Female

About Me

Junior Project Manager | Advanced Certified ScrumMaster (A-CSM) | Certified Scrum Product Owner

Profile Summary

Bringing a robust background in project management, I am currently targeting roles as a Scrum Master or Product Owner. With a proven track record of successful project delivery, my goal is to leverage my skills in fostering agile methodologies and driving product excellence. Eager to transition into a dynamic Scrum Master or Product Owner position, I am poised to contribute my leadership and organizational abilities to enhance team collaboration and project success.

Education

 **B.Tech/B.E., Jeppiaar Engineering College, Chennai**

Work Experience

Junior Project Manager

Adappt Mobile Cloud Applications

- Led and managed a cross-functional team of 10 members in the successful execution of software implementation projects, ensuring adherence to timelines, budget constraints, and quality standards.
- Coordinated project resources, including task allocation, work schedule management, and regular team meetings to drive project progress and promote collaboration.
- Developed and maintained comprehensive project documentation, including project plans, risk assessments, and status reports, providing stakeholders with accurate and up-to-date information.
- Implemented effective change management strategies to minimize project risks and ensure smooth transitions during project phases, resulting in increased stakeholder satisfaction.
- Led cross-functional teams throughout the project lifecycle, enforcing Agile principles and ensuring timely delivery of project milestones.
- Facilitated daily scrum meetings and organized backlog grooming sessions to enhance communication and collaboration among team members.
- Coordinated project schedules, allocated resources, and monitored progress, leading to improved efficiency and on-time project completion.
- Implemented proactive risk management strategies, identifying potential obstacles and devising contingency plans to mitigate their impact on project objectives.
- Coached team members on Agile principles and implemented the Scrum framework, resulting in a 20% increase in productivity and improved project delivery time.
- Collaborated with stakeholders to define project scope, prioritize requirements, and create detailed project schedules, leading to the successful delivery of multiple complex projects within budget and timeline.
- Identified and resolved project bottlenecks and risks proactively, leading to enhanced project execution and successful delivery of high-quality software products.
- Managed cross-functional teams of software developers, product owners, and designers in completing multiple Agile projects, ensuring adherence to Scrum principles and timely delivery of solutions.
- Facilitated daily stand-up meetings, sprint planning sessions, and retrospectives to foster effective communication, collaboration, and continuous improvement among team members.
- Utilized project management tools such as JIRA and Trello to manage project scope, prioritize backlog items, and track progress, enabling efficient resource allocation and timely delivery of project milestones.
- Provided mentorship and coaching to team members on Agile methodologies, Scrum practices, and project management best practices, fostering a culture of learning and self-organization within the team.

2021
2023

Test Engineer

Adappt Mobile Cloud Applications

Web Application Testing:

- Currently involved in a project with the World Health Organization (WHO), actively contributing to establishing and deploying a collaborative team for action.
- Acquired product knowledge and demonstrated experience in handling critical P1 situations alongside the team.

Internal Product (Bug Tracking Tool):

- Engaged with an internal project utilizing an issue-tracking tool akin to Jira, where I conducted diverse testing activities such as Functional, Integration, Usability, Cross-browser, Responsive, and Performance Testing using tools like JMeter.
- Adhered to the Scrum framework, consistently delivering features within sprint cycles.
- Conducted testing for the Progressive Web Application (PWA) of the Bug Tracking Tool.

Tested a Word Add-In:

- As a Quality Analyst for the Lexis Project, I concentrated on assessing a Word Add-On, undertaking Functional, Regression, and Performance Testing for this specific add-on.

2012
2016

Project Engineer

Wipro Infotech

Practice Team:

- Demonstrated expertise in implementing Automation frameworks using Selenium.
- Improved test cases by incorporating Java programming features and utilizing TestNG Annotations.
- Proficient in creating essential testing artifacts, including Test Scenarios, Test Cases, Defect Reports, and Test Summary Reports.
- Self-motivated, energetic, and consistently adheres to high ethical standards in all work-related assignments, making an immediate contribution to corporate goals and objectives.

Citibank Project:

- Possess extensive knowledge of the test object model, functional and regression test automation, and automation frameworks.
- Well-versed in descriptive programming, objects identification, and file system operations.
- Proficient in identifying test cases for automation and developing comprehensive automation test plans.

2020
2020

Quality Assurance and Data Research Experience:

Madhura TV

Automation/Manual Testing at Yollay.com (Apr 2020 - Aug 2020):

- Executed comprehensive website testing using a combination of manual and automated scripts within the PyCharm IDE, utilizing the Python programming language.

Data Researcher at Madhura TV_ Yollay.com (Dec 2018 - May 2019):

- Conducted extensive data research activities, involving the collection, analysis, and organization of information to support the content and functionality of the website.
- Responsibilities encompassed tasks such as data collection, validation, content creation, and data presentation.
- Ensured accurate, relevant, and up-to-date content to enhance the overall user experience and provide valuable information to visitors.
