

Microsoft BI Stack Consultant

Contact Information

Name : Praveen Bheemireddi
Mobile : +91 9121850167
Email : bipraveenbheemireddy@gmail.com

Summary

- Having total experience of 4+ years as a MSBI Stack developer (SSIS, SSRS and SSAS), Power BI developer which includes requirement understanding, solution design, development, support, maintenance projects and having knowledge in Data Warehousing (DW) applications primarily using Microsoft stack.
- Strong experience in understanding the HealthCare, Insurance Domains
- Expert Gathering requirements for Dashboard.
- Dimensional and Data Modeling.
- Expertise in the Microsoft BI solution offerings including SQL Server databases and MSBI Stack (SSIS, SSRS, SSAS and Power BI).
- Experienced to use standard visualizations like Slicer, Card, stacked column chart, Clustered column chart, Line and stacked column chart, Line and clustered column chart, and map etc.
- Experienced to use custom visualizations.
- Comfortable in working with filters, calculated columns, measures, relationships, and transformations of edit query section.
- Published/shared the reports by creating a content pack in app.powerbi.com/sharing the PBIX file.
- Have good experience to implement RLS as part of security.
- Working on DAX functions to create Calculated Columns and Measures.
- Experience in Generating Reports like Pie-Charts, Bar Graphs, Drill downs, Drill through,
- Navigation Reports Using Power BI.
- Expertise in T-SQL developing Views, Stored Procedures, User-Defined Functions, Complex Query development, Joins etc.
- Expertise in query optimization and performance tuning.
- Expertise in data acquisitions, archive recovery, and implementation of a database
- Worked Extensively on ETL process using SSIS package.
- Good Experience in maintenance and Administration of SQL Jobs, Alerts, SQL Mail Agent, and schedule SSIS Packages.
- Good Experience in providing Error Logging and Event handling for SSIS Packages using SMTP Configuration and Execute SQL task.
- Good experience in loading data from different types of json and Excel files.
- Designed Dashboards, Scorecards and reports using multiple KPI's, OLAP charts and SSRS Reports.
- Strong Knowledge on Power BI to import data from various sources such as SQL Server, Azure SQL DB, SQL Server Analysis Services (Tabular Model), MS Excel etc.
- Configuring the data sources to schedule the data refresh using Power BI gateways.

- Worked on Power Pivot, Power Map, Power Query, Power View, Power BI, SSRS and Advance Excel to develop multiple report models.
- Developed standard reports, parameterized reports, drill down, drill through and cascading and collaborating into final design of displaying into dashboards.
- Experience in Agile and Waterfall delivery models.
- Knowledge on Azure Database, Azure Data Factory, Azure Blobs and Azure Data Lake.
- Ability to independently drive consulting engagements interacting with technology and business stakeholders.

Key Strengths

- Excellent communication, bridging Client Interaction interpersonal skills with strong analytical and problem-solving skills, capable of handling responsibilities independently as well as a proactive team member.
- Hardworking, Confident, Competent, quick learner and highly motivated team player.

Employment History

- Currently Working as Senior BI Developer (as a consultant) for Valsyne technologies Pvt Ltd Since Mar 2019 to till date.

Education/Qualifications

2014 – 2017

Graduate in B.Sc. (Comp) from Kakatiya University

Technical Skills

<i>Technologies</i>	Microsoft Business Intelligence (MSBI)
<i>Database Technologies</i>	SQL Server, TSQL
<i>Database Tools</i>	SQL Profiler, BIDS, SSDT
<i>ETL Tools</i>	SQL Server Integration Services (SSIS)
<i>Reporting Tools</i>	SQL Server Reporting Services (SSRS)
<i>Analysis Services</i>	SQL Server Analysis Services (SSAS), Data warehousing
<i>Visualization Reporting</i>	Power BI, Power Query, DAX
<i>Version Control Tools</i>	TFS, JIRA, DevOps, Bugzilla
<i>Advanced Reporting Tools</i>	Excel

Project #1:

Project Name: Novo NorDisk

Client: Novo NorDisk HealthCare (Pharmacy); Denmark, U.S.A

Duration: Nov'21 to till date

Role: *BI Developer*

Project Description:

Novo NorDisk is a pharmaceutical company that enables businesses, including small & medium businesses and service professionals, to utilize their pharm industry and using XML and JSON format with various backend systems through Integration, transformation and data management enablement in the solution.

The focus is on the serious chronic diseases that affect hundreds of millions of people and are among the most urgent global health challenges. By combining our innovation and commercial excellence, we draw upon insights from patients and partners to transform bold ideas into life-saving and preventive medicines.

They make long-term investments in novel treatments and technologies, including curative stem cell-based therapies, to continually advance the development of medical devices and digital health solutions.

Responsibilities:

- Involved in requirement analysis as per the customer requirements.
- Used SSIS to create ETL packages to validate, extract, transform and load data to
- Data warehouse databases and data mart databases.
- Developed various operational, Dashboard reports using SSRS.
- Created Tables, Stored procedures, and defined functions.
- Extensively designed the packages and data mapping using Control flow task, Sequence container task, Dataflow Task, Execute SQL Task and Data conversion task in SSIS Designer.
- Developed, monitored, and deployed SSIS packages.
- Developing of dashboards using Power BI
- Hands on expertise with multiple sources of data and building the data model using Power BI Power Query and Power View.
- Expertise in working closely working with clients and understanding the business requirements and converting to build dashboards as per the business rules.
- Create and modify tables, stored procedures, triggers, check constraints and functions. Create triggers to keep track of changes to the fields of tables when changes are made.
- Attended daily standup calls as part of "Agile" methodology.
- Worked with Dashboards style of reports using all the Power BI components.
- Worked with Pages and Page Visualizations in Power Bi Desktop.
- Created Dashboards style of reports using Power Bi Desktop Visualizations like Bar Chart, Line Chart, Area Chart and Slicer etc.
- Created the reports using charts like Pie, Bar, Line, KPI Visuals, Custom visuals, etc.

- Charts are used in making reports more user-friendly in analysis purposes.

Project #2:

Project Name: BNY Mellon (Bank of New York); Banking and Insurance

Duration: Mar'19 till Nov'21

Role: Database Developer

Project Description:

BNY Mellon is an investments company. We provide investment management, investment services and wealth management that help institutions and individuals succeed in markets all over the world. For over 100 years, BNY Mellon has maintained a valued presence in Asia Pacific, where we have been one of the first U.S. financial institutions to invest in the region's vast potential. Today, we have approximately 14,000 employees in the region and maintain extensive operations in 17 locations.

With global scale, deep knowledge, and advanced technology, we have a view into \$35.2 trillion of assets* and one of the largest data sets in the financial world, giving us a truly unique perspective.

Responsibilities:

- Create and modify tables, stored procedures, triggers, check constraints and functions. Create triggers to keep track of changes to the fields of tables when changes are made.
- Designed and developed SSIS Packages to process data into Target System from Legacy source systems based on the population specs.
- Working on SQL Server Integration Services (SSIS) for transferring data from Heterogeneous Databases OLEDB sources.
- Used Event Handlers to handle errors and enabled logging along with email notification.
- Automated manual process with SQL Server Integration Services (SSIS) packages for importing data from various sources to destinations using various transformations.
- Used all the major Control flow tasks and Data Flow Transformation in SQL Server Integration Services (SSIS)
- Debugged Packages using break points.
- Created Jobs, SQL Mail Agent, Alerts and Scheduled SSIS Packages
- Optimize Queries and used SQL Profiler to identify the bottle necks in scripts.
- Develop and deliver dynamic reporting solutions using SQL Server 2012 Reporting Services (SSRS).
- Created various complex reports like Form, Tabular, Drill Down, Drill Thru, Matrix and chart reports according to user specifications using SSRS.
- Worked on expressions to filter, group, parameterized, cascading parameter reports in SSRS.
- Develop reports using SQL Server Reporting Services and utilizing complex SQL queries and stored procedures. Configure and maintain Report Manager and Report Server for SSRS.
