Skills

PROGRAMMING

Java • JavaScript • HTML/CSS Spring

Boot • Spring MVC • Junit
Mockito • Angular • React

DATABASE

MySQL • Mongo DB•

CLOUD/TOOLS

Docker • Git • Jenkins
SonarQube • IntelliJ • VS Code
Postman

OTHERS

Object Oriented Programming
SOLID Principles • Data Structures
Algorithms • Debugging
Microservices Architecture

Certification/Training

LINKEDIN CERTIFICATION

Gained proficiency in Rest API through a comprehensive LinkedIn Learning course and earn a valuable certification.

INDUSTRIAL TRAINING

March 2022 – Sep 2022
Engaged in intensive Java Technology training at Nagarro, broadening my expertise and delving into the latest technological innovations.

Experience

ENGINEER

NAGARRO

Sep 2023 – Present

Gurugram, India

- Seasoned Backend Developer with a strong focus on API** development and optimization, contribution to the enhancement of backend applications.
- Proficient in writing robust and efficient test cases, ensuring the reliability and stability of backend systems.
- Committed to maintaining codebase integrity and implementing software engineering principles, resulting in high-quality, maintainable, and efficient backend solutions
- Transformed the SOAP API into a more efficient REST API using MapStruct and Initiated the project by integrating the WSDL through the import of the corresponding JAR file into the project's POM.
- This integration served as the foundation for converting the SOAP API into a more agile and user-friendly RESTful version.
- Played a key role in improving project reliability and functionality by creating a comprehensive suite of unit test cases and Leveraged JUnit and Mockito frameworks for unit testing also, Achieved an impressive **95% Sonar code coverage**, enhancing **code quality**.

TRAINEE

NAGARRO

Sep 2022 – Sep 2023

Gurugram, India

- Created Full Stack Application Product Catalog using Spring Boot, Angular.
- Worked on Assignments **based on Java Springboot, Hibernate and Angular**.

Projects

E COMMERCE | PRODUCT COMMUNITY WEBSITE

SPRING BOOT, ANGULAR, MYSQL

- Designed and implemented a **web application** that prioritized user engagement by streamlining **registration, login, and product exploration**.
- Implemented Spring Security measures to safeguard user information and ensure secure access control. Developed search and filtering functionalities that enabled users to easily navigate a wide range of products by brand and price range.

LOG INGESTION APPLICATION

SPRING BOOT

- Designed a **scalable and robust Spring Boot Log Ingestion Application** that empowers users to ingest logs in bulk, enabling efficient data collection
- Enabled users to **search for specific log details** using filters based on log levels, timestamps, and other relevant criteria.
- Developed comprehensive REST APIs to facilitate seamless integration of application with external systems.

ATM SIMULATOR SYSTEM

- Desktop based application made using GUI and swings. It allows the user to make ATM related transaction tasks.
