Summary

Dedicated and detail-oriented software developer with 2 years of hands-on experience in building responsive and scalable web development using Angular and React.js. Proven ability to collaborate with cross-functional teams to deliver high-quality software solutions. Seeking a challenging role to leverage my skills and contribute to innovative projects.

Work History

- ASM Technology** 14/09/2021 - 28/02/2023
Software Engineer
 1. Developed and maintained web applications using Angular and React.js, to high performance and responsiveness.
 2. Collaborated with UX/UI designers to implement user-friendly interfaces and enhance user experience.
 3. Implemented and maintained state management using Redux for React.js applications.
 4. Conducted code reviews to ensure code quality, adherence to coding standards, and knowledge sharing within the team.
 5. Worked closely with QA teams to identify and resolve software defects and bug-free applications.
 6. Participated in Agile/Scrum ceremonies, providing accurate estimations and timely updates on project progress.
- Entsar Electromechanical works co** 01/03/2023 - 31/10/2023
Full Stack Developer
 1. Contributed to the development of Angular applications, focusing on front-end features and functionality.
 2. Collaborated with back-end developers to integrate user-facing elements with server-side logic.
 3. Implemented responsive design principles to ensure applications perform optimally across various devices and screen sizes.
 4. Assisted in troubleshooting and debugging issues to maintain a stable and efficient software environment.
 5. Participated in the planning and execution of software testing, ensuring the delivery of high-quality products.
- J Pencil Pvt Ltd** 05/12/2023 - Present
MERN Stack Developer
 1. Developing and designing front end web architecture
 2. Building interactive consumer data from multiple systems and Define code architecture decisions to support high-performance products
 3. Work with development teams and managers to ideate software solutions
 4. Developing well-functioning databases and applications
 5. Conduct and participate in project planning & scheduling and design discussions
 6. Address and improve any technical issues.

Education

- PMIST** 2016 - 2021
M.SC (Software Engineering)
78 %

Languages

- English and Tamil

Skills

- Languages: JavaScript (ES6+), HTML, CSS, Bootstrap.
- Frameworks: Angular, React.js, Express and Node.js.
- State Management: Redux,
- Version Control: GitHub,
- Testing: Jasmine, Jest Agile/Scrum Methodologies,
- Database: MySQL, Mongo DB.

Projects

- **Bay Monitoring Layout Creation | Role: Frontend Developer**
 1. I create layout, design, UI and UX design.
 2. Converted for all design to angular platform.
 3. This bay Monitoring learning means your system improves each and every day, which means the efficiency of your car park operations does too.
- **Home Monitoring with IOT Device | Role: Frontend Developer**
 1. Smart Watch, Smart Home, Smart Phone, etc, the list goes on. With the rise in the implementation of Internet of Things, commonly referred to as 'IoT', the potential for the application of IoT continues to increase exponentially.
 2. The Home Monitoring Project is created with the intention an efficient and a secure network to achieve a target of Optimal Productivity.
- **Eclectic IQ | Role: Frontend Developer**

Deep endpoint telemetry enables detection, response, and eradication of threats in support of security operations, incident response, and compliance.
- **Kleeeen Software | Role: Full stack Developer**
 1. Kleeeen can generate frontend design and the full stack quickly and efficiently.
 2. Projects generated by Kleeeen have a great UI, utilizing best practices, security, and topshelf features. At Kleeeen, we have at our transparency as a core philosophy.
 4. Kleeeen's authoring tool export follows standard practices to manage repository, project, and code, making it easy for long-term maintenance and support away from our authoring tool.
- **Video Chat using WebRTC | Role: Frontend Developer**
 1. WebRTC technology that allow us to integrate real time video calling feature in website as well as in applications.
 2. The Major part behind easy integration of WebRTC is open web standard and JavaScript.
 3. WebRTC allow us to communicate directly from 2 browsers without interacting with server once connection established

Publications

- **An Automatic System for Business Accounting Management Process**

The Accounting management software that can facilitate to use easy in calculation of revenue by keeping details a tab on all the accountancy of business. This accountancy software will make easy to business operations smooth & convenient. It is comprised of your Accounting manual, associated accounting policies and procedures, and accounting documents. The result indicates the efficiency, ease of use have impact on business performances.

- **IT Asset Management System | Role: Full Stack Developer**

1. Asset management, refers to any system that monitors and maintains things of value to an entity or group.
2. It may apply to both tangible assets such as buildings and to intangible concepts such as intellectual property and goodwill.
3. Asset management is a systematic process of operating, maintaining, upgrading, and disposing of assets cost effectively.
4. Here Asset management means IT Asset, specially Hardwares, Software's, Invoice, Tickets,Store etc.
