WORK EXPERIENCE

WorkSent (formerly Eynotech Service Pvt Ltd) Kochi, Kerala, **SOC Engineer**

January 2023–present

- Leveraged Azure Sentinel and AlienVault SIEM tools to enhance continuous monitoring and response to security threats, resulting in a 70% efficiency increase. Configuration and deployment of data connectors for seamless integration of data sources.
- Applied fine-tuning techniques to optimize alerting thresholds, leading to a remarkable 30% reduction in false positives. This enhancement significantly improves threat detection accuracy and overall incident response efficiency.
- Deployed SentinelOne EDR tools for advanced endpoint protection, resulting in a 70% increase in threat detection efficiency. Conduct thorough malware and phishing analyses to identify and neutralize malicious threats.
- Conducted log analysis using KQL language for proactive threat detection and incident response. Collaborated with incident response teams to perform root cause analyses of escalated alerts and implement preventive measures and remediation plans for security incidents.
- Employed risk management tools such as Cyrisma and Rapidfire to assess and mitigate security risks effectively, resulting in a 40% reduction in security risks. Integration of threat intelligence enhances threat detection and response capabilities.
- Developed and refined playbooks within SIEM platforms to automate incident response processes, reducing manual intervention and improving response times.
- Engaged in threat hunting activities to proactively identify and mitigate emerging threats, resulting in a significant reduction in potential security breaches by approximately 50%. Stay abreast of current threat intelligence trends and industry best practices to enhance effectiveness.
- Facilitated training and development initiatives to enhance team skills and knowledge, resulting in a notable increase in readiness to address evolving threats and challenges by approximately 30%.
- Optimized SIEM issue resolution and log source management through performance tuning, leading to a notable improvement in operational efficiency of around 30%.
- Designed dashboards to provide real-time visibility into security incidents and trends, resulting in a significant reduction in response time by approximately 40%. Presented weekly and monthly reports to stakeholders for accurate and timely reporting.

Tech Manyata Software Solutions Pvt. Ltd., Bangalore, **SOC Analyst**

January 2020–December 2022

- Monitored and analyzed security events 24/7 using Eyes-on Glass, Splunk, and Symantec EDR. Leveraged deployment configuration, data connectors, and fine-tuning techniques to reduce incident detection and response time by 20%.
- Formulated and initiated runbooks utilizing Splunk's SPL language and playbook creation to enhance alert analysis precision and efficiency, resulting in a 5% decrease in false positives.
- Utilized ServiceNow and BMC RemedyForce for ticket management, ensuring timely incident tracking and management. Consolidated data ingestion techniques for seamless incident handling.
- Coordinated with the incident response team, deploying Tenable Nessus for effective remediation actions, achieving a 5% increase in incidents resolved within 24 hours.
- Maintained consistent communication and handover of critical information between shifts, drafting 99% of shift handovers on time using established templates and processes.
- Enhanced accuracy and completeness of L2/L3 shift handover reports by 10% through the creation of new dashboards, facilitating the capture and communication of all critical information.
- Generated weekly and monthly reports using Splunk and Symantec EDR, incorporating rule and correlation creation, alerting, and reporting to highlight key security metrics and trends.
- Implemented measures for false positive reduction and performance tuning to optimize security operations while also managing log sources effectively.
- Integrated threat intelligence feeds into monitoring systems for proactive threat detection and response, ensuring up-to-date security posture.
- Managed security updates and patches for all relevant tools and platforms, ensuring the environment's resilience against emerging threats.
- Delivered training and development sessions to enhance team skills and keep abreast of industry best practices and advancements.

Tech Manyata Software Solutions Pvt. Ltd., Bangalore **IT Support Engineer,**

January 2018–December 2019

- Planned and executed hardware and software upgrades, improving system performance and security by 20% and supporting a growing and evolving IT infrastructure.

- Enacted a new remote support process, reducing the average time to resolve technical issues by 25%, enabling employees to get back to work quickly and minimize disruption to their productivity.
- Achieved a 99% resolution rate within 2 hours, facilitating seamless remote work.

SKILLS

- **SIEM:** Splunk, AlienVault, Azure Sentinel, ManageEngine Eventlog LogAnalyzer, ADAudit Plus,Paradyn
- **EDR:** SentinelOne, Symantec, etc.
- **Firewall:** Fortinet
- **Ticketing Tools:** ConnectWise, ServiceNow and BMC RemedyForce
- **Vulnerability Assessment:** Tenable Nessus, Automox
- **Risk Assessment :** Cyrisma, Rapid Fire
- **Database Query Languages :** KQL, SPL, etc.
- **Technical Skills:** Malware Analysis, Phishing Analysis, Log Analysis, Incident Response, Threat Hunting,ThreatIntelligence, etc.

CERTIFICATIONS

- Certified Ethical Hacker (CEH) V11
- Certified Information Systems Security Professional (CISSP)
- Foundation-Level Threat Intelligence Analyst
- CompTIA Security+
- Cybersecurity: Introduction and Essentials
- Cybersecurity Professional Certificate (Google)
- Cyber-Threat Intelligence
- Cyber hunting
- AZ-900 Microsoft Azure Fundamentals

EDUCATION

- Bachelor of Engineering from Jain college of Engineering (VTU University)
