Tracking Tools	JIRA
Containerization Tools IDE	Docker
IACS Tools	V.S (Visual Studio) Code
Tools	Terraform
Operating System	MS-Office
Cloud Services	Windows, Linux
	Amazon Web Service (EC2)

Education

2017-21	Gandhi Engineering College, Bhubaneswar Bachelor of Technology, ECE
2017	12 th (CBSE) Kendriya Vidyalaya Baripada
2015	10 th (CBSE) Kendriya Vidyalaya Baripada

Personal Details

Hobbies	Playing Football and Badminton, Gardening
Strengths	Hard Working, Dedication, Discipline, Patience, Trustworthiness
Languages	English, Hindi, Odiya

Awards and Achievements

- CCNA certified from CISCO
- Secured 1st position in the event of 'CONTRAPTION'

Skill summary:

- Knowledge in all phases of software development life cycle from **Analysis, Design, Development, Testing, Release and Deployments**.
- Hands on experience with **Version Control System – GIT**.
- Working knowledge on VCS Remote Repository **GitHub**.
- Manage file permissions and ownerships in Linux
- Worked Integration of **AWS automation**.
- Create **EC2 instances** and deploy required packages.
- Configure EC2 instances as **per Project Requirements**.
- Set up and configure build jobs in **JENKINS**.
- **Set up build jobs and configure build jobs** in JENKINS.
- Ability to manage plug-in in JENKINS such as **installing** plug-in, **uninstalling** plug-in, **upgrading** plug-in and **configure** plug-in.
- Set up the servers in Jenkins to build jobs like **SonarQube, Nexus and Tomcat server**.
- Hands on Experience in Jenkins to create a job in **Freestyle, CI/CD pipeline (Scripted and Declarative way)**.
- Hands on experience in configure management tools like **Ansible**.
- Hands on creating **Docker Container for application optimization**.
- Build **images using Docker file**.
- Configure EC2 instances as per Project Requirement.

Working Experience

CISCO System Pvt Ltd.

Oct 2022-23

On Job Training :

- **End to End CICD Implementation – Jenkins**
 - Implemented an end to end CI/CD pipeline for JAVA based application using Jenkins Declarative pipelines.
 - As part of the pipeline, I have implemented various stages such as **Pull the Code, Build Maven Project, Execute SonarQube Report, Upload Artifacts into Nexus, deploy application into Tomcat Server, creation of Docker Images.**

On Job Role :

- Configure and work on **Red Hat Linux (RHEL 8)**
- **Configure the Router end to end in Lab**, based on the feature.
- Changes **Image on Router**
- Working on **Pytest**
- Working in **CISCO in MIG Security**
- Work on **CafyAp** and **CafyKit**
- Run the AP through **Cafy Web**

MANHATTAN TECH VENTURE PVT. LTD

Sep' 21

- Coded the **Site Navigation**.
- **Designed buttons** and other **controls for the User**.
- **Developed form** by using HTML.
- Linked **HTML form with MySQL** by using PHP.
- **Responsive the Templates** based on the Requirement.
- Developed and enhance websites for **mass mailing**.
- Created mock-ups for the **website design**.
- Ensured website is functional and stable across devices, i.e., **desktop, mobile and tablet**.

REGIONAL TELECOM TRAINING CENTER (RTTC)

Jul' 20

- Fundamentals of **Switching, PCM**
- **Optical Network with Field**
- Mobile communication up to **5G, WiMAX, Wi-Fi**

Declaration

"I hereby declare that the above information is true to the best of my knowledge and belief".
