

Pallavi Pimple

Jr. Automation Test Engineer
3 years of experience in Software Testing

+91-8482990313
pallavipimple10@gmail.com

CARRIER OBJECTIVE:

Experienced Software Tester adept at both manual and automation testing, seeking a role to enhance software quality through collaboration and innovative testing strategies. Committed to delivering secure, reliable and efficient software solutions to contribute to project success.

Professional Summary:

- Adequate knowledge of automation tools like Selenium Web Driver and API tools like Postman
- Experienced in various types of testing – Smoke, Sanity, Regression, Retesting, API testing
- Good experience in automation script coding and automating the Rest API
- Experienced in Python, encompassing core concepts and object-oriented programming.
- Capable in recognizing and effectively managing dynamic web elements
- Skilled in Pytest as well as BDD framework with cucumber.
- Experienced in hybrid automation frameworks using the Page Object Model.
- Familiar with all phases of SDLC and STLC
- Good in MySQL database management, GitHub, Jira
- Active participant in Agile ceremonies: daily scrum, sprint planning, review, retrospective.
- Good written, communication, interpersonal skills, proven team player and analytical problem-solving abilities.

WORK EXPERIENCE & RESPONSIBILITIES:

PROJECTS PROFILE:

Project-1 (MIT Software and Services: March 2022 -Present)

Project Title: Digital Education

Domain Type: Education

Major Technology: Selenium Web Driver, Rest API

Role: Manual and Automation Test Engineer

Project Detail Description:

As part of an educational initiative, this project digitizes and organizes textbooks for all schools. It provides teachers with access to subject-specific resources while offering administrators comprehensive control over information.

Roles and Responsibilities:

- Responsible for writing manual test cases, scenarios
- Automated manual test cases using Python, Selenium WebDriver and Cucumber with Page Object Model
- Responsible for API testing using Postman and Django Rest API
- Responsible for Defect Reporting and Defect Tracking process using JIRA

Project-2 (MIT Software and Services: March 2021-Feb 2022)

Project Title: OMS

Domain Type: E-Commerce

Major Technology: Postman, Jira

Role: Manual Test Engineer

Project Description:

The OMS comprises multiple roles, each carrying specific responsibilities and predefined tasks. It manages bulk orders placed with manufacturers. The system regulates the entire order cycle—from the design created by designers to manufacturers—through the Strategy Planning Manager and the Supply Chain Manager.

Roles and Responsibilities:

- Responsible for writing manual test cases and test scenarios
- Managed the defect reporting and tracking process efficiently using JIRA.
- Responsible for API testing using Postman
- Attended all agile ceremonies
- Interacted with team to implement models and monitor results

EDUCATIONAL QUALIFICATION:

- B.E - Electrical Engineering, Nagpur University with 66.67%
- HSC - Maharashtra State Board with 72.83%
- SSC - Maharashtra State Board with 88.55%

TECHNICAL SKILLS:

1 year of experience in Manual Testing and 2 years of experience in Automation testing.

Analytic/Predictive modeling Tools	: - PyCharm
Programming Language	: - Python
Automation Tools	: - Selenium Web Driver, Postman
Versioning Tools	: - GIT
RDBMS	: - MySQL
Defect Reporting Tool	: - JIRA
OS and Networking	: - Windows 7 and 10

PERSONAL PROFILE:

Father's Name	: Subhash Pimple
Mother's Name	: Prabha Pimple
Gender	: Female
Languages Known	: English, Hindi, Marathi
Date of Birth	: 31/10/1994
Permanent Address	: Hudkeshwar Road, Nagpur - 440034
