## ETL TEST ENGINEER

### Contact

8807354895

yogiramesh0589@gmail.com

### Pro Skill

SQL/ Unix / ETL

GIT, Jenkins

JIRA

Oracle, SQL server

Informatica IICS, SSIS

Windows 7/8/10/11

Keyword Driven,  
Data-Driven, POM

### Work Experience

MountPoint Technologies Private  
Limited, Bangalore

February 2019 to till date

### Education

ME (ECE)

Anna University Regional Centre  
Coimbatore. (2010-2012)

### Objective

As an accomplished ETL Tester, my career objective is to leverage my extensive expertise in data testing and validation to contribute to the seamless flow of information within organizations. Seeking a challenging role where I can apply my proficiency in ETL processes, data warehousing, and quality assurance to ensure the accuracy, integrity, and performance of data systems.

### Professional Summary

- Having **5 years** of Experience in ETL Testing and Database Testing.
- Creating Test scripts in Oracle and SQL server database to validate various transformation logics which mentioned in mapping sheet.
- Work Experience in creation of SQL using Joins, Sub queries, Analytical functions and aggregate functions to apply and validate Joiner aggregate and filter transformations
- Involves peer-to-peer validations to verify the test scripts, test cases and test scenarios prior to their execution.
- Creating bugs in JIRA tool to communicate about the bug to developers and to do the proper tracking of the bug till the closure.
- Creating documents like test cases bug reports and test closure documents for the proof of test completion of the project.

### Projects - Banking - ETL Tester

**Project** : Santander Bank

**Company** : MountPoint Technologies Private Limited.

**Team Size** : 10

**Tools:** SQL Developer, JIRA, Informatica

**Duration** : Nov 2021 to Present

Santander Bank, N. A, formerly Sovereign Bank, is a wholly-owned subsidiary of the Spanish Santander Group. It is based in Boston and its principal market is the northeastern United States. It has \$57.5 billion in deposits, operates about 650 retail banking offices and over 2,000 ATMs, and employs approximately 9,800 people. It offers an array of financial services and products including retail banking, mortgages, corporate banking, cash management, credit card, capital markets, trust and wealth management, and insurance. Santander

### Responsibilities:

- Involved test script development using oracle, sql server databases and execution in the oracle and executed the same in the respective layers and validated the transformation logics between the source and target.
- Developed ETL test scripts using Joins to validate the joiner transformation and Group functions to validate the aggregate transformations, likewise I have created SQL with the various transformation logics using analytical functions and sub queries etc....
- Experienced in writing test plans, defining test scenarios and test cases, developing and maintaining test scripts based on business and functional requirements & involved validations of the all documents in the form of peer to peer review.
- Communicated to the business team to get clear about requirement gaps and understand the functionality wherever clarification needed.

## Projects - Banking - ETL Tester

**Project** : Starling Bank

**Company** : MountPoint Technologies Private Limited.

**Team Size** : 8

**Tools:** SQL Developer, JIRA, Informatica, SSIS
