Experience Summary

- ✓ Having 12+ years of experience in **Software Testing**.
- ✓ Having Domain Knowledge of AI Model Testing, Web Technology (Website/Frontend, API/Backend, ETL, CSS, HTML, DB, Reporting/ Analytics and Operations)
- ✓ Proficient in **AI Model Testing, Manual, Black Box and Performance** Testing techniques
- ✓ Experience in **Smoke, Compatibility, End-to-End, Interface, Performance, Functional, Integration, Database, Template Mobile testing, API testing and AI Model testing**.
- ✓ Performed **Performance testing** using JMeter.
- ✓ **API testing** using Postman.
- ✓ Knowledge of **Data Warehousing, Reporting, ETL Testing (Business Objects) and Tracker Log**.
- ✓ Hands-on experience in designing, reviewing and execution of **Test Cases**.
- ✓ Knowledge of **SDLC, STLC & Defect Life Cycle** processes
- ✓ Knowledge of **Regression testing**.
- ✓ Knowledge of executing **SQL queries, Procedure and Triggers** in DB and **UNIX command** in putty.

Technical Expertise

Languages	- Basic Knowledge of C, C++ and basic java.
Testing Tools	- Jira, Bugzilla, QC, Trac, Selenium, JMeter.
Environments	- Putty, SAP Business Objects, WinSCP, Wamp Server & Java 1.8
Web Technologies	- HTML, Apache and Selenium web driver, Selenium IDE, Selenium RC, Firebug and CSS.
DB Server	- Data Services, SQL Server, MySQL and Oracle

Professional Experience

- Company - Indegene Private Limited
- Designation - Test Lead
- Duration - 12-Nov-2015 to 18-May-2023

Academic Profile

Degree

B.E (Electrical and Electronic Engineering)

College SACS M.A.V.M.M Engineering College Madurai.

University Anna University, Chennai.

Period 2006 - 2010

Scored 60.00%

Class First class

Higher Secondary (12th)

School Mangayarkarasi Hr.Sec.School, Madurai.

Period 2006

Scores 67.83%

Class First class

SSLC (10th)

School Mangayarkarasi Hr.Sec.School, Madurai.

Period 2004

Scores 80.02%

Class First class

Project Summary

Project #1

Company Name: Indegene Private Limited

Project: Health care and Medical Solution projects

Client: Pfizer, Sandoz, Biogen and Lilly

Duration: Nov 2015 – May 2023

Team Size: 10

Description:

Indegene provides the solutions that enable global healthcare organizations to address complex challenges, to improve health and business outcomes.

Product: NCCI

Indegene Next Commercial Content Intelligence is an AI powered platform for Content Atomization and Content Tagging.

Machine vision to automatically extract 'slices' (Text and Graphics Components) in the master asset. Auto classify each slice into Content type (Chart, Page title, Table, Photo of person, Diagram etc.), Message category (Safety, Efficacy, MOA, Dosing, Patient Infor, cost, etc.) and Media type (PI, Reference, Bad slicing etc.)

Refined and categorized list of slices from the Master Asset is used to prepare the Child Assets. NCCI AI Models are converting the unstructured content into Structured data.

These converted Structured data are used in various cases like Creating the Child Assets and Tagging of Assets and Components into Dams System (Veeva), Content Analysis and Content Audit.

Product: TxDesigner

Indegene TxDesigner is an interactive application that accelerates the clinical trial development life cycle. TxDesigner helps visualize the study design during the protocol design phase, study build phase, and submission phase of a clinical study. TxDesigner helps streamline the clinical trial development process.

The application facilitates automation and helps user to monitor and manage essential components of the study build. Other stakeholders of the study build are informed and aligned in the development process as well.

TxDesigner is integrated with Medidata Rave and directly it can upload and download the ODM and ALS file formats.

TxDesigner is having 5 different Roles and Responsibility and it has Search/Upload Study, Forms, Fields & Data Dictionary, Visit/Roadmap, Edit check, Test Script, Steam Team, Preview Download, Task Allocation, Unit Testing, Functional Testing, UAT Testing, Audit Trail, Dash Board and Reports pages.

Product: Ngage

Indegene Ngage is a multi-channel stakeholder patient engagement platform. The product to the health providers to run various campaigns from enrolling the patients to the scheduling the appointment through various channels.

Multichannel messaging is Leverage pre-built easy-to-read messaging integrated for multiple channels such as print, IVR, SMS, and email, which gives a unique experience for your patient. Give priority to desired channel based on panel composition to give patient-preferred alerts and reminders.

Ready-made library of campaigns, Get an exhaustive library of health programs pre-configured for care and gap closure campaigns with mapped content, channels, and automated reminders to drive desired patient behavior.

Personalized branded communication is Configure channel with easy-to-read content written by health experts and providers with details for better adherence.

Feedback manager, Get easy assessment from patients and members on health services and improve overall quality of care based on the analyses done by the platform.

Project #2

Company Name: Paladion Network

Project: Cyber Security and Bank/Software Application

Client: HDFC, SBI, AXIS and Yes bank

Duration: Dec 2014 – Dec 2015

Team Size: 12

Description:

Providing security to all the leading banks and internet transaction. Maintaining client websites without virus and providing better secure outcomes.

Product: Provian

Provian is a smart integration of threat & vulnerability management. The intelligent information based on historical data populated by correlating threat and vulnerability information.

Provian, a web application portal for Threat and Vulnerability management helps to view and analyze the organization's Threat and Vulnerability statistics. It combines the Threat and Vulnerability status with its security intelligence in providing all the required

Threat and Vulnerability information in one place, helping the organization's higher management in quick analysis and decision making.

Project #3

Company Name: Lore Software Solutions

Project: Online publishers of articles (content) with Advertisers

Client: Perfect Market, Pasadena California, USA

Duration: Jan 2011 – Nov 2014

Team Size: 8

Description:

Perfect Market believes that content matters and helps newspapers, magazines, broadcasters and other online publishers grow their revenue by serving highly relevant content to previously under-served audiences. Its proprietary technology provides publishers with revenue relevancy tools that help them create, distribute and monetize their content more effectively online. Optimized content pages are designed from the ground up to serve each specific audience segment, from search engine users to visitors from social networks. Content is complemented with relevant ads that are targeted based on the specific content themes that attract users to the content. This results in a more satisfied user, increased traffic and higher click-through rates for advertisers. The combination of factors results in dramatically more revenue for publishers and their ad network partners.

It's a News paper development technology, here developing the templates i.e., articles, articles have CPC Ads (Google ads), Social Medias and Display ads are the revenue coming things. If clicks on any Google ads getting revenue to Perfect market site as well as main site i.e., client side. Revenue can be calculated daily, weekly and monthly. Currently in our company handling 50-Enterprise properties+30 DPS-properties (Thomson Reuters, Washington times, Daily caller, Kiplinger, Business Insider, Philly) and also two more properties as '**Times of India**' & '**Economic Times**' are handling.

Responsibilities:

- Testing the product and making sure the products are delivered without bugs and secure.
- Managing team members to work according to sprint features.
- Thorough study and understanding the requirements from Story ticket/SRS document
- Associated in creating **Test scenarios** and **Test Cases** for the requirements
- Test Case Review
- Participated in Business/Development meetings to understand user requirements.
- Involved in Black Box testing, Functionality, User Interface, Navigation, Compatibility, Performance, End-to- End, Data Base, Template testing, Regression, Integration Testing and Beta Testing.
- Perform Smoke and Sanity testing for each new build of the application.
- Performed functional, Data Warehouse, System, and regression testing manually.

- AI Model Testing and Publishing the Accuracy, Precision, Recall, F1 Score and Confusion Matrix to the team.
- Conducted cross browser testing to check the compatibility of the software with different Browsers (IE, FF i.e., Mozilla, Chrome and Safari)
- Knowledge in relational database concepts like Tables, Primary and foreign keys, Views and Referential Integrity. Proficient in the data manipulation using SQL for the retrieval of data from the relational database (inner joins, outer join, group by, order by etc.)
- Involved in Frontend regression testing, Post Launch regression and also regression through automate by selenium tool using PHP scripts
- Worked in Reporting and ETL tickets i.e. Data Warehousing, and also QA process, Tracker Log
- Bug Reporting & Defect Tracking & Involved in Creating /updating points to Trac wiki pages
- Attending project meetings, release meetings, and QA status meetings.
- Black box testing, UNIX testing, Integration testing, System testing, and Regression, Manual, Sanity, Automation, Performance; Build the test environment, DB and ETL testing.

Also Performed review sessions with developers and project manager to ensure test cases and product development were interpreting client requirements in a like fashion. Reviews were carried out for each functional interface to the end user. Authored user acceptance tests as needed were also kept in mind.

- **Worked in Unix and Windows 7 Environment to perform content acquisition for web related articles**
- **Worked in Oracle, SQL Yog and SQL DEVELOPER.**
- **Worked in Artificial Intelligence Model verification.**
- **Performed performance testing using JMeter tool.**
- **Worked in Firebug and Automation tools for front-end testing.**
- **Worked in Firefox, Chrome, Safari, IE, Opera browsers.**
- **Worked iPhone, iPad and Android Mobile devices.**

Environments:

UNIX, SQL Yog, SQL Developer, Business Objects, SQL Server, Putty, WinSCP and Oracle etc.

I hereby declare that the above information and details provided are correct to the best of my knowledge.
