

About Me

A particular master who has partaken in programming test types of progression and who has besides perceived pretty much OK hand upgrades will reach out and direct with the client to guarantee that the program's utilization is beneficial at some random point lately.

Narayanan L

Software Test Engineer

Skills

- Java Selenium
- TestNG
- BDD Cucumber
- Postman
- Rest Assured
- Jenkins
- Appium
- JIRA
- Maven
- SQL
- GIT

Education

Bsc | Computer Science
St. Joseph's college of Art's and science
2016 - 2019

Work Experiences

LTIMindtree

Aug 2019 - Present

Having Four Plus Years of Experience in Testing the Web Application both manually and Automation using Java Selenium with TestNG or BDD Cucumber Framework, and Experience with API Testing using Postman & Rest Assured, Having Good Experience in Mobile Automation using Appium.

Professional Summary

- A few computer-based manufacturers are currently improving their mutual understanding, including DataDriven, TestNG, Cucumber BDD, and Junit.
- an instrument that makes it easier to automate web programs developed with Java Selenium WebDriver.
- Organize, Run Coordination, Run Analysis, and the Daily Scrum Call are a few real-world examples.
- Good Experience in resolving conflicts while using GIT.
- Perform Cross browser testing and parallel execution to check the compatibility and stability of the application.
- Extensively automated Regression test using Jenkins.
- Actively participate in ceremonies such as Daily standup calls, Sprint review meeting and sprint retrospective meeting.
- Learn how to effectively use JIRA's specialized after-defiant.
- instructions for using Jenkins, Proficient, and other always-connected organizational tools.
- A consistent, unaltered state of the GIT source code is maintained.
- Understanding existing test cases and test data, and executing the test cases and validating results in line with the project schedule and productivity metrics.
- Experience of testing within an Agile environment, adapting quickly to changing situations.
- Good Experience in API Testing using Rest Assured for Automation and Postman for Manual.
- Involved in Mobile Automation using Appium in both Android and IOS devices.
- The knowledge is extremely beneficial for moving forward and communicating with JSON, using certification for computerization, and testing basic HTTP methods like GET, POST, PUT, and Delete.

Project I - Storefront

Domain : ECommerce
Feb 2021 - Present

Description

Storefront is a website where you may rent short-term retail space.

Skills

- Java Selenium
- BDD Cucumber
- Postman
- Rest Assured
- Jenkins
- Appium

Roles And Responsibilities

- Selenium was utilized during the disregard analysis. The updated Java test code has been combined with the BDD Cucumber and Dim IDE frameworks.
- Followed Agile/Scrum Methodologies for all of the project activities.
- In Agile environment, attended daily standup meetings, user stories
- grooming sessions and team retrospectives.
- Involved in Automation framework implementing Page objects, Data Driven, Maven using
- Selenium Web Driver using Core Java.
- Prepare reusable methods to improve productivity and maintainability.
- Prepare Feature files and Step definition in Cucumber with BDD.
- Prepare Single Unit Classes to reduce memory wastage.
- Used Maven to build and run the Selenium automation framework.
- Used XPath and DOM to work with dynamic and static objects in Selenium.
- Execution of Tests and Reporting Defects using JIRA.
- Enhancing the Selenium Test cases for Cross browser testing.

Roles And Responsibilities

- Understanding the Software Requirements specification document.
- After learning how the end user will use the appliance with the flow.
- Make test cases with user stories or test scenarios.
- Perform test case execution with scenarios.
- Implemented different automation frameworks like POM, TestNG.
- Executed and debug test scripts.
- Performed defect tracking and management in JIRA.
- Consider plan forts, convincing forts, and standard examinations.
- Experience in testing using Rest based on the Web Services.
- Having Experience in developing, Modifying and Executingscripts.
- Actively involved in preparing of Test Data for Framework.
- Perform Cross browser testing and parallel execution to check the compatibility and stability of the application.
- Extensively automated Regression test using Jenkins
- Send Daily Report to Project Manager.
- Understanding requirementdocument.
- Working with Team to get clarification on issues found during requirementunderstanding.

Project II - Oceanic Bank

Domain : Banking
Aug 2019 - Jan 2021

Description

Oceanic Bank International, commonly referred to as Oceanic Bank, was a bank in Nigeria that provided individual, commercial and corporate banking services.

Skills

- Java Selenium
- TestNG
- Manual Testing
