Professional Experience

2021/08 – present
Bengaluru, India

Software developer

Applied standards and innovation pvt Ltd

1.Thales(Back-end):

Technology stack: Java, Spring boot, PostgreSQL

Domain: Communication

Role: Developer

Duration: 1 Year and 2 month

Responsibility:

- My responsibility in this project was to analyze the legacy code which in monolithic architecture, developed in EJB.
- Convert the Monolithic application(old architecture) into spring boot microservices(new architecture).
- Implemented third-party software like Vault to secure the DB credentials and Keycloak for user administration.

2.AGFA(Front-End + Back-end):

Technology stack:- JavaScript, AngularJS, MariaDB, Java, Spring boot

Domain:- Healthcare

Role:- Developer

Duration :- 8 months

Responsibility(As a Front-end):

- My responsibility in this project was to enhance the admin dashboard, which includes these functionalities such as recently diagnosed patient reports, patient personal information on the click of the patient name and users with their privileges.
- I have applied a post-build feature that renders the configuration settings once the project has been built.

Responsibility(As a Back-end):

- My responsibility in this project was to develop filter APIs, which return all the data of hospital and subject based on multiple parameters.
- Implemented pagination to decrease the latency of the data rendering into a table(UI) and other functionalities such as searching and sorting.

3.UNILEVER(Front-End + Back-end)

Technology stack :- JavaScript, AngularJS, MariaDB, Java, Spring boot

Domain :- Healthcare

Role :- Developer

Duration :- 4 months

Responsibility(As a Front-end):

- My responsibility in this project was to develop the admin dashboard, I have applied graphs such as bar charts, scatter chart, and line charts, to visually represent and analyze the data.
- I have also created sub-menus such as Device-table, Study-table, Subject table, and more.

Responsibility(As a Back-end):

- My responsibility in this project was to create a post APIs such as create device. which save the information of new devices into the database, assigning them unique IDs for easy retrieval and management.
- Applied pagination to decrease the latency of the data rendering into UI and other functionalities such as searching and sorting.

Education

2017/08 – 2021/08
Bengaluru

Bachelor of Engineering
M.S. Engineering college
CGPA : 7.57

Skills
