestration of Docker Containers Deployments.
- Used Jenkins pipelines to drive all micro services builds out to the Docker registry and then deployed Kubernetes, Created Pods, Deployments, Replicasets and managed using Kubernetes
- Used Kubernetes to orchestrate the deployment, scaling and management of Docker Containers.
- Monitor Kubernetes Clusters using Prometheus & Grafana & Cloud Watch
- Building Kubernetes Networks with CNI Plugins like Flannel, Weave networks-CNI.
- Maintaining all the company followed security compliances like passwords, policies & user, group, roles creation etc.
- Participating & supporting on DevOps CI/CD pipeline infrastructure deployment, monitoring and verifications
- Created AWS infrastructure and CloudFormation templates in AWS for VPC, NACL, IGW, NAT Gateway, RDS, ALB, CloudFront, Route53, ACM.
- Deploy the code to AWS LAMBDA and build CICD automation.
- Integration of services to monitoring tools in AWS.

Education

Certification

Sri Venkateswara University at Tirupati - Tirupati, Andhra Pradesh

Bachelor Of Arts

Sri Venkateswara Oriental College - Tirupati, Andhra Pradesh

Skills

- Jenkins

- Git
- DMIT tool
- CloudWatch
- DevOps CI/CD tools
- AWS
- Prometheus
- Docker
- Kubernetes
- Cloud Platform
- Monitoring tools
- Grafana
- Container Orchestration tools
- Maven
- GitHub
- Terraform
