

Naveen Kumar

Professional Summary

Accomplished and dynamic Data Analyst with a strong educational background in BE (ECE) and a robust 8 years of experience across diverse roles. Over the past 3+ years, I have dedicated my expertise to driving insights and utilizing analytics for strategic decision-making. Adept in team and project management, I have honed leadership skills, fostering collaborative environments that yield successful outcomes.

Throughout my career, I've collaborated closely with industry-leading automobile giants, including Jeep, Citroen, MG Motors, Toyota Kirloskar Motors, and Nissan, managing their extensive datasets with precision. I excel in dashboard ownership and product management, having expertly built scalable dashboards using advanced tools such as Power BI and Looker Studio. Proficient in configuring and reporting with cutting-edge technologies like Universal Analytics and Google Analytics 4, I uncover valuable product insights from Google Analytics and DBMS data.

In addition to my technical prowess, I have developed robust databases capable of handling ETL processes, leveraging my expertise in SQL and Pyspark. My skill set extends to the implementation of CI/CD pipelines, ensuring seamless integration and delivery of data solutions. With a proven track record, I bring over 5 years of stakeholder management experience, effectively nurturing relationships and aligning strategies to meet business objectives.

With extensive experience in project management and successful international client relationship management, I bring a comprehensive skill set to contribute to data-driven decision-making and drive business growth. Possessing a deep understanding of SQL, joins, and big data concepts, I am committed to delivering exceptional results. Poised to make a meaningful impact in future endeavors, I am dedicated to driving success through data-driven strategies and efficient stakeholder management.

Personal Details

Nationality: Indian

Languages: Tamil/ English

Date of Birth: 03/05/1993

Marital Status: Single

Education

- Bachelor of Engineering
Electronics and Communication
KNSK College of Engineering,
2010 - 2014, Nagercoil.
- Higher Secondary
DVD Higher Secondary School
2010, Nagercoil.
- Secondary School
SLB G Government High School,
2008, Nagercoil
- Internship – Data science,
Indataai -Bangalore, 3 months
- Certification – Data science,
Vepsun– Bangalore, 3months

Key Skills

- Product Management
- Data Preprocessing
- Data Visualization
- ML Algorithms
- DBMS
- SQL
- Big Data Ecosystem
- HDFS, Hive and SparkSQL
- Team Leadership
- Decision Making

Work History

Data Analyst

Eccentric Engine Pvt Ltd
Mumbai, MH, India

May 2022 – July 2023

Roles & Responsibilities:

- Played a crucial role in a SAP and SaaS providing firm, overseeing data management and analysis activities.
- Led and managed a skilled Data Team, providing guidance and support to ensure efficient operations.
- Responsibly handled and analyzed data from major automobile giants including Jeep, Citroen, Toyota, Nissan, Tata, and Maruti Suzuki.
- Retrieved data on ad-hoc requests from both internal and external stakeholders, utilizing tools such as BigQuery, Metabase, NativeQuery, and SQL.
- Defined key performance indicators (KPIs) to evaluate product performance and conducted in-depth analysis.
- Implemented data tracking and event tracking for the product, ensuring comprehensive data capture.
- Developed and updated product performance dashboards using Power BI, Looker Studio, and Metabase, effectively presenting insights to internal and external stakeholders.
- Presented data-driven insights on product performance, contributing to informed decision-making by stakeholders.
- Reported key insights after every product release, highlighting areas of improvement and success.
- Conducted comparative analysis of project performance and competitive products, establishing benchmarks for evaluation.
- Utilized data to validate changes in product/user experience (UX), including conducting A/B testing to measure impact.
- Employed Python to implement data analysis techniques, constructing machine learning models for sales forecasting, thereby supporting business planning and decision-making.

Project Manager

Falcon Multi-Service Ltd
Mumbai, MH, India

Jun 2021– May 2022

Responsibilities:

- Developed and executed project plans, ensuring the successful delivery of products within scope, budget, and timeline.
- Prioritized the product backlog, collaborating with stakeholders to define project requirements and determine feature prioritization.
- Established and maintained efficient sprint setups, coordinating tasks and activities among team members to drive project progress.
- Served as the primary point of contact for client communication, fostering strong relationships and effectively managing expectations.
- Oversaw the recruitment and onboarding of team members, ensuring the right talent was acquired to support project needs.
- Prepared comprehensive documents for Request for Quotations (RFQs) and Request for Proposals (RFPs), showcasing the organization's capabilities and securing new business opportunities.
- Maintained accurate records of suppliers, fostering productive relationships and ensuring the availability of necessary resources.

Technical Skills

Language: Python, Scala, SQL, BigQuery, JavaScript, PHP, HTML

- **Tools:**

- MetaBase
- Data Studio
- Power BI
- Jupyter Notebook
- PyCharm
- Netbeans
- MySQL workbench
- MS-office
- JIRA
- Confluence

- **Cloud:**

- GCP
- Azure

- **Packages:**

- PySpark
- MySQL
- NumPy
- Pandas
- Scikit-Learn
- SciPy
- Matplotlib
- Seaborn

- ML Algorithms: Regression, Naive-Bayes classifier, KNN,SVM, Decision Tree

- Proficiently executed SQL queries to access and manipulate database records, facilitating data management and analysis.
- Developed python based machine learning models to predict and target customers, leveraging advanced analytics techniques to optimize marketing strategies and enhance customer engagement.

Data Engineer

Moxman Digitals Pvt Ltd

Aug 2019 – Jun 2021

Chennai, TN, India

Responsibilities:

- Led the project to identify the consumer-preferred payment method for providing offers, ensuring effective data engineering practices were applied.
- Designed, developed, tested, and maintained robust data management and processing systems, ensuring data integrity and reliability.
- Utilized Hadoop distributed file system to access and process large volumes of consumer big data, enabling efficient data analysis and insights generation.
- Built scalable databases capable of handling Extract, Transform, Load (ETL) processes using SQL and Spark, ensuring data was transformed and loaded accurately and efficiently.
- Conducted batch processing of SQL queries on sizable datasets using Hive, optimizing query performance for data processing and analysis.
- Leveraged PySpark and Scala-Spark to perform transforms and actions on Consumer RDD/Dataframe, filtering and extracting relevant consumer information for analysis.
- Developed and implemented Python functions to optimize program size and efficiency, reducing code complexity and enhancing overall performance.
- Built machine learning models to predict and target customers, employing advanced analytics techniques to optimize marketing strategies and enhance customer engagement.

Project Co-ordinator

Inzzy Infotech

Apr 2018 – July 2019

Nagercoil, TN, India

Roles and Responsibilities:

- Provided supervision and guidance to new employees, ensuring they were familiar with and adhered to the project's standard operating procedures (SOPs).
- Conducted training sessions to onboard and motivate team members, addressing operational issues and promoting a productive work environment.
- Monitored project expenses, seeking opportunities to reduce costs and optimize resource allocation without compromising project quality.
- Assisted in the preparation of all required documentation for monthly, yearly, and fiscal year inspections, ensuring compliance with regulatory standards.
- Prepared and organized Excel spreadsheets, reports, and PowerPoint presentations for over 50 cross-functional team meetings, facilitating

Team Leader**Noevos Market and Research Analysis Pvt Ltd****Mar 2017 – Mar 2018****Nagercoil, TN, India****Roles and Responsibilities:**

- Conducted data mining activities to extract valuable insights and patterns from large datasets, supporting data-driven decision-making.
- Maintained and managed databases, ensuring data integrity, security, and accessibility for the team and stakeholders.
- Assigned tasks and responsibilities to team members, considering individual strengths and project requirements.
- Monitored the workflow of the team, ensuring tasks were executed efficiently and deadlines were met.
- Regularly reported project progress and updates to the Project Manager, providing accurate and timely information.
- Evaluated the performances of team members, assessing their contributions, strengths, and areas for improvement.
- Motivated team members to achieve task goals and meet project objectives, fostering a collaborative and productive work environment.

Team Leader/ Branch Incharge**Imarque solutions****May 2015 – Jan 2017****Chennai, TN, India****Roles and Responsibilities:**

- Supervised a team of Data Entry Operators (DEOs) and Field Executives (FEs), providing daily monitoring and ensuring their productivity targets were met.
- Monitored the daily production of DEOs and the beat (territory coverage) of FEs, reporting progress and performance to the Head Office (HO).
- Oversaw and ensured the timely completion of tasks such as CAF (Customer Application Form) inward, audit, indexing, and scanning, maintaining quality standards.
- Validated the daily reports submitted by each employee, providing feedback and motivation to enhance their performance.
- Identified and arranged training sessions for employees who needed additional support or improvement in their work processes.
- Maintained regular communication with the team, addressing any challenges, providing guidance, and fostering a positive work environment.
