SKILLS

DevOps Tools: Git, GitHub, Maven, Ansible, Terraform, Jenkins, LAMP Stack, Nagios, Docker Container, Kubernetes.

Cloud Computing: Familiarity with AWS services including EC2, VPC, S3, Route53, CloudFront, IAM roles & policies.

Monitoring Tools: Grafana, DataDog, LogicMonitor, Pingdom, CloudWatch.

Operating Systems : Windows, Linux (RHEL, Amazon Linux , Ubuntu) and Basic Networking knowledge.

Login Tools : putty, RDP

CAREER OBJECTIVE

To actively engage in the dynamic and competitive world, leveraging my passion and dedication to deliver excellence. I aspire to contribute to an organization's growth by utilizing my profound knowledge, innovative ideas, and valuable skills, thereby achieving remarkable results. With a strong sense of determination and unwavering confidence, I aim to make a significant impact and add value to the success of the organization.

EDUCATION

MCA

National Institute of Science and Technology Berhampur, Odisha

Dec 2020 - Aug 2022

CGPA: 8.89

BSc

Berhampur University, Odisha

May 2016 - Jul 2019

CGPA: 6.8

XII (CHSE)

OMBBS College, Berhampur, Odisha

Apr 2014 - Jun 2016

55.16%

TRAINING ATTENDED

Completed DevOps with AWS and LINUX Training

at Naresh IT, Hyderabad.

Jul 2022 - Jun 2023

- Launching virtual Linux servers in Aws cloud using EC2 service.
- Attaching the security groups and triggering the inbound and outbound rules.
- Creating the VPC and subnets in Aws cloud.
- Creating the managing the roles, policies in IAM access control.
- Creating the backup & restore operations of data using AWS S3 buckets.
- Creating the alerts configurations using Cloud watch monitoring tool in Aws.
- Creating and managing the users & groups for production/preproduction servers.
- Installations and configuration of YUM, RPM
- Configuring Monitoring servers using Nagios monitoring tool.
- Performing build management using Jenkins with git source code management.
- Configuration and managing webserver (Apache, Nginx, httpd)
- Configuration and managing Application Servers (Apache, Tomcat 8)
- Performing system operations using Shell scripting as per client requirement
- Using Ansible and Terraform for infrastructure automation and configuration management.

- Familiarity with Docker containers and container orchestration platforms like Kubernetes.

ACADEMIC PROJECTS

◆ Online Voting Application

Nov 2021 - Aug 2022

This full-stack web application allows users to vote between two options. The front-end web app, built in Python, facilitates user voting. Votes are collected and temporarily stored in a Redis in-memory database for fast data access and manipulation. A .NET worker application consumes the votes from Redis and stores them in a Postgres database, backed by a Docker volume for data persistence and scalability. Finally, a Node.js webapp displays real-time voting results to users.

ROLES & RESPONSIBILITY IN THE PROJECT:

- Created, implemented, and managed cloud infrastructure in this full-stack web application project using Terraform.
- Implemented the CI/CD pipeline using Jenkins for automated build, testing, and deploy the Artifacts to S3 to maintain the version availability of the application.
- Ensured version control and code collaboration using Git and GitHub.
- Dockerize the Python, .NET, and Node.js applications. Create Dockerfiles for each component.
- Build Docker images and push them to a Docker container registry, such as Docker Hub.
- Deploy a Kubernetes cluster on AWS Cloud and Create Kubernetes Deployment and Service objects for the Python, .NET, and Node.js applications.
- Set up a Redis instance as a Kubernetes Deployment for temporary vote storage and Configure a Postgres database in Kubernetes using a StatefulSet and Persistent Volume Claims for data persistence.
- Set up Prometheus and Grafana for monitoring in this Kubernetes cluster.

STRENGTHS

- Good communication & interpersonal skills, Inter-team management.
- Ability to learn new technologies and quickly get adapted to different work environments.

DECLARATION

I hereby declare that information furnished above is true to the best of my knowledge.
