WORK EXPERIENCE

DelEx Technologies | *Associate Software Engineer*

03/2023 - 09/2023

Project: **New Vehicle Registration** | *Spring Boot, SQL, React Js and Maven*

- Engineered a 11% reduction in response time and ensured seamless integration through well-crafted RESTful APIs for 3 NVR modules.
- Introduced useCallback and useMemo like hooks to prevent unnecessary re-rendering of components.
- Engineered and maintained reusable React components, implementing effective state management strategies and minimizing prop drilling. Optimized development efficiency and contributed to a 9% reduction in feature implementation time.

GlobalLogic | *Trainee Software Engineer*

12/2021 - 06/2022

Project: **Secura** | *Spring Boot, SQL, React Js and Gradle*

- Partnered with front-end developers to integrate React.js components, resulting in a 7% reduction in page load times for Spring Boot applications.
- Reduced application load time by 5 sec by implementing a distributed in-memory caching using caffeine library.
- Implemented lazy loading and code splitting using Webpack in React.js which reduced the load time by 10 sec of application.
- Implemented comprehensive unit tests using JUnit, achieving 90%+ code coverage.
- Conducted profiling and performance tuning to identify and resolve bottlenecks, resulting in a 3% improvement in response times.

PERSONAL PROJECTS

Shoe E-commerce | *Spring Boot, SQL, React Js and Maven*

- Developed a robust full-stack web application for the buying and selling of shoes.
- Designed an intuitive and visually appealing platform, ensuring a positive experience.
- Sellers can easily list their shoes, providing detailed descriptions, images, and pricing information.
- Empower buyers to find the perfect pair with advanced search and filters in extensive shoe collection.
- Secure transactions with industry-standard encryption for a safe shopping experience.
- Users manage listings, track orders, and view transaction history in personalized profiles.
- Admins oversee and regulate the marketplace through a secure user activity dashboard.

TECHNICAL SKILLS

Backend: Java, Spring Framework and SQL

Frontend: HTML5, CSS, JavaScript and React Js

Tools: MySQL, IntelliJ IDEA, Git and Docker

Data Structures and Algorithms

Exposed to: Microservices, RESTful Web Services, Hibernate and SDLC

EDUCATION

- Bachelor of Engineering in CSE from SIRT Bhopal MP 2020 (6.9 CGPA)

ACHIEVEMENTS

- Achieved proficiency through 200+ LeetCode problems.
