Objective

To secure a good position in a reputable organization to expand my learnings, knowledge, and skills

Technical Skills.

- **DEVOPS:**
 - Linux configuration and management.
 - Expertise in **AWS** (Amazon web service) services like **EC2, S3**.
 - Familiar with scripting for Jenkins, Maven, and Docker.
 - Expertise in source code management (version control system) tools using **GIT**
 - Implementing **CI/CD** pipeline for application development with using tools like **Jenkins, Gitlab, Maven**.
 - Have good knowledge on deployment tools like **Ansible, Dockers and Kubernetes**.
 - Detailed knowledge on **SDLC**.
- **FRONT END TECHNOLOGIES:**
 - HTML, CSS
- **CORE JAVA:**
 - Good development skills using JAVA.
 - Having good knowledge on OOPS concepts.
 - Hands on experience on Visual Studio.

Education

Course/ Degree	School/University	Grade/ Score	Year
SSLC	St Xavier's High School, Belagavi	67.36%	2016
PUC	Sachetan PU College, Hubli	67.66%	2018
B.E	Graduated form KLE Dr M.S. Sheshgiri College of Engineering and Technology, Belagavi	7 CGPA	2022

Training Certified Course:

- Certified from JSpiders Bangalore in **DevOps, Web Technologies, and Core Java Course.**

Projects:

Project Name: CI/CD Pipeline to Automate Docker Image Build.

Skills used: Git, AWS, Docker, Jenkins.

- Used Ansible to automate the Docker image build process on every commit on the GitHub repo.
- Playbook that will build a Docker image from a Flask app repository, push it to Docker Hub, and run it on a test server.
- Created an Ansible playbook that builds a Docker image from a Flask app repository, pushes it to Docker Hub, and runs it on a test server.
- Also integrated the playbook with Git using a webhook to automate the Docker image build process on every commit.

Project Name: Deploy Java application with Complete CI/CD pipeline Jenkins

Skills used: Git, AWS, Docker, Jenkins.

- Created a complete CI/CD pipeline using Jenkins to deploy a Java application.
- Used Git, Maven, Jenkins, Docker.
- Implemented the CI/CD pipeline by connecting SCM(GIT) by using webhook.
- Automated the CI/CD pipeline by blue-ocean plugin.

Project Name: Automated CI/CD pipeline for Web Application.

Skills used: Git, AWS, Docker, Jenkins.

- Worked on creating EC2 instance with security keys and obtained an IP address.
- Worked on the Jenkins server and created a Jenkins server with the help of plugins.
- Used Git tools to deploy the web application to the server.
- Implemented the CI/CD pipeline by connecting the web page to the server by using webhooks.
- Automated the CI/CD pipeline by blue-ocean plugin.

Project Name: Deploying Netflix web page.

Skills Used: HTML, CSS, Git Tools, GitLab.

- Created Netflix web page using html and css.
- Using Git tools deployed the page on the server.

Project Name: Design and Development of Hip Operated Pesticides Spraying Machine.

Operation:

- Engineered a unique leg-operated pesticide sprayer featuring a piston cylinder arrangement, carriage, dual nozzles, hoses, and tank.
- Developed a mechanism that significantly reduced hand pressure and spraying time, enhancing efficiency and productivity.

Languages:

English, Kannada, Urdu, Hindi, Marathi

Internship:

Company Name: Karnataka German Technical Training Institutes (KGTTI)

Description: - Worked on CNC milling machine and manufactured the products which were required by the industries

Extra Co-Curricular Activities:

- Represented College Cricket team in university level Tournaments
- Completed Ready Engineers Program provided by Tata Technologies

Declaration:

I do here declare that the above-mentioned information is true to the best of my knowledge and found to be correct.
