

Narahari Pamuleti

Experience Java BackEnd Developer

📞 7259582393,9398164300 @ naraharipamuleti52@gmail.com

SUMMARY

- Around 2.4 years of experience IT industry and more than 2.1 years extensive experience in designing and development of various multi layered architecture based on Web Applications, Enterprise Applications using Java and JEE Technologies.
- Range of application development experience includes Enterprise Applications like Health Care and Employee Stock Purchase Plan.
- Over the years I have held responsibilities such as Development, Tooling and Engineering Improvements, Code Refactoring with Tools Sonar Qube.
- Worked in larger technological transformation projects and having experience in Learning the new Technologies into the IT industry. Defining technology & implementing with standards and following of J2EE best practices.

EXPERIENCE

Java Developer

11/2022 - Present

JKC Technosoft

Hyderabad

The healthcare management system could handle specific task such as securing various information of the patients. This will help them secure the data to keep patient-doctor confidentiality as well as assure them of their healing factors.

Role: Software Developer | Team Size : 10

Responsibilities:

As an Developer involved in development.

Involved in gathering the requirements, analysis, design & development of the project.

Involved in developing Spring Web MVC Controllers, Spring Boot, Web-Service, Micro-services.

Technology:

Java, J2EE, Spring Framework, Spring MVC, Spring Boot, Spring JPA, Hibernate, Oracle(SQL, PL/SQL) Spring Junit 4, SonarQube, Micro-services.

Java Developer

09/2021 - 11/2022

JKC Technosoft

Hyderabad

Employee Stock Purchase Plan Modules involved in this project are Entity Module, Grant Module, Allocation Module Repository Module.

Role: Software Developer | Team Size : 12

Responsibilities:

From above all the modules, I have worked under Grant Module and Allocation Module.

I was involved in integrating presentation layer with server.

Involve in unit testing and bug fixing during the development period.

Involve in developing/ enhancing the code based on the client requirements.

Technology:

Java, J2EE, Spring Framework, Spring MVC, Spring Boot, Spring JPA, Hibernate, Oracle (SQL, PL/SQL) Spring Junit 4, SonarQube, Micro-services.

EXPERIENCE

Bachelor of Technology

2020

YOGI VEMANA UNIVERSITY

Andhra Pradesh

STRENGTHS

♥ Results-oriented problem solver

Delivered 20% reduction in application response time by optimizing code.

🚩 Strong team player

Collaborated with team to deliver project on time and on budget.

🚩 Excellent communicator

Effectively presented technical concepts to non-technical stakeholders.

SKILLS

Languages : Java . J2EE .SQL. XML .

Spring Framework : MVC. Boot .

ORM Framework : Hibernate. JPA .

Test Framework : Junit. Easy Mock .

DataBase : Oracle. MySQL .

Design Patterns : Java .J2EE .

Code Quality Tools : SonarQube .

Build Tools : Maven. Gradle .

Involved in migration : JDK 1.7 & 1.8 .

Version Control : SVN . Git HUB

ACHIEVEMENTS

🚀 Development of enterprise-level software

Delivered a scalable software solution that increased productivity by 30%.

✓ Development of real-time embedded software

Created software for a medical device that is saving lives.

💎 Computer Classes

Visual Logo, MS Windows. which is Organised by Indian Institute Of Software Technology in Sarada High School, Proddatur .
