

Professional Summary

To pursue a dynamic career in **software testing**, leveraging my expertise and experience to excel in the ever-evolving landscape of emerging technologies, while continuously honing My skills.

Career Summary

- Over 3 years of experience in **software testing**, specializing in testing various applications and products
- Experience with **manual testing and Automation testing with cypress**
- Proficient in **Agile and Waterfall methodologies, demonstrating a clear understanding of SQAmethodologies, including Waterfall and Agile models.**
- Experience in **cypress JS based automation tool.**
- Experience in **Test Automation Process.**
- Good knowledge of **JavaScript required for Cypress.**
- Good in **Programming Fundamentals, and Database Fundamentals.**
- Experience in **analyzing and modifying existing automation framework**
- Effective communicator with cross-functional teams, adept at clarifying complex information, and skilled in preparing clear and concise system documentation.
- Strong knowledge of databases, hands-on experience with SQL Server.
- Experienced in writing and executing test cases, with expertise in **Black box Testing, including Functional, Integration, System, Smoke, and Sanity Testing, as well as Regression Testing and Database Testing.**
- Well-versed in **SDLC (Software Development Life Cycle), STLC (Software Testing Life Cycle), Bug Life Cycle, and Traceability Matrix.**
- Proven track record of preparing test scenarios based on customer requirements.
- Deep understanding of QA processes, including **Test Case design techniques, Test Case review, and Test Case Execution.**
- Proficiency in using the **test management tool Jira** for efficient project management and collaboration.

Key Skill

Operating Systems : Windows 7, 8, 10
Testing Tools : Manual Testing, postman, Cypress
Language : JavaScript
Databases : SQL Server
Test Management tool : Jira

Professional Experience

Currently Working as Test Engineer at **Arris India Pvt Ltd** from **May 2020 to Present**

Education

B.E from Government Engineering College, Hoovinahadagali Bellary (VTU)

Project Profile

Project 1

Project Name : Sales Trend Dashboard

Domain : PowerBI

Environment : Manual Testing, Automation Testing with Cypress.

Client : Arris Group

Description: The objective of this project is to analyze sales trends in terms of volume and costs, utilizing a newly developed enterprise mix dashboard designed for various products. The primary emphasis of this dashboard is on key performance goals and the year-on-year growth of these products, with a specific focus on sales, volume, and product costs.

Responsibilities:

- Analyzing requirements by reviewing BRS and FRS documents.
- Creating test cases based on the requirement documents.
- Designing Test Cases, Execution of the test cases and reporting the bugs Implemented page object pattern in cypress
- Used Different type of locators Like Id, Name, Class Name, CSS, Xpath, Link Test
- Created custom keyword with JS in Cypress
- Developing a requirement traceability matrix.
- Logging defects and participating in defect reviews.
- Participating in team meetings and client defect triage calls.
- Conducting functional and data testing.
- Gaining an understanding of functionality and performing smoke, functional, and ad hoc testing.
- Executing regression testing across the entire application using scripts.
- Providing status reports to both on-site and off-shore teams.

Project 2

Project Name : Customer satisfaction and Quality Dashboard

Domain : PowerBI

Client : Arris Group

Environment : Manual Testing, Automation Testing with Cypress

Description: A new customer complaints dashboard has been created using Power BI to enhance customer satisfaction and facilitate close monitoring of product quality. The dashboard offers multiple perspectives, including customer complaint statistics, top customers, and the most frequently reported issues across all business segments and product categories. This dashboard represents a valuable addition to the global quality team's toolkit, aiding in the analysis of product-related issues and contributing to improved customer satisfaction and product sustainability.

Responsibilities:

- Comprehending customer requirements and system functionality.
- Creating test cases derived from requirement documents.
- Implemented page object pattern in cypress
- Used Different type of locators Like Id, Name, Class Name, CSS, Xpath, Link Test
- Actively participating in test case execution according to specified requirements.
- Logging defects in the Defect Tracking Tool (JIRA).
- Conducting retesting of test cases after defect resolution.
- Engaging in client meetings and contributing to the preparation and dissemination of reports to upper management.

Declaration:

I hereby declare that the above information furnished is true to the best of my knowledge and belief.
