CAREER OBJECTIVE

With solid expertise in automation framework designing and implementing test suites, I would like to work as a Software Development Engineer in Test (SDET) for your esteemed organization and ensure high-quality software products are delivered to end-users.

EXPERIENCE SUMMARY

- I have **4.2 years** of professional experience as an automation engineer using selenium (Java) using cucumber of client-server applications.
- Good exposure to each of the phases of the **Software Testing Life Cycle (STLC)**
- Expertise in working on **Selenium IDE** and **Selenium Web Driver**.
- Experience in Test Automation Framework development from scratch using tools like **Selenium, Cucumber, Junit, Jenkins, and Gherkin**.
- Involved in the development & enhancement of Framework and experienced in Automation **Test Script Writing, Execution, and Test Script Maintenance**.
- Expertise in using **Test Driven Development (TDD), Behavior Driven Development (BDD), Cucumber Framework**
- Good knowledge and experience of web service tool **REST API** and understanding of **HTTP** code response.
- Participated in Regression testing, System testing, Unit testing, and Compatibility testing.
- Expertise in developing Test Cases, Test Data Preparation, Test Case Execution, and generating Test Defect Reports.
- Sound knowledge of **Core Java** and **basic SQL**

TECHNICAL SKILLS

Operating Systems	Microsoft Windows
Languages	Core Java
Tools	Selenium Web driver, Cucumber, TestNG, Jenkins, Maven, JUnit, REST Assured, Atlassian JIRA v5.0.
Version Control System	GIT, GitLab
IDE	Eclipse, IntelliJ IDEA
Database	MYSQL

WORK EXPERIENCE

Name of the Company	Designation	From	To	Duration (Years)
Aspire Systems	Automation Test Engineer	Sep-2019	Till Date	4.1 Years

EDUCATION QUALIFICATION

- Completed Bachelor of Engineering (B.E) from Park College of Engineering and Technology in the year 2019 with first class.

PROJECT EXPERIENCE

Project Title	Argos -E Commerce
Duration	April 2021 – Till date
Business Domain	E Commerce
Roles and Responsibilities	• Involved in Automation framework implementing Page objects, Data Driven, Maven using Selenium Web Driver and Core Java Selenium Web Driver executed the test cases. • After test case execution, Bugs are raised in JIRA. • Preparing Defect Report and assigning the defects to developer to fix the defect. • Retesting the cases where defect has been raised and update the status. • Prepare Feature files and Step definition in Cucumber with BDD. • Prepare Single Unit Classes to reduce memory wastage. • Involved in Bug fixing for the defects raised during UAT. • Involved in Push, Pull, Merge the source code from GIT. • Good Experience in resolving conflicts while using GIT. • Perform Cross browser testing and parallel execution to check the compatibility and stability of the application. • Extensively automated Regression test using Jenkins. • Send Daily Report to Project Manager.

Project Title	Sliver gate Bank
Duration	Nov 2019 –March 2021
Business Domain	Banking
Roles and Responsibilities	• Gathered Domain knowledge from the product owner, Analyzing and Understanding the requirements by user stories. • Actively participated in Scrum ceremonies. • Prepared Test Plan, Test Cases and testing scenarios, Install the application and configure the application. • Test Data preparation and Loading data into the application. • Executing test cases and preparing daily execution report. • Defect logging and tracking in JIRA. • Reviewing of test cases prepared by peers. • Providing adequate support to the developers for defect analysis. • Prepared Traceability Matrix between test cases and requirements. • Performed Functional, Integration, Regression, Negative and System Testing. • Sending project daily status reports.
