---

**Objective:** To obtain a challenging position in Information Security where I can prove my ability, skills, creativity & leadership to prove to be an asset to the organization and get valuable experience to excel in my career and to enhance my professional skills and to serve my organization in a best possible way with determination and commitment.

## **Professional Summary**

---

- Having total **4.1 years** of experience in Information Security and currently working as Security Analyst (Security Operation Center team).
- Experience on SIEM (Security Information and Event Management) tools like monitoring real-time events using Qradar.
- Prepared daily, weekly and monthly report as per client requirements.
- Investigating and creating case for the security threats and forwarding it to Onsite SOC team for further investigation and action.
- Good Knowledge on OSI Models, Protocols, security concepts, WAN and LAN concepts, Routing protocols, Firewall security policies, VPN.
- IDS/IPS – CheckPoint, HP Tipping Point, Check Point IPS.
- Have excellent knowledge of Intrusion Detection (deep TCP/IP knowledge, and Cybersecurity), various operating systems (Windows/UNIX), and web technologies (focusing on Internet security).
- Have ability to read and understand packet level data Intrusion detection and prevention and Network Security Products (IDS/IPS, firewalls, etc.) Host Security Products (HIPS, AV, scanners, etc.).
- Experience on performing log analysis and analyzing the crucial alerts at immediate basis through SIEM.
- Experience in handling critical alerts from Symantec Endpoint Protection and working for resolution.
- Experience in handling alerts from CrowdStrike EDR and investigation.
- Correlating the incoming events by creating rules based on specific set of conditions and logical operations.
- Hands on experience on Threat Investigation analysis and Security Monitoring and Operation.
- Identify malicious URL's and suspicious IP's from IDS events generated and block the malicious website on proxies to prevent future download of the virus.
- Analysis of virus alerts triggered by the Symantec (SEPM) and provides the remediation steps.
- SEP health analysis and reporting the outdated workstations to update the virus definitions.
- Phishing and Spam Email analysis through Ticketing tool Live time.
- Prepared Vulnerability Assessment reports and remediation steps post assessment using Tenable Nessus and QualysGuard.
- Have knowledge on vulnerability management.
- Exposure to Ticketing tool like ServiceNow.
- Strong knowledge on Incident management lifecycle.
- Good communication, problem solving skills and the ability to acquire new skills in a timely manner.

## **Technical Skills**

---

- SOC (Security Operation Center).
- SIEM: Qradar, Splunk.
- EDR: Falcon CrowdStrike.
- Phishing and Email Analysis.
- Create, Modify and Update Security Information Event Management (SIEM)
- Tools. Security Incident Management.
- IDS/IPS, Symantec Endpoint Protection.
- Vulnerability management.

## Professional Experience

---

**Company : Cognizant Technology Solutions Corporation, India**

**Period : October 2019 – April 2022**

**Role : Security Analyst**

**Position : L1 Analyst**

### Key Roles: -

- Working in Security Operation Center (24x7), monitoring of SOC events, detecting and preventing the Intrusion attempts.
- Good understanding of security solutions like Firewalls (Palo Alto, checkpoint, Fortinet) DLP, Anti-virus, IPS, Email Security etc.
- Responding to various security alerts for various client and scanning for vulnerabilities using tools like Qualys.
- Monitoring real-time events using SIEM tools like Splunk.
- Handling Alerts from multiple Security Log sources such as Proxy, Anti-Virus and EDR.
- Deep dive Investigation through Falcon EDR.
- Monitoring, analyzing, and responding to infrastructure threats and vulnerabilities.
- Phishing and Spam Email Analysis.
- Investigate the security logs, mitigation strategies and responsible for preparing generic security incident reports.
- Having excellent knowledge of Intrusion Detection (deep TCP/IP knowledge, and Cyber security), various operating systems (Windows/UNIX), and web technologies (focusing on Internet security).
- Monitoring packet level data Intrusion Detection and Intrusion Prevention and Network Security Products (IDS/IPS, firewalls, etc.) Host Security Products (HIPS, AV, scanners, etc.).
- Responsible to preparing the Root Cause Analysis (RCA) reports based on the analysis.
- Analyzing daily, weekly, and monthly reports.
- Creating case for the suspicious issue and forwarding it to Onsite SOC team for further investigation.
- Website Anti-Malware and Defacement monitoring and real-time alerting based on anomalies detected.
- Troubleshooting SIEM dashboard issues when there are no reports getting generated or no data available.
- Act as first level support for all Security Issues.
- Monitor SIEM alerts, analyze events in SIEM and raise Security incidents in Ticketing tool ManageEngine.
- Experience in Monitoring & Investigating the incoming Events in the MacAfee DLP.
- Monitoring security systems and networks for anomalies.
- Investigating security violations, attempts to gain unauthorized access, virus infections, etc.
- Coordinate responses to security incidents in a timely manner.
- Work with various teams across the organization to improve security posture.

## Professional Experience

---

**Company : Tata Consultancy Services, India**

**Period : April 2022 - November 2023**

**Role : Cyber Security Analyst**

**Position : L2 Analyst**

### Key Roles: -

- Monitoring 24\*7 SOC Operations which includes Detection, Tracking and Analyzing of Alerts and Incidents.
- Experience in Incident Management, deploying, configuring and Monitoring security products like Splunk SIEM Tool.
- Working on SIEM Console for Alert analysis. On the basis of malicious alerts , raising incidents on Service Now tool.
- Handling incidents escalated by the Clients and L1 team in Rotational shifts.
- And analyses all the attacks and come up with the remedial attack analysis.
- Working on Proofpoint Email Security Gateway hosted in Proofpoint on-demand analyzing different email authentication related issues like DMARC, DKIM, SPF and spam detection etc.
- Investigate malicious Phishing emails and Domains using Proofpoint Tool and also using Open-source

tools like : MXToolbox , DMARC analyzer, Virus total , Abuse IPDB, URL scan, URL void, IP void and CISCO Telos.

- Blocking IOCs (like: Malicious URLs, Email, Domain)in the Proofpoint Email Security Gateway.
- Knowledge on Firewalls, VPN, IDS/IPS and security audits.
- Generating the new Internal Certificates for renewal as per request. Generating
- Weekly and Monthly report and sharing with Customers with proper Resolutions & Action taken.
- Worked on Service Now for Incidents, Service Catalog tasks and Change requests creations to closing.
- Basic knowledge on Cloud Flare.
- Drafting shift hand-over, Presentation of Dialy reports, Weekly reports to the client. Work on Daily SPAM Metrics and Montly SPAM Metrics. Report it to the Client.

## **Education**

---

I had completed Bachelor's degree with aggregate 70.2% in GITAM University, Vizag, AP.

Duration: 2012- 2016

## **Declaration**

---

I Here declare that the above given information is correct to the best of my knowledge and belief.
