WORK EXPERIENCE

Functional Test Engineer, Amdocs DVCI, Pune

July 2020 - Present

- **Conducting** end-to-end functional testing to validate code functionality, address defects, CRs, Release, Out of Release, Production testing.
- Proficiently **interpreting** Change Request (CR) documents for comprehensive project requirements understanding.
- Skillfully **crafting** Test Cases aligned with User Stories and CRs for thorough testing.
- Analyzing **testing scope** and providing accurate **effort estimates** for MD (man-day) in coordination with business stakeholders.
- Actively engaging in **business review** meetings to secure approvals for test cases and results, contributing to enhanced customer satisfaction.
- Efficiently testing and addressing **production defects** to enhance system stability.
- Showcased outstanding proficiency in managing **critical P1 ASAP** defects and formulating rapid testing guidelines.
- Conducting comprehensive **non-production (staging)** testing to mitigate risks before production release.
- Diligently performing **24/7 production sanity** checks, ensuring optimal system performance.

EDUCATION

SRM Institute of Engineering and Technology, Chennai

2016 - 2020

Bachelor of Technology

CGPA: 7.34/10

Relevant Coursework:

PROJECTS

Bell Canada (BCAN ST) Project

Oct 2020 - Present

- This project encompasses testing multiple Line of Business (LOBs) such as NM1, CONSO, NGCC, and SYMP
- Conducting end-to-end testing of the customer from **creation (prepaid and postpaid)** to **usages, billing, invoice generation, financial activities, port IN/OUT, migration, third party**
- Running event generation for prepaid customer like Voice, SMS, Data
- **HSI (Highly Sensitive Information) CRs** which involved purging of sensitive information of a customer like Credit Card details/ transactions from the database to secure customer's privacy.
- **Production patch defect testing** which includes **bundles testing** that goes either during release deployment (EC bundle) or during the normalization period of release.

ACHIEVEMENTS

- Awarded with the "**Customer Hero of the Month - June 2021**" for contributions to Bell Canada Project.
- Recognition under **top 15% performer** in the BCAN ST Team for 2022-23
- Collaborated with team of 3 in the development of HSI -NGCC project.
- Supervised team of 7 colleagues for critical production release
- Developed clear, well-organized, and comprehensive test documentation facilitating smooth knowledge transfer and supports future testing efforts.
- Increased defect detection rate, leading to a reduction in the number of critical defects reaching production, resulting in higher customer satisfaction and a more stable product.

CERTIFICATIONS

- Complete **Android App Development** Certificate from Udemy
- Certificate for testing a **Critical CR: 13.9** in BCAN Project

SKILLS

IT Skills:

- **Test Automation Tools:** Selenium WebDriver, TestNG, JUnit
- **Programming Languages:** Java
- **Web Services Testing:** REST Assured, Postman, SOAPUI
- **Test Management Tools:** Jira, HP ALM/Quality Center
- **CI/CD Tools :** Jenkins, GitLab CI
- **Database Testing:** SQL (for querying databases), Data verification and validation
- **Browser Developer Tools:** Chrome DevTools
- **Defect Tracking Tools:** Jira
- **Operating Systems:** Windows, Linux/Unix
- Understanding of Software Development Life Cycle (**SDLC**) and Software Testing Life Cycle (**STLC**)

EXTRACURRICULAR ACTIVITIES

- **Football**
- **Cooking**

Languages: English (Fluent), Hindi (Fluent)
