Education

2018-2022
B.TECH. IN CSE
KL University
CGPA : 9.07/10

2016-2018
INTERMEDIATE
Sarada Educational Institutions,
Vijayawada
Percentage: 96.7%

2016-2016
CLASS X
N.St. Mathews Public School, CBSE
CGPA: 9.0/10

Skills

LANGUAGES
C, Java, Python, Javascript, FastAPI

DATABASES
MySQL

ARTIFICIAL INTELLIGENCE
Machine Learning, Deep Learning
Computer Vision, Natural Language
Processing, Large Language Models

CLOUD
Google Cloud Platform : Vertex AI

Coursework

Data Structures and Algorithms
Operating Systems
Database Management System
Artificial Intelligence
Machine Learning
Deep Learning
Computer Vision
Natural Language Processing

Experience

2022 JUL-NOW	Quantiphi Analytics Solutions Private Limited	Machine Learning Engineer	I was in Research and Development Department where I worked on generating synthetic data on different kind of document images. I have worked in the backend using Python Fast API and Deep learning models for Masking the image and improving the image quality. Developed LLM prompts using prompt engineering Developed a Machine Learning Model to predict whether an organisation is AI leaders or Basic. Generated sample data using SMOTE method as it was imbalanced dataset. Now working in a semantic segmentation model on Neurocell images for a Medical Based Transcell Company.
2021 OCT-2022 JUL	Quantiphi Analytics Solutions Private Limited	Intern : Machine Learning Engineer	During training, I was trained in Python, Machine learning concepts and algorithms, Deep learning algorithms and concepts, Google Cloud Platform, Transfer learning using Tensorflow, Tensorflow extended , sequential API, and Model optimization techniques.At the end of the training , I was given Brain tumour recognition project as an assignment and reviewed it. Later I was part of a real time project from Petco called Vertex AI Oppty and during this project I was given several tasks on GCP Vertex AI Platform to build ML pipelines, Distributed training using Tensorflow, Creating TF Records, and Launching a Tensorflow Profiler.
2021 MAR-2021 AUG	Indian Servers	Opencv Intern	I worked on several projects in opencv such as Adding Watermark in the image and Counting people in image by capturing images from a video frequently.
2020 MAR-2020 AUG	Avishkaar Tech Solutions	Data Science Intern,Online	I led the team, collected data and worked on several projects in Machine Learning such as: Air Quality Prediction, Twitter Sentiment Analysis, Credit Card Approval.I have used different ML algorithms in all these projects to compare accuracy and to analyze how well each of the algorithm works on the dataset used. Some algorithms used are Linear Regression, Decision Tree, Random Forest, k-nearest neighbour, SVM.
Projects			
2022	Inpainting using the Keras OCR		Used Keras OCR to inpaint the required fields in the image document.
2022	Image Inpainting using Deep Learning		Used the pretrained Fast Fourier Convolution model for inpainting the required fields from the image.
2021	Brain Tumor Recognition		Used VGG16 Model to identify whether a record has brain tumour or not with an accuracy of 70
2021	Parking Occupancy using Deep Learning		Used Convolutional Neural Networks to develop a model that can predict Parking occupancy.
Certifications			
2020-2021	Artificial Engineer		Simplilearn
2022 JUNE	Associate Cloud Engineer		Google Cloud
2022 JUNE	Professional Machine Learning Engineer		Google Cloud
Achievements			
2020-2021	JOB-A-THON Analytics Vidhya		Machine Learning
	In this hackathon, I completed a Machine Learning problem using Neural Networks and I achieved 88 percent accuracy in the model I develeoped.		
2021-NOW	Hackathon by Time Internet		Machine Learning
	In this hackathon, I completed a Machine Learning problem using Random Forest Algorithm and I achieved 90 percent accuracy.
