

SUMMARY

Seeking a challenging job duty where I can put my skills in industrial vision, deep learning, and machine learning algorithms to use. My ambition is to contribute to the creation of cutting-edge solutions that make use of my strong Python programming expertise. I am thrilled to offer my talents to promote innovation and efficiency in your projects, as I have a strong track record of successfully developing solutions utilizing open-source Computer Vision frameworks like OpenCV, and CUDA. Basic understanding of restful api, unix shell, Amazon Web services, troubleshooting python and flask service, git and postgres. Have knowledge of Predictive modelling , Decision tree, random forest, clustering, Artificial Neural network.I've polished my written and vocal communication skills by working together with stakeholders on both small and enterprise-level initiatives. Using my experience in computer science and statistics, I've created predictive models and increased performance through real-time transaction monitoring, leveraging tools like S3 and Kubernetes to expedite data flow and deployment processes. My entrepreneurial approach motivates me to constantly experiment and create, combining business strategies with strong architectures to solve challenging challenges and generate market revolutions.

AI/DEEP LEARNING SKILLS

Libraries/Application: Open CV. TensorFlow, PyTorch, Large Language Models, Generative AI, Linux, Huggingface, OpenAI, LLM, LLama index, Langchain, Chroma DB,, Pandas, Numpy, Regex, Azure Machine learning, Azure Open AI, scikit-learn

- Text Processing: NLTK, Term Frequency-Inverse Document Frequency (TF-IDF), good at writing, testing, and debugging Python code to create reliable and efficient applications.

- Backend code to improve the frame and provide security as per user requirements with knowledge of ORM.

- ML Classification: Logistic Regression, Naive Bayes Classifier, k-NN, Support Vector Machines, Decision Trees, Random Forest., Flask

- Big Data: Spark, Hadoop, SQL,Airflow

Data Mining,Data Manipulation,Data Collection Systems,Quantitative Analysis,Statistical Methods,Predictive Modeling,Database Technology,MS SQL Server,Relational databases,Analyzing Data,modeling techniques

INDUSTRY EXPERIENCE

Data Engineer

Jan '23 - Present

Dynapt Solutions LLC

New Delhi, IN

Project Undertaken- Imaginify App Responsibilities:

- Extensive knowledge of open-source computer vision libraries including **OpenCV**, OpenGL, CUDA,Pytorch, and TensorFlow.
- Machine learning algorithms, and statistical modeling ability to code and optimize solutions in programming languages such as **Python** multithreading.
- These models (Roop+Tortoise+wav2lip) were successfully integrated and used in application building from the backend to get to the desired industrial result in Generative AI that's deployed on the GPU VM having the Cuda cores.
- Optimum steps were used in **linux based machine for GPU usage** to deploy the model.

Project Undertaken- DynaptMax Chatbot Responsibilities:

1. Chatbot Development:

- Utilize information retrieval for relevant data. Combine retrieval techniques with generation models. Leverage Chroma DB for dynamic data handling.
- Integrate **Langchain for NLP** and semantic understanding. Incorporate Azure OpenAI for advanced language models.

2. User Interaction and Satisfaction:

- Implement user feedback for satisfaction evaluation.
- Escalate when user dissatisfaction or unfulfilled intent is detected.

3. L1 to L2 Escalation:

- Define criteria for escalating to human support.
- Ensure a seamless handover with relevant user information.

4. Human Support Interaction:

- Enable Level 2 support to take over seamlessly.

- Provide necessary tools and information for effective issue resolution.

5. Continuous Improvement:

- Communicate escalations promptly to users. Gather post-escalation feedback for improvements.
- Monitor performance metrics for ongoing enhancement

EDUCATION

Pursuing Master in Data Science	Aug '22 - Present
Liverpool John Moores University	
Post Graduate Diploma in Data Science (Data Engineer)	May '21 - Jun '22
IIIT-Bangalore	
Bachelor Of Technology in Civil Engineering	Jul '11 - Aug '15
IIMT College Of Engineering (Dr. A.P.J. A. Kalam Technical University)	Uttar Pradesh, IN

CERTIFICATIONS

- Data Science : Transformers For Natural Language Processing- <https://www.udemy.com/certificate/UC-5bd84822-1a99-421d-abf4-c2eb9f655d11/>
- Staad Pro- Structure Analysis And Detailing
- Microsoft Certified Azure Data Engineer Associate-https://www.credly.com/badges/340674c8-d876-48d4-8610-e713af3479b6/public_url
- Microsoft Certified Power BI PL-300-https://www.credly.com/badges/08cbde31-71a1-4ccf-8731-9ed83886597c/public_url
