PROJECT

✚ FACE RECOGNITION BASED AUTOMATED ATTENDANCE SYSTEM. (2021-2022)

A face recognition-based attendance system is best. Students must come in front of the camera individually. To solve this problem, we proposed a smart attendant system that uses machine learning based Har Cascade recognition and face recognition technology. This system cannot replace someone who is not in class. Using this technology in combination with facial recognition can significantly reduce proxies and save you a lot of time. Technology is Python, Open cv toolbox, OS – WINDOWS 8 /10, MySQL, web technology.
